

Ain Shams University
Faculty of Women for Arts,
Science and Education,
Zoology Department.

Evaluation of Anticancer Activity of Some Venomous Animal Toxins on Human Breast and Colon Cancer Cell Lines

Thesis Submitted for the partial fulfillment for
M.Sc. Degree in Zoology by

Salma Ahmed Ali Abdel-Aziz

(B.Sc. 2010)

Zoology Department, Faculty of Women for Arts,
Science and Education, Ain Shams University
(Genetics & Molecular Biology)

Under the supervision of:

Prof. Dr. Ramadan Ahmed Mohamed Ali

*Professor of Cytogenetic, Zoology Department, Faculty of Women for
Arts, Science and Education, Ain Shams University.*

Prof. Dr. Samir Attia Mohamed Zaahkouk

*Professor of Physiology, Director of Genetic Engineering Center &
Director of Biological Analysis Institute, Zoology Department, Faculty
of Science, Al Azhar University,*

Prof. Dr. Aly Fahmy Mohamed

*Professor of Virology, Head of R&D Sector, The Holding Company
for Production of Vaccines (VACSERA).*

(2017)

ACKNOWLEDGEMENTS

After an intensive period of four years, today is the day: writing this note of thanks is the finishing touch on my thesis. It has been a period of intense learning for me, not only in the scientific area, but also on a personal level. Writing this thesis has had a big impact on me. I would like to reflect on the people who have supported and helped me so much throughout this period.

I would first like to thank my merciful Allah for completion of this work. Sincere thanks and gratitude are aimed to acknowledge all those who helped this thesis attain its present form.

I would particularly like to single out my supervisor **Prof. Dr. Ramadan Ahmed Mohamed Ali** professor of cytogenetic, Faculty of girl for science and art, Ain Shams University, I want to thank you for your excellent cooperation and for all of the opportunities I was given to conduct my research and further my thesis. You supported me greatly and were always willing to help me.

I would like to express my cardinal thanks and my appreciation to **Prof. Dr. Samir Attia Mohamed Zaahkouk** professor of physiology, Director of Genetic Engineeering Center & Director of Biological Analysis Institute, Faculty of science, Al Azhar University, for his kind supervision, encouragement and checking the final manuscript.

In addition, I would like to thank my professor **Aly Fahmy Mohamed** Head of R&D sector, Holding Company for Biological Products and Vaccines (VACSERA), for their valuable guidance. You definitely provided me with the tools

that I needed to choose the right direction and successfully complete my thesis.

I would also like to thank my parents for their wise counsel and sympathetic ear. You are always there for me. Finally, there are my friends. We were not only able to support each other by deliberating over our problems and findings, but also happily by talking about things other than just our papers.

Thank you very much, everyone!

Salma Ahmed Ali Abdel-Aziz

List of Abbreviation

List of Abbreviations:

Abbreviation	Meaning
5-FU:	5-Fluorouracil (anti-cancer drug)
ATL:	Adult T-cell Leukemia
BMI:	Body Mass Index
BSE:	Breast Self Examination
CA:	Cancer Antigen
CIS:	Carcinoma In Situ
DCIS:	Ductal Carcinoma In Situ
DNA:	DeoxyriboNucleic Acid
DR:	Death Receptors
ECM:	Extra Cellular Matrix
FAP:	Familial Adenomatous Polyposis
FOBT:	Fecal Occult Blood Testing
h:	hours
HBV:	Hepatitis B Virus
HCV:	Hepatitis C Virus
HER2:	Human Epidermal growth factor Receptor-2
HIV:	Human Immunodeficiency Virus
HPV:	Human Papilloma Viruse
HRT:	Hormone Replacement Therapy
HTLV:	Human T-cell Leukemia Virus

List of Abbreviation

IAP:	Inhibitor of Apoptosis Proteins
IARC:	International Agency for Research on Cancer
IBC:	Inflammatory Breast Cancer
IC₅₀:	The Half Maximal Inhibitory Concentration
IDC:	Invasive or Infiltrating Ductal Carcinoma
IGF:	Insulin-like Growth Factor
IHC:	ImmunoHistoChemistry
ILC:	Invasive or Infiltrating Lobular Carcinoma
LAAOs:	L-Amino Oxidases
LCIS:	Lobular Carcinoma In Situ
LOOH:	Lipid Hydro peroxide
MC:	Mucinous Carcinoma
MRI:	Magnetic Resonance Imaging
NO:	Nitric Oxide
NOS:	Nitric Oxide Synthesis
PLA2:	Phospholipases A2
PUFA:	Poly Unsaturated Fatty Acids
ROS:	Reactive Oxygen Species
TAF:	Tumor Angiogenic Factor
TNM:	Tumor Node Metastasis

List of Tables
