## **Acknowledgment**

*First of all prayerful thanks to **ALLAH** who gave me everything I have.*

*This work was carried out at the **Department of Microbiology, Faculty of Veterinary Medicine, Alexandria University**. I want to acknowledge:*

***Prof. Dr./ Mohammad Ali Akeila**, Professor and Head of Microbiology Department, Faculty of Veterinary Medicine, Alexandria University; for supervising, encouragement and valuable advice during the course of this research.*

***Prof. Dr./ Helmy Ahmed Torky**, Professor of Microbiology, Faculty of Veterinary Medicine, Alexandria University; for his patience, kind supervision, continuous advice and his support for all my work.*

***Prof. Dr./ Samy A. Khalil**, Professor of Microbiology, Faculty of Veterinary Medicine, Alexandria University; for his assistance and professional advice on every issue.*

***Prof. Dr./ William C. Davis**, Professor of Microbiology, Department of Veterinary Microbiology and Pathology, Washington State University, Pullman, Washington, USA; for gifting us the monoclonal antibodies used in this study.*

***Dr./ Gaber Saad Abdellatief Abdellrazeq**, Lecturer, Department of Microbiology, Faculty of Veterinary Medicine, Alexandria University; for his continuous advice, his support for all my work and his efforts for analyzing the flow cytometric data.*

*Both **Dr. Emad El-bshehy** and **Dr. Mahmoud El-naggar**, assistant lecturers of microbiology, Faculty of Veterinary Medicine, Alexandria University for helping me in the fulfillment of this thesis.*

*Especially thanks to **Dr. Eman Fathellbab**, Assistant Researcher at the Diagnostic Sera Department, Egyptian Company for Vaccines and Sera (VacSera), for her advice, support and training me on the flow cytometric analysis of cells.*
