بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

مَثَلُ الَّذِينَ يُنْفِقُونَ أَمْوَالَهُمْ فِي
سَبِيلِ اللَّهِ كَمَثَلِ حَبَّةٍ أَنْبَتَتْ سَبْعَ
سَنَابِلَ فِي كُلِّ سُنبُلَةٍ مِائَةٌ حَبَّةٌ
وَاللَّهُ يُضَاعِفُ لِمَنْ يَشَاءُ وَاللَّهُ
وَاسِعٌ عَلِيمٌ

Dedication

To beloved my Father, Mother, and Sisters

To My GOD Father Pro.Dr.Ihab Nadim

*To my lovely persons who present in my life by
their souls and their positive footprints...*

Acknowledgment

First and above all, I praise God for providing me this opportunity, blessing me the capability to complete this work and granting me the necessary wisdom that aided the design, execution and final presentation of this thesis.

I owe an immense debt of gratitude to my supervisors. I'm grateful to my 1st supervisor Prof. Dr. Ihab Nadim, Professor of economics in the faculty of Commerce, Ain Shams University, for his expertise, spiritual motivation, advises and kindness. He is my GOD Father.

Thank you for being the role model to us personally, academically, and scientifically. GOD protect You My Gentle Professor.

I am equally grateful to my fabulous 2nd supervisor A.Prof.Eman Hashem, Associate Professor of Economics, Faculty of Commerce, Ain Shams University, you are not only my supervisor, you are my grand sister.

Thanks a lot for all your time and efforts with me in my thesis and your continuous encouragement, valuable comments, patience and your care to do the best work .You are one of my blesses in this part of my life.

I would like to thank Prof. Dr. Abeer Farhat Professor of Economics and Head of Economics Department - Ain shams University, for her devotion of time and energy to read and discuss this thesis. Her comments added value to my thesis which is my honor.

I would like to thank A.Professor Dr. Ashraf Helmy Salama, Associate Professor of Economics and Head of Financial Institutions Department in Modern University, for kindly accepting to participate in the discussion and evaluation of this work in addition to being very welcoming and being interested to read the thesis well to improve its value.

I am deeply grateful to the beloved people in my life, those whose existence makes my life meaningful. I would like to thank all my friends who contributed to this work in all ways of assistance.

Finally, I warmly thank and appreciate my Big Family for its support and its confidence on me .

No thanks can be enough for my small family “ My father, My Mother, and My sisters”. It endured all my stressful moments with love and

*care. I hope that I can compensate you and be
source of your honor. Really, I'm very grateful
"For Everything" you did.*

May God be our Guide

List of Contents:

General Framework	A-N
Part One : The Global Climate Change and Human Capital	
Overview	1
Chapter One: The overview of the concept of Global Climate Change and Human Capital	
1.1 Introduction	3
1.2 Climate Change	4
1.2.1 What the Climate Change is	4
1.2.1.1 Temperature	4
1.2.1.2 Rainfall	5
1.2.1.3 Drought	5
1.2.1.4 Currents	6
1.2.1.5 Sea Level	6
1.2.1.6 Tropical Cyclone	7
1.2.1.7 The temperature change in polar zones and ice-spheres	7
1.2.2 The main features of Climate Change	7
1.2.2.1 Climate Change is a global phenomenon	7
1.2.2.2 Climate Change is a continuous and long term phenomenon, with a high level of uncertainty	8
1.2.2.3 Climate Change implies a high level of risk	8
1.2.3 The Global Climate Change's causes	9
1.2.3.1 Carbon Dioxide	10
1.2.3.2 Methane	11
1.2.3.3 Nitrous Oxide	12
1.2.4 The measurement of the environmental efforts	13
1.3 Human Capital	14
1.3.1 The development of Human Capital concept	14
1.3.2 The components of Human Capital	15

1.3.2.1 Health	15
1.3.2.2 Education	15
1.3.2.3 Education and Health as joint investment for development	16
1.3.3 The measurement of Human Capital	18
1.3.3.1 The Education pillar	18
1.3.3.2 The Health and Wellness pillar	19
1.3.3.3 The Workforce and Employment pillar	19
1.3.3.4 The Enabling Environment pillar	19
1.4 Summary of chapter one	21
 Chapter Two: The effects of Global Climate Change on Human Capital	
2.1 Introduction	22
2.2 How the Climate Change affects Human Capital	23
2.2.1 Health	24
2.2.1.1 The Disability Adjusted Life Year (DALYs)	26
2.2.1.2 Mortality rate of children under-5	27
2.2.1.3 Nutrition status of children under-5	28
2.2.1.4 People dead and affected by natural disaster	30
2.2.2 Education	32
2.2.2.1 Using improved facilities for water/sanitation	33
2.2.2.2 The effects on the schools	35
2.3 Summary of Chapter Two	42
Summary of Part One	43
 Part Two: Singapore's Climate change and Human Capital	
Overview	44
 Chapter Three: Singapore's climate change and its efforts to face it	
3.1 Introduction	46

3.2 The features of Climate Change in Singapore	47
3.2.1 Sea level rise	47
3.2.2 Rainfall	48
3.2.3 Flood	49
3.2.4 Temperatures	51
3.2.4.1 Carbon dioxide	52
3.2.4.2 Methane	54
3.2.4.3 Nitrous oxide	55
3.2.5 Drought	56
3.3 Singapore government's efforts related to climate change	57
3.3.1 Singapore's international collaborate related to climate change	58
3.3.2 National efforts related to climate change	59
3.3.2.1 The government institutions	59
3.3.2.2 The policies and plans	60
3.4 Evaluation of Singapore government's efforts related to climate change	67
3.4.1 CO ₂ per \$1 GDP	68
3.4.2 CO ₂ emissions per KWh electricity generation	70
3.5 Summary of the chapter three	71

Chapter Four: The effects of global Climate Change on Human Capital in Singapore

4.1 Introduction	73
4.2 The indicators measuring the impacts of climate change on human health	74
4.2.1 Disability-adjusted life years (DALYs)	74
4.2.2 Mortality rate of children under-5 age	76
4.2.3 Nutrition status of children under-5 age	78
4.2.4 Natural disasters impacts on people	81
4.3 The indicators measuring the impacts of climate change on education	85
4.3.1 Improved facilities for water/sanitation	86
4.3.2 The effects on the schools	90

4.4 Summary of chapter four	93
Summary of Part Two	95
Part Three: Egypt's Climate Change and Human Capital	
Overview	96
Chapter Five: Egypt's climate change and its efforts to face it.	
5.1 Introduction	98
5.2 The features of Climate Change in Egypt	99
5.2.1 Sea level rise	99
5.2.2 Rainfall	101
5.2.3 Flood	101
5.2.4 Temperatures	103
5.2.4.1 Carbon dioxide	104
5.2.4.2 Methane	105
5.2.4.3 Nitrous oxide	106
5.2.5 Drought	107
5.2.6 Sand storms and Thunderstorm	108
5.3 Egyptian government's efforts related to climate change	109
5.3.1 International efforts related to climate change	110
5.3.2 National efforts related to climate change	112
5.3.2.1 The institutions related to the environment	112
5.3.2.1.1 The government institutions	112
5.3.2.1.1.1 The direct Government institutions	112
5.3.2.1.1.2 The indirect Government institutions	113
5.3.2.1.2 Non-government organizations	113
5.3.2.2 The Plans and Projects	114
5.4 Evaluation of Egyptian government's efforts related to climate change	117
5.4.1 CO₂ per \$1 GDP	119
5.4.2 CO₂ emissions per electricity generation	119
5.5 Summary of chapter five	121

Chapter Six: The effects of global Climate Change on Human Capital in Egypt

6.1 Introduction	123
6.2 The indicators measuring the impacts of climate change on human health	124
6.2.1 Disability-adjusted life years (DALYs)	124
6.2.2 Mortality rate of children under-5 age	126
6.2.3 Nutrition status of children under-5 age	129
6.2.4 Natural disasters impacts on people	134
6.2.4.1 Epidemic	134
6.2.4.2 Extreme temperature	135
6.2.4.3 Storm	135
6.2.4.4 Floods	136
6.3 The indicators measuring the impacts of climate change on education	137
6.3.1 Improved facilities for water/sanitation	137
6.3.2 The effects on the schools	140
6.4 Summary of chapter six	144

Chapter Seven: How Egypt can benefit from the Singapore's experience

7.1 Introduction	146
7.2 The obstacles that limit facing the effects climate change, especially on Egyptian's human capital	147
7.2.1 The obstacles that limit facing the effects climate change	147
7.2.2 The obstacles that limit facing the effects climate change on Egyptian's human capital	148
7.3 The lessons learned from Singaporean experience	151
7.3.1 The lessons for facing the effects climate change	151
7.3.2 The lessons for protecting the human capital from the climate change	152

7.4 The comparison between the effects of Climate Change on Human Capital in Singapore and Egypt	153
7.5 Summary of chapter seven	162
Summary of Part Three	163
Conclusions of the study	164
Recommendations of the study	171
Statistical Appendix	174
References	175
Arabic summary - المستخلص العربي	

List of Tables

No.	Name of table	Page
(1.1)	The Sea Level through the period (2000 - 2015)	A
(1.2)	Carbon Dioxide Concentrations through the period (2000 - 2015)	B
(1.3)	The contribution of main human activities in CO2 emissions in 2010	C
(1.4)	The contribution of main human activities in CH4 emissions in 2010	c
(1.5)	Linkages between investment in Health and Education	16
(1.6)	The top ten countries in Human Capital Index in 2013	d
(2.1)	Top 10 natural disasters by number of Deaths and Victims in 2015	e
(3.1)	The number of warm days, cool days, and cool nights in Singapore in years 1972 and 2014	G
(3.2)	CO2 emissions in Singapore through the period (2000-2013)	h
(3.3)	Electricity production from natural gas sources (% of total) in Singapore through the period (2000-2013)	i
(3.4)	Methane emissions in Singapore in (2000, 2005, 2008 ,2010,2012)	j
(3.5)	Nitrous oxide emissions in Singapore in (2000, 2005, 2008 ,2010,2012)	j
(3.6)	Carbon dioxide emissions (CO2), kg per PPP \$ of GDP in Singapore through the period (2000-2013)	K
(3.7)	CO2 emissions per kwh from electricity generation in Singapore through the period (2000-2010)	l
(4.1)	Disability-adjusted life years (DALYs) in Singapore (2000, 2012)	m
(4.2)	Mortality rate, under-5 in Singapore through the period (2000-2015)	n
(4.3)	Population under age 5 suffering from stunting% in Singapore in (2000-2009, 2009-2013)	o
(4.4)	Population under age 5 suffering from wasting % in Singapore in (2000-2009, 2009-2013)	o

(4.5)	Population dead & affected Impact of natural disasters in Singapore through period (2000-2015)	p
(4.6)	Proportion of the population using improved sanitation facilities in Singapore through the period (2000-2015)	q
(4.7)	Improved drinking water source (% of population with access) in Singapore through the period (2000-2015)	r
(5.1)	Percentage of unprotected area from the total surface area of the coastal zone of the Nile Delta in different levels of surface area	100
(5.2)	The days of maximum temperature in Upper Egypt and Western Desert during 3 decades (1973-2002)	S
(5.3)	CO2 emissions in Egypt through the period (2000-2013)	T
(5.4)	Methane emissions in Egypt in (2000, 2005, 2008, 2010, 2012)	U
(5.5)	Nitrous oxide emissions in Egypt in (2000, 2005, 2008, 2010, 2012)	U
(5.6)	Carbon dioxide emissions (CO2), kg per PPP \$ of GDP in Egypt through the period (2000-2013)	v
(5.7)	CO2 emissions per kwh from electricity generation in Egypt through the period (2000-2010)	w
(6.1)	Disability-adjusted life years (DALYs) in Egypt (2000, 2012)	X
(6.2)	Mortality rate, under-5 in Egypt through the period (2000-2015)	y
(6.3)	Disparities of Mortality rate, under-5 between Urban and Rural, Upper and Rural Lower of Egypt in (2000,2005, 2008, 2014)	z
(6.4)	Population under age 5 suffering from stunting% in Egypt in (2000,2008, 2008-2014)	aa
(6.5)	Population under age 5 suffering from wasting% in Egypt in (2000-2005 , 2006-2014)	aa
(6.6)	Population dead & affected Impact of natural disasters in Egypt through period (2000-2015)	bb
(6.7)	Proportion of the population using improved sanitation facilities in Egypt through the period (2000-2015)	cc
