

***The Effect Of Implant Length and
Diameter on Stress distribution of
overdenture in Kennedy Class II Cases***

[Three-Dimensional Finite Element Analysis]

Thesis submitted to
the Faculty of Oral and Dental Medicine
Cairo University

In partial fulfillment for the requirements of Master Degree in
Removable Prosthodontics

By

Ashraf Ahmed Mohamed Saad

B.D.S, 2002

Cairo University

2009

Supervisors

Dr. Ashraf Emil Eskander

Associate Professor of Prosthodontics

Faculty of Oral and Dental Medicine

Cairo University

Dr. Maha Wagdi El-Kerdawy

Lecturer of Prosthodontics

Faculty of Oral and Dental Medicine

Cairo University

Dr. Sahar Ali Fawzy

Lecturer of Systems and Biomedical Engineering

Faculty of Engineering

Cairo University

Acknowledgment

First and foremost, I am greatly thankful to ALLAH for granting me the perseverance to accomplish this work.

I was fortunate to conduct this work under the supervision of ***Dr Ashraf Emil*** Associate Professor of Prosthodontics. I am in a deep gratitude for his faithful supervision and guidance, as well as beneficial advice throughout the whole work. He treated me like a brother rather than a student.

I am deeply grateful to ***Dr. Maha Wagdi***, Lecturer of Prosthodontics, Cairo University for her unlimited help and persistence to achieve perfection and most of all for her valuable time.

My grateful appreciations are also extended to ***Dr. Sahar Ali Fawzy***, Lecturer of Systems and Biomedical Engineering, Cairo University, for guiding me into the fascinating world of computer analysis. I deeply thank her for her guidance, valuable remarks and patience.

A special gratitude and thanks are owed to ***Dr Ahmed el-Ragy*** Lecturer of civil engineering Fayom University for his valuable advice, devoted effort and co-operation in accomplishing practical part concerning the finite element stress analysis. His guidance, direction and encouragement will never be forgotten.

I would like to acknowledge the whole Staff members of the Prosthodontic department, MSA University, for their encouragement, help and continuous

Finally, I want to express my deep thanks to all the members of *my family*, without their support this work would never be finished.

*I dedicate this work to the
soul of my dear father and to
my lovely family.*

Table of contents

Introduction.....	1
Review of Literature	3
I. Problems of Kennedy class II removable partial denture:.....	3
a) Support:.....	3
b) Retention:.....	4
c) Prosthetic management of distal extension base removable partial denture:.....	5
II. Dental implants.....	18
a) Implant Length:.....	19
b) Implant diameter:.....	21
III. Attachments.....	25
Classifications of attachment:	26
a- Intracoronal attachments:.....	27
b- Extracoronal attachments:	27
c- Stud attachments:.....	28
d- Bar attachments:.....	33
IV. Stress analysis.....	34
a- Mechanical dial gauges:.....	34
b- Stereophotogramatic analysis:	35
c- Photoelastic studies:.....	35
d- Strain gauge technique:... ..	36

e- The Finite Element Method (FEM):	38
Aim of the Study	43
Materials and Methods.....	44
Partial denture construction:.....	44
Construction of the physical model:.....	46
Construction of Finite Element Model.....	58
Statistical analysis:.....	63
Results.....	65
Discussion... ..	99
Discussion of Materials and methods.....	99
Discussion of the results.....	103
Summary and Conclusions.....	108
Bibliography:	109
Arabic Summary.....	128
