

FOLLISCOPIC EVALUATION OF MINOXIDIL INJECTION IN ANDROGENETIC ALOPECIA

Thesis

*Submitted for Partial Fulfillment of Master Degree in
Dermatology, Venerology and Andrology*

By

Reem Maged Omar Nayef

M.B.,B.Ch.,

*Faculty of Medicine – Misr University
for Science and Technology
(M.U.S.T)*

Supervised by

Prof. Dr. Heba Mahmoud El-Sayed Diab

*Professor of Dermatology, Venerology and Andrology
Faculty of Medicine - Ain Shams University*

Dr. Azza Esmat Mostafa

*Lecturer of Dermatology, Venerology and Andrology
Faculty of Medicine - Ain Shams University*

Faculty of Medicine - Ain Shams University

2016

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قالوا

لسبب انك لا تعلم لنا
إلا ما علمتنا إنك أنت
العليم العظيم

صدق الله العظيم

سورة البقرة الآية: ٣٢

Acknowledgment

*First and foremost, I feel always indebted to **ALLAH**, the
Most Kind and Most Merciful.*

*I'd like to express my respectful thanks and
profound gratitude to **Prof. Dr. Heba Mahmoud
El-Sayed Diab**, Professor of Dermatology,
Venerology and Andrology for her keen guidance, kind
supervision, valuable advice and continuous
encouragement, which made possible the completion of
this work.*

*I am also delighted to express my deepest
gratitude and thanks to **Dr. Azza Esmat
Mostafa**, Assistant Lecturer of Dermatology,
Venerology and Andrology, for her kind care,
continuous supervision, valuable instructions, constant
help and great assistance throughout this work.*

*I would like to express my hearty thanks to all
my family for their support till this work was
completed.*

*Last but not least my sincere thanks and
appreciation to all patients participated in this study.*

Reem Maged Omar Nayef

List of Tables

Table No.	Title	Page No.
Table (1):	Follicular dots visualized by trichoscope.....	67
Table (2):	Clinicopathological correlation of AGA trichoscopy.....	82
Table (3):	Results of hair density in group 1.	133
Table (4):	Results of hair caliber in group 1.	134
Table (5):	Results of hair volume in group 1.	136
Table (6):	Results of hair terminal /vellus ratio in group 1.	137
Table (7):	Results of hair A/T in group 1.	139
Table (8):	Results of hair A/T ratio in group 1.	140
Table (9):	Results of hair density in group 2.	142
Table (10):	Results of hair caliber in group 2.	143
Table (11):	Results of hair volume in group 2.	145
Table (12):	Results of hair terminal/vellus in group 2.	146
Table (13):	Results of hair A/T in group 2.	148
Table (14):	Results of hair A/T ratio in group 2.	148
Table (15):	Results of hair density in group 3.	149
Table (16):	Results of hair caliber in group 3.	150
Table (17):	Results of hair volume in group 3.	151
Table (18):	Results of hair volume in group 3.	152
Table (19):	Results of hair A/T in group 3.	152
Table (20):	Results of hair A/T ratio in group 3.	153
Table (21):	Results of all hair parameters at the baseline and 6 th month among group 1.	154
Table (22):	Results of all hair parameters at the baseline and 6 th month among group 2.	159

List of Tables (cont...)

Table No.	Title	Page No.
Table (23):	Results of all hair parameters at the baseline and 6 th month among group 3.	163
Table (24):	Results of hair density between three groups throughout follow ups.	164
Table (25):	Results of hair caliber between three groups throughout follow ups.	166
Table (26):	Results of hair volume between three groups throughout follow ups.	167
Table (27):	Results of hair terminal/vellus ratio between three groups throughout follow ups.	168
Table (28):	Results of hair A/T between three groups throughout follow ups.	169
Table (29):	Results of hair A/T ratio between three groups throughout follow ups.	170
Table (30):	Results of all hair parameters' improvement after minoxidil injection between both sexes.	171
Table (31):	Results of all hair parameters' improvement after mesohair injection between both sexes.	172

List of Figures

Fig. No.	Title	Page No.
Fig. (1):	Diagrammatic representation of hair anatomy	7
Fig. (2):	The different layers of hair follicle	9
Fig. (3):	Key stages of the hair cycle	14
Fig. (4):	Trichoscopic image of normal terminal hair from a healthy Central European female with dark blond hair $\times 70$ folds	20
Fig. (5):	Trichoscopic images showing the difference between vellus hairs and other hair shaft types $\times 50$	21
Fig. (6):	Stepwise miniaturization of the hair follicle and shortening of the anagen growth phase, mediated by DHT	31
Fig. (7):	Stelae or fibrous streamers (FSt) commonly seen in AGA	31
Fig. (8):	Ludwig scale for female hair loss: stage I, stage II, and stage III	34
Fig. (9):	Sinclair grades of female hair loss	34
Fig. (10):	Ultra violet-enhanced trichoscopy image in a patient with pityrosporum folliculitis shows a perifollicular orange glow	56
Fig. (11):	Handheld trichoscopes	61
Fig. (12):	Digital trichoscopes	63
Fig. (13):	Advanced digital trichoscopes and dermoscopes	65
Fig. (14):	Trichoscopic images showing (a) comma vessels which are common in seborrheic dermatitis and psoriasis and also observed in healthy individuals ($\times 70$). (b) Thin arborizing vessels	69

List of Figures (cont...)

Fig. No.	Title	Page No.
Fig. (15):	Trichoscopic image showing anisotrichosis which is significant diversity of hair shaft diameter>20%.....	75
Fig. (16):	Trichoscopic image that demonstrates no diversity of hair shaft diameter.....	75
Fig. (17):	(a) ; shows trichoscopic image of the frontal area of an AGA male patient with vellus hairs $\times 20$ (b) shows high-magnification $\times 70$ trichoscopic image demonstrating vellus hairs	76
Fig. (18):	Predominance of vellus hairs in advanced AGA.....	77
Fig. (19):	Trichoscopic image of a patient with female AGA, only one hair shaft emerges from most follicular units single-hair units;.....	78
Fig. (20):	Trichoscopic image showing yellow dots in AGA patient	79
Fig. (21):	Thin wavy hairs that are seen trichoscopically in AGA $\times 20$ folds.....	80
Fig. (22):	Peripilar sign in AGA seen by trichoscope	81
Fig. (23):	Trichoscopic image showing exclamation mark hairs in alopecia areata	84
Fig. (24):	Trichoscopic image showing tapered hairs	85
Fig. (25):	Trichoscopy of the frontal area of the scalp shows thin- and medium-sized hairs, single-hair and double-hair units in TE.....	86
Fig. (26):	Trichoscopy revealing the regrowth phase of TE with multiple upright regrowing hairs	87
Fig. (27):	Dry trichoscopy showing perifollicular scaling in LPP	88

List of Figures (cont...)

Fig. No.	Title	Page No.
Fig. (28):	Trichoscopy of LPP reveals perifollicular scaling that creates tubular structures that cover the proximal portion of the emerging hair shaft	89
Fig. (29):	Trichoscopic image violaceous areas in LPP x 20	90
Fig. (30):	Fibrotic white dots in cicatricial alopecia visualized by trichoscope	91
Fig. (31):	Trichoscopic images of DLE	94
Fig. (32):	Loss of follicular openings and ivory-colored background in frontal fibrosing alopecia (x20)	95
Fig. (33):	Central centrifugal cicatricial alopecia presents with progressive permanent apical alopecia	97
Fig. (34):	Trichoscopic image showing focally disrupted pigmented network with variations in the brown color and presence of brown asterisk like blotches in CCCA.....	97
Fig. (35):	Trichoscopic image showing a peripilar white/gray halo around the emerging hairs, hair shaft variability, and white patches of follicular scarring that interrupt the regular honeycomb pigmented network in CCCA	98
Fig. (36):	Clinical photo of a female trichotillomania patient showing the Friar Tuck sign	101
Fig. (37):	Trichoscopic image showing broken hairs in trichotillomania.....	101

List of Figures (cont...)

Fig. No.	Title	Page No.
Fig. (38):	Trichoscopic image showing tulip hairs which are short hairs with darker, tulipshaped ends and are due to diagonal fracture	102
Fig. (39):	Trichoscopic image showing flame hairs in trichotillomania.....	102
Fig. (40):	Trichoscopic image showing “peppering” which is yellow dots containing small hair residues (×70)	103
Fig. (41):	Trichoscopic image showing monilethrix of the scalp, which is characterized by hair shaft beading	105
Fig. (42):	Trichoscopy showing hair shafts that are bent in different directions and tend to fracture at constriction points in monilethrix.....	105
Fig. (43):	Trichoscopic image showing triad of netherton’s syndrome: bamboo, matchstick, and golf-tee hairs	106
Fig. (44):	Trichoscopic image showing Bamboo hair in netherton’s syndrome and trichorrhaxis invaginata ×70 folds	107
Fig. (45):	Trichoscopic picture showing hair shaft with sharp bending at irregular intervals in pili torti	108
Fig. (46):	Trichoscopy shows that in pili torti, the affected hair is flattened and twisted on its own axis at irregular intervals, usually at 180° angle.....	108
Fig. (47):	Trichoscopic picture showing white bands alternating with dark ones that correspond to air-filled cavities in pili annulati	109

List of Figures (cont...)

Fig. No.	Title	Page No.
Fig. (48):	Trichoscopic image showing woolly hair ×70 folds	110
Fig. (49):	(a) Trichoscopic image showing white knots along hair shaft and frayed ends in trichorrhexis nodosa. (b) Trichoscopic image showing the brush pattern in trichorrhexisnodosa	112
Fig. (50):	Trichoscopic image showing bubble hair that appears as white oval spaces with Swiss-cheese structure	113
Fig. (51):	Ludwig classification of female AGA, showing the three different stages of severity	119
Fig. (52):	Hamilton-Norwood scale.....	120
Fig. (53):	Folliscope 2.8 connected to laptop screen. Folliscope 2.8 window on the laptop screen. Image shows the measure tool of folliscope 2.8.	123
Fig. (54):	Folliscope 2.8 with its small handheld apparatus that contains a high definition microscopic camera.....	124
Fig. (55):	Folliscope window showing a comparison between 8 images with all hair parameters	126
Fig. (56):	Folliscope image taken by the device that explains most of the functions	127
Fig. (57):	Comparison between minoxidil sessions regarding the median of hair caliber	135

List of Figures (cont...)

Fig. No.	Title	Page No.
Fig. (58):	Comparison between baseline and 6 th month follow up in hair terminal/vellus ratio. The graph shows huge remarkable increase in the hair terminal / vellus ratio after minoxidil injection.....	138
Fig. (59):	Comparison between baseline and 6 th month follow up in hair A/T ratio. The graph shows slight increase in the hair A/T ratio after minoxidil injection.	141
Fig. (60):	Comparison between mesohair sessions regarding the median of hair caliber. The graph shows the gradual increase in the hair caliber after mesohair injection.	144
Fig. (61):	Comparison between baseline and 6 th month follow up in hair terminal/ vellus ratio. The graph shows increase in the hair terminal/ vellus ratio after mesohair injection.	147
Fig. (62):	Clinical photo of a 35 years old male AGA patient stage V (a) at the baseline and (b) 6 months after intradermal minoxidil injection	155
Fig. (63):	Clinical photo of a 29 years old male AGA patient in stage III vertex	156
Fig. (64):	Clinical photo of a 32 years old female AGA patient in stage III according to Ludwig classification	157
Fig. (65):	Clinical photo of a 25 years old male AGA patient stage II (a) at the baseline and (b) 6 months after intradermal mesohair injection	160

List of Figures (cont...)

Fig. No.	Title	Page No.
Fig. (66):	Clinical photo of a 32 years old female AGA patient (a) at the baseline and (b) 6 months after intradermal minoxidil injection showing significant hair regrowth in the vertex (c) Folliscopic image taken at the 1 st week before injecting mesohair in to the frontal area	161
Fig. (67):	Clinical photo of a 30 years old male AGA patient stage II	162
Fig. (68):	Comparison between the percent of change in hair density between 3 study groups among all sessions.	165

List of Abbreviations

Abb.	Full term
<i>A/T</i>	<i>Anagen / telogen</i>
<i>AA</i>	<i>Alopecia areata</i>
<i>AGA</i>	<i>Androgenetic alopecia</i>
<i>AR</i>	<i>Androgen receptor</i>
<i>bFGF</i>	<i>Basic fibroblast growth factor</i>
<i>CCCA</i>	<i>Central centrifugal cicatricial alopecia</i>
<i>CPA</i>	<i>Cyproterone acetate</i>
<i>DHT</i>	<i>Di hydrotestosterone</i>
<i>DLE</i>	<i>Discoid lupus erythematosus</i>
<i>DNA</i>	<i>Deoxyribonucleic acid</i>
<i>FDA</i>	<i>Food and Drug administration</i>
<i>FFA</i>	<i>Frontal fibrosing alopecia</i>
<i>FT</i>	<i>Frontotemporal</i>
<i>HS</i>	<i>Highly significant</i>
<i>ICAM</i>	<i>Intercellular adhesion molecules</i>
<i>IGF-1</i>	<i>Insulin like growth factor</i>
<i>IL-1</i>	<i>Interleukin 1 alpha</i>
<i>IL-2</i>	<i>Interleukin-2</i>
<i>IQR</i>	<i>Interquarile range</i>
<i>IRS</i>	<i>Inner root sheath</i>
<i>LPP</i>	<i>Lichen planopilaris</i>
<i>NS</i>	<i>Non-significant</i>
<i>ORS</i>	<i>Outer root sheath</i>

List of Abbreviations

Abb.	Full term
<i>S</i>	<i>Significant</i>
<i>SD</i>	<i>Standard deviation</i>
<i>T/V</i>	<i>Terminal / vellus</i>
<i>TE</i>	<i>Telogen effluviem</i>
<i>TGF-B 1</i>	<i>Transforming growth factor beta 1</i>
<i>TNFα</i>	<i>Tumor necrosis factor alpha</i>
<i>VEGF</i>	<i>Vascular endotheial growth factor</i>
<i>γIFN</i>	<i>Gamma interferon</i>
