**Evaluation of work related musculo-skeletal  
symptoms among clerks in Ain Shams  
University Faculty of medicine**

Thesis submitted for partial fulfillment of master degree of  
Occupational medicine

By

**EL-SAYED EL-SAYED EL-OKDA**

Supervised by

**PROF. DR. ABDEL-AZIZ KAMAL**

Professor and Head of the Department of  
Community, Environmental and occupational Medicine  
Faculty of medicine  
Ain Shams university

**ASSIS. PROF. DR. Maged ABDEL KARIM EL-SETOHY**

Assistant professor of  
Community, Environmental and occupational medicine  
Faculty of medicine  
Ain Shams University

Faculty of medicine Ain Shams University

# Acknowledgment

I would like to thank **Prof. Dr. Abdel Aziz Kamal** professor and of head of the department of community and occupational medicine; Faculty of medicine Ain Shams University for his guidance and continuous advise while working on this study. I would like to thank **Dr. Maged El-Setohy**, assistant professor of occupational medicine Faculty of medicine Ain Shams University for his support and enthusiasm to finish this work. I would like to extend my gratitude to **prof. Dr. Reiner Kirshof** prof. Of occupational medicine Munech- Germany for his assistance and supplying the study with  
Needed references.

I would like to thank **Dr. Maha El -Ghafary** for assistance in revising this work.

I would like to thank the administrative director of the faculty of medicine Ain Shams University for his understanding and co- operation to facilitate this study. Also i would like to thank the administrative director of the faculty Computer science and engineering Ain Shams University for his understanding and co- operation to facilitate this study.

**Table of contents:** **Page**

1-Introduction and Rationale..... 1

2-Aim of the work..... 5

3- Review of literature..... 6-49

***Chapter 1***

Ergonomics and ergonomic design of the work place .7-14

***Chapter 2***

Work related musculo-skeletal

disorders.....15-38

***Chapter 3***

Posture.....39-45

***Chapter 4***

Problems of office work.....46-50

Subjects and methods.....51-55

Results.....56-92

Discussion..... 93-106

Recommendation ..... 107

References..... 108-120

English summary

Arabic summary

## List of tables

1-Age &gender distribution in the studied groups.	56
2-Uncomfortable feeling among interviewed persons as regard surrounding environment.....	57
3-Health conditions of unexposed clerks in relation to their age .....	58
4- Health conditions of studied data entry workers in relation to their age .....	59
5-Reported health conditions by the study groups..	59
6-Effect of psychological factors on musculo-skeletal symptoms in the studied groups (inter- work relations) .....	60
7-Relation between Musculo-skeletal symptoms and depressed mood.....	60
8-Relation between Musculo-skeletal symptoms and decision-making.....	61
9-Relation between musculo-skeletal symptoms and Psychological stress.....	62
10-Years of work in the study groups.....	62
11-Relation between working duration in years and muscul-skeletal symptoms among study groups.....	63

13-Working hours among study groups.....	64
14- Relation between working hours and musculo- skeletal symptoms in among unexposed clerks.. .....	64
15-Relation between working hours and musculo- skeletal symptoms among data entry workers.....	65
16-Relation between working hours and upper limb pain as apart of cumulative trauma syndrome among clerks .....	65
17-Relation between working duration in years and Upper limb pain as apart of cumulative trauma syndrome among study groups .....	66
18-posture during work among study groups.....	66
19-Relation between sitting position and musculo- skeletal symptoms.....	67
20-Relation between foot position and lower limb pain in the study groups.....	68
21-Prevalence of musculo-skeletal symptoms in the study population.....	68

22-Musculo-skeletal symptoms involving different parts of the body among the study groups.....	69
23-Chair measures among study groups.....	70
24-Work place assessment in different workstations included in the study.....	71
25- Relation between feeling of workers towards work and musculo-skeletal symptoms in among study groups .....	72
26-Relation between feeling of workers toward work and wrist pain among study groups.....	73
27-Relation between work absenteeism and musculo-skeletal symptoms among study groups.....	74
28-Relation between surrounding space of work and musculo-skeletal symptoms in the study group..	75
29-Effect of musculo-skeletal symptoms on daily activity in the study groups.....	75
30- Logistic regression model for different risk factors and musculo-skeletal symptoms.....	76
31-Logistic regression model showing the relation	

between different risk factors and upper limb symptoms as apart of CTS.....77

32-Results of flexion test (Tinel's sign) of wrist among the study groups as indicator for carpal tunnel syndrome.....78
