Pneumatic Retinopexy Versus Scleral Buckling (Clinical And Experimental Study Of Anatomical And Functional Outcomes)

Thesis

**Submitted for Partial Fulfillment of M.D Degree in
Ophthalmology**

By

Mohammad Ahmad Rashad

M.Sc. (Ain Shams University)

Under Supervision of

Prof. Dr. Negm Eldin Helal Abd-Allah

Professor of Ophthalmology

Faculty of Medicine, Ain Shams University

Prof. Dr. Osama Raslan

Professor of Ophthalmology

Faculty of Medicine, Ain Shams University

Dr. Osama Salem

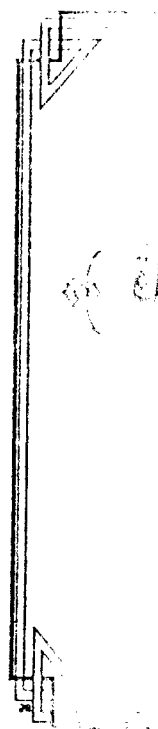

Assistant Professor of Ophthalmology

Faculty of Medicine, Ain Shams University

Ain Shams University

Faculty of Medicine

2000

of the

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

﴿ قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا إِلَّا مَا عَلَّمْتَنَا

إِنَّكَ أَنْتَ الْعَلِيمُ الْحَكِيمُ ﴾

صَدَقَ اللَّهُ الْعَظِيمُ

CONTENTS

	Page
• Introduction and Aim of the Work	1
• Review of Literature	5-103
- Factors favoring retinal adhesion and reattachment	5
- Pathogenesis of rhegmatogenous retinal detachment	15
- Effects and roles of scleral buckle and pneumatic retinopexy in retinal reattachment	40
- Techniques of scleral buckling and pneumatic retinopexy in the comparative studies	55
- Complications, anatomical and functional results of pneumatic retinopexy and scleral buckling	73
- Experimental work on retinal detachment	98
• Subjects and Methods	104
- Human (patients) study	104
- Animal (experimental) study	125
• Results	132
- Human study	132
- Animal study	182
• Discussion	190
- Human study	191
- Animal study	246
• Summary	252
• Conclusion	256
• References	259
• Arabic Summary.

Acknowledgement

Above all thanks to GOD

I would like to express my deepest gratitude to Dr. Negm Eldin Helal, Professor of Ophthalmology, Faculty of Medicine, Ain Shams University, for his experienced unlimited guidance, kind advice and continuous support throughout the work which enabled us to complete this thesis.

I am also more than grateful to Dr. Osama Raslan, Professor of Ophthalmology, Faculty of Medicine, Ain Shams University, for his hard effort and invaluable encouragement with kind support from the initial difficult steps to the last finishing steps.

I am especially deeply thankful to Dr. Osama Salem, Assistant Professor of Ophthalmology, Faculty of Medicine, Ain Shams University, for his constructive criticism and helpful contribution to success of this work.

I am also thankful to my senior staff and my colleagues. Also special thanks must go to Dr Ahmed Mohey Eldin, Assistant Professor of Pathology, Faculty of Medicine, Ain Shams University, for his valuable help in preparation, light microscopic examination and photography of the histopathological specimens.

LIST OF TABLES

Table No.		Page
1	Mean age of patients	132
2	Sex of patients	133
3	Mean duration of central vision loss (days)	133
4	Mean initial log MAR	134
5	Preoperative PVD	134
6	Preoperative PVR	135
7	Extent of retinal detachment	135
8	Preoperative characteristics of retinal breaks ..	137
9	Myopia more than six diopters	138
10	Mean axial length	138
11	Anatomic outcome	140
12	Causes of failure	142
13	Timing of retinal reattachment	143
14	Mean log MAR (2 months postoperatively)	143
15	Mean log MAR (6 months postoperatively)	144
16	Comparison of mean log MAR preoperatively, 2 and 6 months postoperatively in pneumatic retinopexy group.....	146
17	Comparison of mean log MAR preoperatively, 2 and 6 months postoperatively in scleral buckle group	147
18	Mean photostress test results 2 months postoperatively	149
19	Mean photostress test results 6 months postoperatively	149
20	Comparison of mean photostress test results 2 and 6 months postoperatively	151
21	Mean foveal threshold 2 months postoperatively	151

LIST OF TABLES (Cont.)

Table No.		Page
22	Mean foveal threshold 6 months postoperatively	152
23	comparison of mean foveal threshold 2 and 6 months postoperatively	153
24	Results of color vision test 2 and 6 months postoperatively	154
25	Relation between final photostress and BCVA	156
26	Relation between final foveal threshold and BCVA	156
27	Functional outcome of single operation success and reoperation success in pneumatic retinopexy group	157
28	Complications of both groups	163
29	Master table of scleral buckle group human eyes (1) preoperative characteristics	165
30	Master table of scleral buckle group human eyes (2): results at 2 and 6 months postoperatively	166
31	Master table of pneumatic retinopexy group human eyes (1) preoperative characteristics	167
32	Master table of pneumatic retinopexy group human eyes (2): results at 2 and 6 months postoperatively	168
33	Anatomic success of animal study	182
34	Timing of reattachment (animal study)	183
35	Histopathology of cryotherapy scar in both groups	184
36	Histopathologic response in relation to time of reattachment	184
