Station, Alexandria, Agric. Res. Center**

# CONTENTS

	<u>Page No.</u>
CHAPTER 1: INTRODUCTION.....	1
CHAPTER 2: REVIEW OF LITERATURE.....	4
2.1. Effect of foliar and micro-elements on the incidence of bollworms and other insect-pests infestation.....	4
2.2. Effect of foliar application of nutritive elements on the yield parameters of cotton plants.....	19
2.3. Effect of Alternative chemical compounds and bio-preparations on bollworm infestation, cotton yield and yield characters.....	36
A. Effect of Neem Seed oil.....	36
B. Effect of bio-preparations ( <i>Bacillus thuringiensis</i> ).....	46
C. The recent fatal attraction technique “Pheromone-pesticide system or attracticide” for controlling the pink bollworm <i>Pectinophora gossypiella</i> .....	56
D. New approach for using Thyroxine as germination activator.....	63
2.4. Effect of synthetic Pyrethroids on bollworms infestation, cotton yield, yield characters and seed constituent.....	67
CHAPTER 3: MATERIALS AND METHODS.....	83
1. Experimental design.....	83
2. Treatments.....	83
3. Sampling technique.....	87
3.1. Cotton bollworms.....	87
4. Determination of cotton yield.....	88
5. Estimation of loss in cotton yield caused by bollworms.....	88

6. Determination of fiber quality.....	89
7. Determination of cotton seed constituents (chemical methods) .....	89
a. Moisture.....	89
b. Crude fat.....	89
8. Determination of soil properties.....	89
9. The main components and chemical structure of the used foliar materials. ....	90
9.1. Foliar fertilizers and micro-elements formulations.....	90
1. Greenzit S.P <sub>100</sub> .....	90
2. Greenzit N.P.K. 5144 .....	90
3. Potasin-F.....	90
4. Polymex .....	91
5. Ascorbic acid .....	91
6. Nitrate balancer.....	91
9.2. Agerin.....	92
9.3. Thyroxine.....	92
9.4. Cyfluthrin.....	92
9.5. Neem oil.....	93
9.6. Sirene <sup>®</sup> .....	93
CHAPTER 4: RESULTS AND DISCUSSION .....	95
4.1. Effect of foliar sprays of tested plant nutrients and alternative chemical compounds on the incidence of cotton bollworms throughout the growing cotton seasons of 1999, 2000 and 2001. ....	95
4.1.1.a. Efficiency of Sirene and foliar application on the incidence of the pink bollworm infestation during the growing season of 1999 in Alexandria.....	95

4.1.1.b. Efficiency of evaluated foliars applications on the occurrence of the pink bollworm infestation during the growing season of 2000, in Alexandria.....	100
4.1.1.c. Efficiency of foliars application on the pink bollworm infestation during the growing season of 2000 in Itay El-Baroud Center.....	108
4.1.1.d. Effect of applied foliar nutrients and alternative chemical compounds on the pink bollworm infestation during the growing season of 2001 in Alexandria.....	113
4.1.1.e. Effect of foliar application of tested plant nutrients and alternative chemicals on the pink bollworm infestation during the growing season of 2001 in Itay El-Baroud Center.....	118
4.1.2.a. Efficiency of Sirene and evaluated foliars application on the spiny bollworm infestation during the growing season of 1999 in Alexandria.....	123
4.1.2.b. Efficiency of the evaluated foliars applications on the spiny bollworm infestation during the growing cotton season of 2000 in Alexandria.....	126
4.1.2.c. Effect of applied foliar nutrients and alternative chemical compounds on the spiny bollworm infestation during the growing season of 2001 in Alexandria.....	135
4.1.2.d. Effect of foliar nutrients and alternative chemicals sprays on the level of the spiny bollworm infestation during the growing seasons of 2000 and 2001 in Itay El-Baroud Center.....	140

4.2. Effect of tested foliar nutrients and alternative chemical compounds on the cotton yield, yield loss, seeds crude fat and moisture content and fiber properties of cultivated cotton plants throughout the growing cotton seasons of 2000 and 2001.....	151
4.2.1.a. Efficiency of tested foliars on cotton yield in season of 2000 at Alexandria.....	151
4.2.1.b. Efficiency of tested foliars on cotton yield in season of 2000 in Itay El-Baroud Center.....	156
4.2.1.c. Efficiency of tested foliars on cotton yield in season of 2001 at Alexandria.....	160
4.2.1.d. Efficiency of tested foliars on cotton yield in season of 2001 at Itay El-Baroud Center.....	165
4.2.2.a. Efficiency of foliar applications on the yield losses during the growing season of 2000 in Alexandria.....	173
4.2.2.b. Efficiency of foliars application on the yield losses during the growing season of 2001 in Alexandria and Itay El-Baroud Center.....	176
4.2.3.a. Efficiency of tested foliars applications during the growing season of 2000 in Alexandria on the measured fiber properties of cotton cultivar Giza 70...	180
4.2.3.b. Efficiency of tested foliars applications during the growing season of 2000 in Itay El-Baroud Center on the measured fiber properties of cotton cultivar Giza 89.....	185
4.2.3.c. Efficiency of tested foliars applications during the growing season of 2001 in Alexandria on the estimated fiber properties of the cotton cultivar Giza	

70. ....	187
4.2.3.d. Efficiency of evaluated foliar applications during the growing season of 2001 in Itay El-Baroud Center on the estimated fiber properties of cotton cultivar Giza 89. ....	190
4.2.4.a. Efficiency of tested foliar applications on the crude fat and moisture content of gained cotton seeds from the grown cotton plants in seasons of 2000 & 2001 at Alexandria.....	193
CHAPTER 5: SUMMARY AND CONCLUSION .....	199
CHAPTER 6: REFERENCES .....	214
CHAPTER 7: ARABIC SUMMARY .....	

## ACKNOWLEDGEMENT

I am deeply grateful to **Prof. Dr. Hassan Aly Abdel-Hamid Mesbah**, Emeritus Prof. of Entomology for his directly supervised the work, providing his valuable help and offering his skill, advice and interest during the course of this study and for his indispensable efforts in critically revising the results and the manuscript.

I am grateful to **Prof. Dr. Sayed Hassan M. Tayeb**, Prof. of Pesticide Chemistry and Toxicology, Faculty of Agriculture, Saba Bacha, Alexandria University for his encouragement and valuable criticism during this study.

I am also thankful to the head Researchers, **Dr. Hamdy Amin Awad Emara**, the manager of the Regional Research Station, Alexandria, for his valuable help during the experimental work, deep interest and supervising the work.

I am also thankful to all colleagues who helped me in these studies, especially Dr. Khalifa Ahmed Abdel-Rahman, Dr. Mahasen Mohammed Ibrahim, Researchers in Plant Protection Research Station, Alexandria and Dr. Aly Aly Bhaidy, Researcher in Itay El-Baroud Research Station.

My deepest thanks are also dedicated to Dr. Ramzy Moursi Hedia, Researcher in Water and Soil Department, Faculty of Agriculture, Alex. University for his assistance in some experiments needed in this work.

My deep thanks are also due to the Head Researcher Dr. Mohammed Saeed El-Shahaat, the Manager of the Plant Protection Research Station for their interest and assistance.

I am also grateful to my colleagues of Bollworms Research Department, Plant Protection Dept., Sabahia Station, Alexandria for the offered technical assistance by them throughout the work.
