## AKNOWLEDGEMENT

Thanks to Allah, Who enabled me to achieve this work. This work has been proposed, designed and supervised by Professor Dr. **S.T.M. Fahmy**, Professor of Animal Nutrition, Faculty of Agriculture, Minia University. I can hardly express my gratitude and appreciation to him for suggestions during the planing of this work, offering helpful advice, continuous investigation and writing the foreword.

I am deeply indebted to Dr. **H. A. Hassan** Professor Dr. of Animal Husbandry, Faculty of Agriculture, Minia University. For helping me in the investigation, suggestions in planing statistical analysis models and giving his comments.

Thanks are also due to Professor Dr. **M.A. Gabra**, head of Animal Nutrition department, Animal Production Research Institute, Agriculture Research Center, Professor of Animal Nutrition. I do highly appreciate his help, beginning of this work, proposing the research program and through writing the for ward.

Deepest thanks to Dr. **K. M. Marzouk** Associate Prfessor of Animal Husbandry, Faculty of Agriculture, Minia University who carried out the statistical analysis of this data and writing the foreword.

I am really very much obligated to Dr. **A.F. Aly** and Dr. **A.A. Ahmed** for their most kind and help to obtain Guar seeds.

I am deeply indebted to Dr. **M.K. Abd El-Aal**, Prof. of Horticulture, Faculty of Agriculture, Minia University, for his help to obtain the seeds of *Leucaena leucocephala* and it's cultivation.

Finally, I would like to express my gratitude to my family especially my wife, unclès **Mohammed** and **Ahmed Mahmoud** for their help and encouragement.

<b>I- INTRODUCTION</b>	<b>1</b>
<b>II- REVIEW OF LITERATURE</b>	<b>3</b>
<b>A. The <i>Leucaena leucocephala</i> L.m</b>	<b>3</b>
1- The plant	3
2- Palatability and toxicity of leucaena for ruminants	4
3- Proximate analysis	9
4- Digestibility coefficient and nutritive value	10
5- Nitrogen balance	12
6- Rumen fermentation	13
6-1- Ruminal concentration of ammonia	13
6-2- Ruminal concentration of total volatile fatty acids (TVFA'S)	15
7- Growth performance	16
7-1- Feed intake	16
7-2- Daily gain	17
7-3- Feed conversion	20
8- Degradability	21
<b>B- Guar plants (<i>Cyamopsis tetragonoloba</i>. L)</b>	<b>23</b>
1- The plant	23
2- Proximate analysis	23
3- Digestibility coefficients and nutritive value	25
4- Nitrogen balance	30
5- Rumen fermentation	32
5-1- Ruminal concentration of ammonia	32
5-2- Ruminal concentration of total volatile fatty acids (TVFA's)	33
6- Growth Performance	34
6-1- Feed intake	34
6-2- Daily gain	36
6-3- Feed conversion	37
7- Degradability	39
<b>III- MATERIALS AND METHODS</b>	<b>41</b>
1- The Field Experiments	41
A- <i>Leucaena</i> ( <i>Leucaena leucocaphala</i> L.) preparing land, sowing leucaena seeds for cultivation, harvesting system and hay processing	41
B- Guar ( <i>Cyamopsis tetragonoloba</i> L.) preparing land, sowing Guar seeds for cultivation, harvesting system and hay processing	42
2- Preparing plant samples for laboratory analysis	42
3- Digestibility experiments	42
4- Rumen fermentation studies	45
4-1- Rumen liquor collection	45
4-2- Rumen degradability studies	46

	Page
5- Blood sample	46
6- Growth performance experiments	46
6-A- Leucaena hay as forage in growing lambs ration	46
6-B- Guar hay as forage in growing lambs ration	47
7- Methods of laboratory proximate analysis	47
8- Statistical analysis	48
<b>V- RESULTS</b>	<b>53</b>
A- Inclusion of leucaena ( <i>leucaenaa leucocaphala</i> ) in sheep feeds	53
1- Proximate analysis of the experimental rations	53
2- Digestibility coefficients, nutritive value and N-balance	60
2-1- Digestibility coefficients of leucaena containing rations	60
2-2- Nutritive value	63
2-3- Nitrogen balance	65
3- Plasma-triiodothyronine (Th3) and thyroxine (Th4) concentrations ng/ml for sheep fed different proportions of LH (0, 25, 50, 75 and 100 %)	68
4- Rumen activity studies:	76
- Ammonia and total volatile fatty acids concentrations in rumen liquor of rams fed rations containing different proportions of LH	76
5- Growth performance and feed conversion experiment	80
B- Inclusion of guar ( <i>Cyamopsis tetragonoloba</i> ) in sheep Feeds:	82
1- Proximate analysis	82
1-1- Proximate analysis of guar plant ( <i>Cyamopsis                     tetragonoloba Lm.</i> ) as green forage after 6, 12 and 15 weeks from cultivation	82
1-2- Proximate analysis of the experimental rations	85
2- Digestibility coefficients, nutritive value and N-balance	90
2-1- Digestibility coefficients of guar containing rations	90
2-2- Nutritive value	93
2-3- Nitrogen balance	95
3- Rumen activity studies	98
3-1- Ammonia and total volatile fatty acids in rumen liquor of rams fed rations containing different proportions of guar hay	98
4- Growth performance and feed conversion experiment	101
5- Degradability	103
5-1- Degradability of leucaena hay	103
5-2- Degradability of guar hay	105
<b>VI- DISCUSSION</b>	<b>108</b>
A- Inclusion of leucaena ( <i>Leucaena leucocaphala</i> ) in sheep feeds	108
1- Proximate analysis of the experimental rations	108
2- Digestibility coefficients, feeding value and N-balance	109

2-1- Digestibility coefficients of Leucaena containing rations	109
2-2- Nutritive value	112
2-3- Nitrogen balance	113
3- Plasma-triiodothyronine (Th3) and thyroxine (Th4) concentrations ng/ml for sheep fed different proportions of LH (0, 25, 50, 75 and 100 %)	114
4- Rumen activity studies	114
- Ammonia and Total volatile fatty acids in the rumen liquor of rams fed rations containing different proportions of LH	114
5- Growth performance and feed conversion experiment	116
B- Inclusion of guar ( <i>Cyamopsis tetragonoloba</i> ) in sheep feeds:	118
1- Proximate analysis	118
1-1- Proximate analysis of guar plant ( <i>Cyamopsis tetragonoloba</i> Lm.) as green forage after 6, 12 and 15 weeks from cultivation	118
1-2- Proximate analysis of the experimental rations	119
2- Digestibility coefficients, feeding values & N-balance	120
2-1- Digestibility coefficients of guar containing rations	120
2-2- Nutritive value	122
2-3- Nitrogen balance	123
3- Rumen activity studies	124
- Ammonia and total volatile fatty acids in the rumen liquor of rams fed rations containing different proportions of GH	124
4- Growth performance and feed conversion	125
5- Degradability	127
- Degradability of leucaena hay and guar hay	127
SUMMARY	128

ARABIC SUMMARY	

## LIST OF TABLES

Table no.	Content	Page no.
1	Proximate analysis of ingredients used to formulate the experimental rations on (DM basis %)	54
2	The formulation and proximate analysis of tested rations containing different proportions of leucaena hay, consumed in the digestibility experiments (on DM basis)	57
3	Total dry matter (DM), crude protein (CP) and crude fiber (CF) consumed (g/day) from the different experimental rations	59
4	The least square means $\pm$ standard error (L.S.M $\pm$ SE) of digestibility coefficients of the experimental rations containing different proportions of LH	61
5	Least square means $\pm$ standard error (L.S.M $\pm$ SE) for Nutritive values of the experimental rations containing different levels of LH	64
6	Least square means $\pm$ standard error (L.S.M $\pm$ SE) for nitrogen balance (g/day) of the experimental rations containing different proportions of LH	66
7	Least square means $\pm$ standard error (L.S.M $\pm$ SE) of plasma triiodothyronine (Th3) and thyroxine (Th4) concentrations ng/ml for rams fed different proportions of LH (0, 25, 50, 75 and 100 %)	69
8	Least square means $\pm$ standard error (L.S.M. $\pm$ SE) of ammonia concentrations mg/dl and total VFA's ml equivalent/dl R.L of rams fed rations containing different proportions of LH	77
9	Least square means $\pm$ standard error (L.S.M. $\pm$ SE) of ammonia concentrations mg/dl and TVFA's ml equivalent /dl R.L of rams fed rations containing LG and LH alone	79
10	Least square means $\pm$ standard error (LSM $\pm$ SE) of growth performance of lambs fed different proportions of Leucaena hay LH 0, 25, 50 and 75% as a replacer to concentrate feed mixture for 90 days	81

Table no.	Content	Page no.
11	The proximate analysis of guar plants ( <i>Cyamopsis tetragonoloba</i> Lm.) at different ages 6, 12 and 15 weeks from planting.....	83
