

***Geochemical Studies Of The
Groundwater In North-East Sinai
Area, Egypt***

Thesis
Submitted to
Faculty of Science
Ain Shams University

For
Ph.D. Degree in Chemistry

By
Yahia Ragab Abd El Azym Gedamy
B.Sc., Chemistry (1987)
M.Sc., Chemistry (1996)

Desert Research Center
Egypt

2004

***GEOCHEMICAL STUDIES OF THE GROUNDWATER
IN NORTH-EAST SINAI AREA, EGYPT***

Thesis advisors:

Approved

Prof. Dr. M. S. Abdel Mottaleb

Prof. Dr. M. K. Sallouma

Assoc. Prof. M. H. El Sayed

**Head of
Chemistry Department**

Prof. Dr. M. A. A. El-Kasaby

ACKNOWLEDGMENT

All the infinite deepest thanks and gratitude to my GOD who guided me and provide all facilities to finish this work.

The author would like to express his great and sincere thanks to ***Prof. Dr. M. S. Abd El Mottalib***, prof. of inorganic and analytical chemistry, Chemistry Dept., Fac. of Sci., Ain Shams univ., for continuous supervision and guidance throughout the implementation of this work.

The author wishes to extend his sincere appreciation to ***Prof. Dr. M. K. Sallouma***, prof. of hydrogeochemistry, Hydrogeochemistry Dept., Desert Research Center, for planning, supervision, effective guidance, and valuable discussion throughout the whole work and also for his continuous efforts to accomplish this thesis. Actually, the author is deeply indebted to him.

Deep thanks and appreciation gratitude are also expressed to ***Dr. M. H. El Sayed***, Ass. Prof. of hydrogeochemistry, Hydrogeochemistry Dept., Desert Research Center, for suggesting and follows up the point of this research, for full support, encouragement, editorial advice, and facilitating the research program.

Sincere thanks and gratitude are also due to ***Prof. Dr. S. El Demerdashe***, Prof. of soil chemistry and mineralogy, Desert Research Center, whose friendship and continuous help are appreciated.

Many thanks to all my colleagues in the Desert Research Center, especially those in the Hydrogeochemistry Dept.

LIST OF FIGURES

Figure No.		Page No.
1	Key map of the study area.....	2
2	Location map of the study area.....	4
3	Isohyetal map for Sinai Peninsula.....	17
4	Piche evaporation intensity map of Sinai Peninsula.....	19
5	Geomorphological map of North-East Sinai.....	39
6	Geological map of North-East Sinai.....	43
7	Structural zones of the Sinai Peninsula....	47
8	The areal distribution of the different aquifers in the study area.....	49
9	The logs of wells tapping the alluvium aquifer in El Qusayima locality.....	53
10	Water table map of the marine and alluvium aquifers in study area	54
11	Hydrogeological cross section from West to East (El Masaid-Gaza).....	55
12	Hydrogeological cross section from South to North (El Goura-El Sheikh Zuwayid)..	56
13	Water table map for the alluvium and fractured limestone aquifers in El-Qusayima locality.....	57
14	Water table map of Pleistocene continental and marine aquifers in El-Arish-Rafah area and its southern parts.....	62
15	The logs of wells tapping the fractured limestone aquifer.....	65
16	Surface section of El Gedeirat spring.....	66
17	Surface section of Qadeis spring.....	67

LIST OF FIGURES (cont.)

Figure No.		Page No.
18	The lithologic description of Umm Sheihan well.....	71
19	The lithologic description of El Amr well.	72
20	The lithologic description of El Monbatih well.....	73
21	The logs of shallow wells tapping the Nubian sandstone aquifer.....	74
22	The log of deep well tapping the Nubian sandstone aquifer.....	75
23	Water table map of the Nubian sandstone (shallow wells) aquifer in wadi El Hadira.	76
24	Samples sites map tapping the sand dunes aquifer at East Arish-Rafah coastal plain..	81
25	Frequency distribution of water salinity according to ionic strength of the sand dunes aquifer at east El Arish-Rafah coastal plain.....	84
26	Iso-salinity contour map of the sand dunes aquifer at East El Arish-Rafah coastal plain.....	85
27	The closed system conditions with respect to CO ₂ gas of the groundwater of sand dunes aquifer (East El Arish-Rafah coast).	93
28	Iso-silica contour map of the sand dunes aquifer at East El Arish-Rafah coastal plain.....	97
29	Iso-total hardness contour map of the sand dunes aquifer at East El Arish-Rafah coastal plain.....	112

LIST OF FIGURES (cont.)

Figure No.		Page No.
30	Iso-permanent hardness contour map of the sand dunes aquifer at East El Arish-Rafah coastal plain.....	114
31	Iso-temporary hardness contour map of the sand dunes aquifer at East El Arish-Rafah coastal plain.....	116
32	Frequency distribution of major ions in groundwater samples of the sand dunes aquifer.....	119
33	Iso-sodium contour map of the sand dune aquifer at East El Arish-Rafah coastal plain.....	126
34	Iso-chloride contour map of the sand dunes aquifer at East El Arish-Rafah coastal plain.....	127
35	Iso-sulfate contour map of the sand dunes aquifer at East El Arish-Rafah coastal plain.....	128
36	Iso-Calcium contour map of the sand dune aquifer at East El Arish-Rafah coastal plain.....	129
37	Iso-magnesium contour map of the sand dune aquifer at East El Arish-Rafah coastal plain.....	130
38	Iso-bicarbonate contour map of the sand dunes aquifer at East El Arish-Rafah coastal plain.....	131
39	Bar graphs representing groundwater samples of the sand dunes aquifer at East El Arish-Rafah coastal plain area.....	141

LIST OF FIGURES (cont.)
