# **Investigation of The Dynamic Performance of Six-phase Induction Motors**

A thesis submitted for partial fulfillment of the  
requirements for the M.Sc. degree in Electrical Engineering

Submitted by:

**Eng. Mohamed Aref Mahmoud Abdelghani**

Supervised by:

**Prof. Dr. Hussien Faried El-sayed Soliman**

Faculty of Engineering  
Ain Shams University

**Associate Prof. Dr. Ayman Samy Abdel-Khalik**

Faculty of Engineering  
Alexandria University

**Dr. El-Hussein Abbas Mahmoud**

Department of Offshore Operation  
ADNOC Drilling

**Cairo, 2018**

## EXAMINERS COMMITTEE

**Name:** Mohamed Aref Mahmoud Abdelghani

**Thesis title:** Investigation of the dynamic performance of six-phase induction motors

**Degree:** Submitted in partial fulfillment of the requirements for the M.Sc. degree in Electrical Engineering

### **Name, Title and Affiliation**

### **Signature**

**Prof. Dr. Gaber Elsaady Ahmed Taha**  
Electrical Power and Machines Department  
Faculty of Engineering, Assiut University

**Prof. Dr. Hussien Faried El-sayed Soliman**  
Electrical Power and Machines Department  
Faculty of Engineering, Ain Shams University

**Prof. Dr. Ehab Ali Kamel El-Kharashy**  
Electrical Power and Machines Department  
Faculty of Engineering, Ain Shams University

**Associate Prof. Dr. Ayman Samy Abdel-Khalik**  
Electrical Power and Machines Department  
Faculty of Engineering, Alexandria University

## STATEMENT

This thesis is submitted to Ain Shams University in partial fulfillment of the requirements of Master of Science degree in Electrical Engineering.

The included work in this thesis has been carried out by the author at the department of electrical power and machines, Ain Shams University. No part of this thesis has been submitted for a degree or a qualification at any other university or institution.

Name:           Mohamed Aref Mahmoud Abdelghani

Signature:       .....

Date:                 /         / 2018

## **ACKNOWLEDGMENT**

The author would like to express his sincere gratitude and respect to Prof. Dr. Hussien Faried Soliman, Associate Professor Dr. Ayman Abdel-Khalik and Dr. El-Hussien Abbas for their guidance, continuous encouragement and generous help throughout the development of this work.

The fruitful discussions with Dr. El-Hussien Abbas during the course of this thesis are gratefully acknowledged and proved to be fully useful in helping me generate this thesis.

Acknowledgments are extended to Chairman of Electrical Power and Machines Department.

The author would also like to express his love, gratitude, and appreciation to his parents, sisters and friends for their endless love, encouragement, and patience during the course of this work and behind. They were the fuel that makes him move, and through the course, they represent the motive and the passion for me keeping on and finalizing my course successfully.

Mohamed Abdelghani

<b>EXAMINERS COMMITTEE.....</b>	<b>i</b>
<b>SUPERVISORS COMMITTEE.....</b>	<b>ii</b>
<b>STATEMENT.....</b>	<b>iii</b>
<b>ACKNOWLEDGMENT .....</b>	<b>1</b>
<b>CHAPTER 1 INTRODUCTION.....</b>	<b>18</b>
<b>CHAPTER 2 LITERATURE SURVEY .....</b>	<b>20</b>
2.1    Introduction .....	20
2.2    MPMS' advantages and applications .....	21
2.3    Asymmetric 6-phase Ind. M/C .....	23
2.4    Multi-phase drive control systems .....	25
2.4.1    Scalar control .....	26
2.4.2    Indirect field oriented control .....	32
2.4.3    Inverter.....	33
2.4.4    Pulse-width-modulation (PWM) .....	37
2.4.5    The conventional proportional integral (PI) controller.....	41
2.4.2    A survey on multi-phase drive control systems.....	43
2.5    Fault tolerant control .....	44
2.6    Torque enhancement using harmonic injection .....	45
2.7    Research objectives .....	47
<b>CHAPTER 3 .....</b>	<b>48</b>
<b>MACHINE MODELLING AND POST-FAULT CONTROL ...</b>	<b>48</b>
3.1    Introduction .....	48

3.2 Mathematical modeling of assymetrical 6-phase IM .....	50
3.3 Indirect field oriented control algorithm .....	54
3.4 Fault tolerance .....	58
3.4.1 Introduction.....	58
3.4.2 Fault effect on machine equations .....	59
3.4.3 Effect on torque equation .....	60
3.4.4 Post fault mode of operation.....	60
3.5 Summary .....	61
<b>CHAPTER 4 .....</b>	<b>62</b>
<b>PROPOSED CONTROLLER BASED ON FOPI .....</b>	<b>62</b>
4.1 Introduction .....	62
4.2 FOPI controller for current regulation .....	65
4.3 Summary .....	69
<b>CHAPTER 5 .....</b>	<b>70</b>
<b>SIMULATION AND RESULTS .....</b>	<b>70</b>
5.1 SIMULINK model of controller scheme .....	70
5.1.1 Indirect field oriented control sub-blocks .....	73
5.1.2 Forward clarke and park transformations .....	75
5.1.3 Rotor flux and angle calculation .....	76
5.1.4 Direct reference current calculation.....	77
5.1.5 Speed controller .....	79
5.1.6 Current regulator .....	80
5.1.7 Sinusoidal pulse-width-modulation SPWM and inverter	81
5.2 Results and discussion.....	82
5.2.1 Speed controller .....	83

5.2.2	Current controllers .....	83
5.2.3	Case studies.....	84
5.2.3.1	First casestudy.....	85
5.2.3.2	Second casestudy .....	96
5.2.3.3	Third casestudy .....	109
5.2.3.4	Fourth casestudy .....	115
5.3	Summary .....	121
<b>CHAPTER 6.....</b>		<b>122</b>
<b>CONCLUSION AND FUTURE WORK .....</b>		<b>122</b>
