

STUDIES ON CONCENTRATED MILKS

By

ABEER FOUAD ZAYAN

B.Sc. Agric. Sc. (Dairy Science & Technology), Ain Shams University, 1990

M.Sc. Agric. Sc. (Dairy Science & Technology), Ain Shams University, 1997

**A thesis submitted in partial fulfillment
of
the requirements for the degree of**

DOCTOR OF PHILOSOPHY

in

**Agricultural Science
(Dairy Science and Technology)**

**Food Science Department
Faculty of Agriculture
Ain Shams University**

2005

Approval Sheet

STUDIES ON CONCENTRATED MILKS

By

ABEER FOUAD ZAYAN

B.Sc. Agric. Sc. (Dairy Science & Technology), Ain Shams University, 1990

M.Sc. Agric. Sc. (Dairy Science & Technology), Ain Shams University, 1997

This thesis for Ph.D. degree has been approved by:

Prof. Dr. Nihal Ibrahim Ezzat.....

Prof. of Dairy Science & Technology, Faculty of Agriculture,
Alexandria University.

Prof. Dr. Abdel-Hamid Aboel-Hasan Askar.....

Prof. Emeritus of Dairy Science & Technology, Faculty of
Agriculture, Ain Shams University.

Prof. Dr. Lotfy Fahmi Hamzawi

Prof. of Dairy Science & Technology, Faculty of Agriculture,
Ain Shams University.

Prof. Dr. Mohamed Abdallah Hofi

Prof. of Dairy Science & Technology, Faculty of Agric., Ain
Shams University.

Date of Examination : 18/05/ 2005

STUDIES ON CONCENTRATED MILKS

By

ABEER FOUAD ZAYAN

B.Sc. Agric. Sc. (Dairy Science & Technology), Ain Shams University, 1990

M.Sc. Agric. Sc. (Dairy Science & Technology), Ain Shams University, 1997

Under the supervision of :

Prof. Dr. Mohamed Abdallah Hofi

Prof. of Dairy Science & Technology, Food Science Dep.,
Faculty of Agriculture, Ain Shams University (Principal
Supervisor)

Prof. Dr. Lotfy Fahmi Hamzawi

Prof. of Dairy Science & Technology, Food Science Dep.,
Faculty of Agriculture, Ain Shams University

CONTENTS

	Page
INTRODUCTION.....	1
REVIEW OF LITERATURE.....	3
1. Evaporated milk.....	3
2. Condensed milk	4
2.1. Production of in-can sterilized concentrated milk.....	5
2.2. Production of long life concentrated milk using membrane technology.....	6
3. Physico-chemical properties of concentrated milk	9
3.1. Heat stability.....	9
4. Rheological properties of concentrated milk.....	15
5. Faults of concentrated milk.....	21
5.1. Age gelation	21
5.2. Browning of concentrated milk.....	23
6. Stability during storage of concentrated milk.....	24
7. Additives.....	27
7.1. Fructose.....	27
7.2. Fat replacer	28
7.2.1. Carbohydrate-based fat mimetics	29
7.2.2. Protein-based fat mimetics	30
7.2.3. Fat-based substitutes	31
7.2.4. Regulation of fat replacers.....	32
7.2.5. Safety of fat replacers.....	33
7.2.6. Utility of fat replacers.....	33
7.2.7. Dairy-Lo.....	38
8. Microstructure of heat treated concentrated milk.....	39
MATERIAL AND METHODS.....	
1. Materials.....	40
1.1. Whole milk.....	40
1.2. Skim milk.....	40

	Page
1.3. Fructose.....	40
1.4. Dairy-Lo.....	40
1.5. ALACOPALS.....	40
2. Methods of Analysis.....	40
2.1. Whole milk, skim milk, whole concentrate, skim concentrate, diafiltrated whole and skim milk analysis.	40
2.1.1. Determination of total solids	40
2.1.2. Determination of lactose.....	41
2.1.3. Determination of fat.....	41
2.1.4. Determination of titratable acidity.....	41
2.1.5. The measurement of pH.....	
2.1.6. Determination of total nitrogen, non protein nitrogen and non casein nitrogen.....	
2.1.7. Determination of ash content	41
2.1.8. Determination of phosphorus	41
2.1.9. Determination of calcium.....	42
2.1.10. Determination of hydroxymethyl furfural.....	42
2.1.11. Determination of available lysine.....	43
2.1.12. Determination of viscosity	43
2.1.13. Determination of heat stability	43
2.1.14. Determination of ethanol stability.....	43
2.1.15. Determination of browning	44
2.1.16. Age gelation.....	44
2.1.17. Microstructure of milk types.....	44
2.1.18. Sensory evaluation.....	45
2.1.19. Statistical analysis.....	45
2.2. Membrane processing	45
2.3. Preparation of concentrated milk.....	45
2.4. Production of in-bottle sterilized concentrated milk.....	46

	Page
2.4.1. Ultrafiltered concentrate.....	46
2.4.2. Degree of concentration.....	46
2.4.3. Diafiltrated concentrate.....	46
2.4.4. Addition of fructose and fat replacers	47
3. Rapid grading test of milk for colour changes by heat treatment.....	47
RESULTS AND DISCUSSION.....	52
PART I: Production of in-bottle sterilized ultrafiltered concentrated buffaloes milk.....	52
1.1. Overall composition and properties of concentrates.....	52
1.2. Degree of concentration.....	54
1.3. Effect of ultrafiltration process.....	54
1.3.1. Effect of UF process on calcium and phosphate	54
1.3.2. Effect of ultrafiltration process on nitrogen distribution.....	56
1.3.3. Effect of ultrafiltration process on pH and acidity....	56
1.3.4. Effect of ultrafiltration process on viscosity and specific gravity.....	58
1.3.5. Effect of ultrafiltration process on heat and ethanol stability.....	60
1.3.6. Effect of ultrafiltration process on available lysine...	60
1.4. Effect of sterilization process	62
1.4.1. Effect of sterilization process on calcium and phosphorus.....	62
1.4.2. Effect of sterilization process on nitrogen distribution.....	62
1.4.3. Effect of sterilization process on pH and acidity.....	65
1.4.4. Effect of sterilization process on viscosity and specific gravity.....	67
1.4.5. Effect of sterilization process on heat stability and ethanol	67

	Page
1.4.6. Effect of sterilization on available lysine	69
1.4.7. Effect of sterilization process on HMF.....	71
1.4.8. Effect of sterilization process on milk colour.....	73
1.5. Changes during storage of in-bottle sterilized UF concentrated milk.....	75
1.5.1. Changes in calcium and phosphorus during storage..	80
1.5.2. Changes in pH and titratable acidity during storage	80
1.5.2.1. pH.....	80
1.5.2.2. Titratable acidity.....	83
1.5.3. Changes in viscosity during storage.....	83
1.5.4. Changes in heat and ethanol stability during storage.	88
1.5.4.1. Changes in ethanol stability during storage.....	88
1.5.4.2. Change in heat stability during storage.....	91
1.5.5. Gelation.....	94
1.5.6. Changes in available lysine during storage.....	96
1.5.7. Changes in HMF during storage.....	99
1.5.8. Changes in colour during storage of in-bottle sterilized concentrated milk.....	99
1.5.9. Changes in microstructure of in-bottle sterilized concentrated milk during storage.....	103
PART II: Production of in-bottle sterilized diafiltered concentrated buffaloes milk (low lactose and high protein concentrates).....	107
2. Production of in-bottle sterilized diafiltered buffaloes concentrates	107
2.1. Overall composition and properties of concentrates.....	107
2.2. Effect of diafiltration process on physicochemical properties of buffaloes concentrates.....	109
2.2.1. Effect of diafiltration process on soluble calcium and soluble phosphorus.....	109

	Page
2.2.2. Effect of diafiltration process on nitrogen distribution of UF whole skim concentrated buffaloes milk.....	111
2.2.3. Effect of diafiltration process on pH value and titratable acidity.....	111
2.2.4. Effect of diafiltration process on viscosity and specific gravity.....	111
2.2.5. Effect of diafiltration process on heat & ethanol stability.....	114
2.3. Effect of diafiltration process on the changes in physicochemical properties of buffaloes milk as a function of sterilization of concentrated milk	114
2.3.1. Effect of diafiltration process on changes in soluble calcium and phosphorus as a function of sterilization	114
2.3.2. Effect of diafiltration process on the changes in nitrogen distribution of buffaloes milk as a function of sterilization.....	
2.3.3. Effect of diafiltration process on the changes in pH value and titratable acidity as a function of sterilization of ultrafiltered whole and skim buffaloes milk concentrates.....	116
2.3.4. Effect of diafiltration process on the changes in viscosity and specific gravity as a function of sterilization of ultrafiltered whole and skim buffaloes milk concentrates.....	119
2.3.5. Effect of diafiltration process on the changes in ethanol and heat stability as a function of sterilization of ultrafiltered whole and skim buffaloes milk concentrates.....	119

	Page
2.3.6. Effect of diafiltration process on the changes in available lysine as a function of sterilization of ultrafiltered whole and skim buffaloes milk concentrates.....	122
2.3.7. Effect of diafiltration process on the changes in hydroxymethyl furfural as a function of sterilization of ultrafiltered whole and skim buffaloes milk concentrates.....	122
2.3.8. Effect of applying diafiltration on the colour of UF and DF concentrates as a function of sterilization	124
2.4. Changes in diafiltered sterilized concentrated milk during storage.....	124
2.4.1. Effect of applying diafiltration process on the changes in soluble calcium and phosphorus of UF concentrated skim and whole buffaloes milk during storage under ambient and cold storage.....	124
2.4.2. Effect of applying diafiltration process on the changes in pH and titratable acidity of UF concentrated skim and whole buffaloes milk during storage under ambient and cold storage.....	130
2.4.3. Effect of applying diafiltration process on changes in viscosity of UF concentrated skim and whole buffaloes milk during storage under ambient and cold storage.....	130
2.4.4. Effect of applying diafiltration process on the changes in heat and ethanol stability of UF concentrated skim and whole buffaloes milk storage under ambient and cold during storage.....	137
2.4.5. Changes in the available lysine during storage of DF and UF concentrated milk.....	137

	Page
2.4.6. Changes in hydroxymethyl furfural (HMF) during storage of DF and UF concentrated milk.....	145
2.4.7. Changes in colour during storage of in-bottle sterilized concentrated milk.....	145
PART III: Effect of adding fructose and fat replacers on the quality of in-bottle sterilized UF and DF concentrated buffaloes skim milk.....	149
3. Effect of adding fructose and fat replacers on the quality of in-bottle sterilized UF and DF concentrated buffaloes skim milk during storage.....	
3.1. Effect of adding fructose and fat replacers on the organoleptic properties of in-bottle sterilized UF and DF concentrated buffaloes skim milk during storage...	150
3.1.1. Effect of adding different levels of fructose on the sensory evaluation.....	151
3.1.1.1. Effect of adding fructose on colour.....	151
3.1.1.2. Effect of adding fructose on flavour.....	153
3.1.1.3. Effect of adding fructose on total score.....	155
3.1.2. Effect of adding different levels of fat replacers on sterilized UF and DF concentrated skim milk.....	155
3.1.2.1. Effect of Dairy-Lo and ALACOPALS on the colour of sterilized UF and DF concentrated skim milk during storage.....	157
3.1.2.2. Effect of adding fat replacers on flavour.....	157
3.1.2.3. Effect of adding fat replacers of total score.....	160
3.2. Effect of adding fructose and Dairy-Lo on chemical, physical and rheological properties of UF and DF concentrated skim milk during storage at 5°C.....	162
3.2.1. Soluble calcium.....	162
3.2.2. Soluble phosphorus.....	162

	Page
3.2.3. pH values.....	167
3.2.4. Titratable acidity	170
3.2.5. Ethanol stability.....	173
3.2.6. Heat stability.....	176
3.2.7. Apparent viscosity	179
3.2.8. Gelation	182
3.2.9. Available lysine.....	182
3.2.10. Hydroxymethyl furfural and Maillard reaction.....	186
3.2.11. Effect of concentration and using Dairy-Lo and fructose on microstructure of sterilized milk.....	189
3.2.12. Effect of storage period on microstructure of sterilized milk.....	190
SUMMARY AND CONCLUSION.....	196
REFERENCES.....	208
ARABIC SUMMARY.....	

LIST OF TABLES

Table No.		Page
Table (1)	Chemical composition of whole and skim buffaloes milk and resulted concentrates.....	53
Table (2)	Degree of concentration and quantity of whole and skim buffaloes milk required to produce 100 kg milk concentrates.....	55
Table (3)	Effect of concentrations by ultrafiltration on soluble calcium and phosphorus of whole and skim buffaloes milk.	55
Table (4)	Effect of concentration by ultrafiltration on nitrogen distribution of whole and skim buffaloes milk	57
Table (5)	Effect of concentration by ultrafiltration on pH value and titratable acidity of whole and skim buffaloes milk.	57
Table (6)	Effect of concentration by ultrafiltration on viscosity and specific gravity of whole and skim buffaloes milk.....	59
Table (7)	Effect of concentration by ultrafiltration on ethanol and heat stability of whole and skim buffaloes milk.....	61
Table (8)	Effect of UF concentration on available lysine of whole and skim buffaloes milk	61
Table (9)	Effect of sterilization process on soluble calcium and phosphorus of buffaloes milk and UF concentrate.....	63
Table (10)	Effect of sterilization on nitrogen distribution of UF concentrated milk.....	64
Table (11)	Effect of sterilization process on pH value and acidity of buffaloes milk and UF concentrates.....	65

Table No.		Page
Table (12)	Effect of sterilization process on viscosity and specific gravity of buffaloes milk and UF concentrates.....	68
Table (13)	Effect of sterilization process on ethanol and heat stability of buffaloes milk and UF concentrates....	68
Table (14)	Effect of sterilization process on available lysine of buffaloes milk and UF concentrates.....	70
Table (15)	Effect of sterilization process on hydroxymethyl furfural (HMF) of sterilized whole and skim buffaloes milk concentrates.....	72
Table (16)	Changes in soluble calcium (mg/L) of in-bottle sterilized UF concentrated buffaloes milk during storage at ambient (light or dark) and cold storage (5°C).....	76
Table (17)	Changes in the soluble phosphorus (mg/L) of in-bottle sterilized UF concentrated buffaloes milk during storage at ambient (light or dark) and cold storage (5°C).....	78
Table (18)	Changes in pH value of in-bottle sterilized UF concentrated buffaloes milk during storage at ambient (light or dark) and cold storage (5°C).....	81
Table (19)	Changes in titratable acidity (%) of in-bottle sterilized UF-concentrated buffaloes milk during storage at ambient (light or dark) and cold storage (5°C).....	84
Table (20)	Change in viscosity (cp) of in-bottle sterilized UF concentrated buffaloes milk during storage at ambient (light or dark) and cold storage (5°C).....	86
Table (21)	Changes in ethanol stability %(V/V) of in-bottle sterilized UF concentrated buffaloes milk during storage at ambient (light or dark) and cold storage (5°C).....	89

Table No.		Page
Table (22)	Changes in heat stability (120°C/min) of in-bottle sterilized UF concentrated buffaloes milk during storage at ambient (light or dark) and cold storage (5°C).....	92
Table (23)	Assessment of gelation of in-bottle sterilized UF concentrated buffaloes milk during storage at ambient (light or dark) and cold storage (5°C).....	95
