Assiut University
Department of Rheumatology
& Rehabilitation

**A comparison of soft tissue ultrasonography, clinical
examination and magnetic resonance imaging in soft
tissue lesions of the shoulder**

Σ. VN JP

Prepared & Submitted

Mohammad Raouf Abdel Razik Hassan

Assistant lecturer

Department of Rheumatology & Rehabilitation

Faculty of Medicine - Assiut University

In partial fulfillment of the requirements for the Degree of M.D.
Rheumatology & Rehabilitation

Supervised by

Prof. Dr. Mohammad Gamal AL-Dein Abdul Motaal

Head of Rheumatology & Rehabilitation Department

Faculty of Medicine

Assiut University

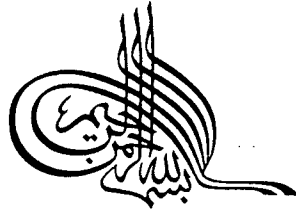

Prof. Dr. Taysier Mohammad Khedre

Professor of Rheumatology & Rehabilitation Department

Faculty of Medicine

Assiut University

2003

﴿وَمَا أُوتِيتُمْ مِنَ الْعِلْمِ إِلَّا قَلِيلًا﴾

الْعَظِيمُ

*This text is dedicated to the memory of
My beloved mother.*

*Who sadly died before its completion
From a cruel illness that was bravely borne*

*You were immensely loved
and now you are sorely missed.*

Acknowledgments

I would like to express my full appreciation and gratitude to Professor *Dr. Mohammed Gamal El-deen Abdel Motaal*, who has given me a lot of his time and valuable experience to choose this subject and indeed to enable me to start a new diagnostic technique and to be one of the first Departments in Egypt to use ultrasonography in Rheumatology.

I am deeply indebted to Professor *Dr. Tayseer Mohammed Khedr* for her support and guidance not only in finalizing and improving the quality of this work, but also she has always been a great support to myself and all of my other colleagues.

I would like to thank *Dr. Mohammed Mostafa Kamal* who helped me with no hesitation and offered me valuable suggestions to refine this work..

My deepest gratitude goes to my supervisor abroad *Dr. Michael Cawley* the Rheumatology Consultant at Southampton, U.K. who gave me all the guidance needed and a lot of his precious time. Also *Dr. Madeleine Samson* the Radiology consultant for her effort and superior advice to make this study come to light .

I cannot ignore the rest of the research team that did so much to help in producing this work, *Dr. Karen Walker Bone* Rheumatology Research registrar and *Dr. Andrea Lui* Radiology registrar. Without their invaluable help this study would had never been finalized, I owe them a lot .

Also *Mrs Angela Jackson* the Research coordinator of the Rheumatology Department, Southampton University, who helped me in the organization and execution of all the legal aspects of this study.

I cannot close without Bowing to my great family that supported me and compromised a great deal to facilitate achieving my goal.

So with all my love I dedicate this work to my wife, my great father, and to my mother who sadly died before its completion.

List of Contents

	Page
Acknowledgements	
Aim of the study	1
Review of literature	2
- Introduction	2
- Anatomy of the shoulder	6
- Lesions of the shoulder	10
- Commonest causes of shoulder pain	12
- Clinical examination of the shoulder	27
- Shoulder disability questionnaire	36
- Ultrasonography	40
- <i>Specific muscle pathology appearances</i>	48
- <i>Muscle boundary lesions</i>	61
- Magnetic resonance imaging	64
- <i>Specific muscle and tendon pathology</i>	66
- <i>Additional applications</i>	78
Patients and methods	82
- Clinical examination of the shoulder	82
- Ultrasound examination	83
- Magnetic resonance imaging	86
Results	90
Discussion	135
- Findings from the clinical history and physical examination	136
- Findings from ultrasonography	142
- Findings from magnetic resonance imaging	145
Summary and conclusions	149
- The main conclusions of this study	152
Recommendations	153
References	154
Appendices	171
Arabic summary	

List of Tables

Table No.		Page
1	Questionnaire that was answered by all the participants	88
2	Diagnostic criteria for upper limb disorders from the delphi consensus workshop	89
3	Characteristics of studied patients	102
4	Clinical presentation and response to treatment modalities in cases of supraspinatus lesions	103
5	Clinical examination of the neck movements	103
6	Clinical examination of the shoulder joint and the percentage of different affections	104
7	Mean, (SD), Median and Range of motion in degrees	104
8	MRI findings in rotator cuff tendons	105
9	MRI lesions of each (RCT) individually	105
10	MRI lesions of (GH), (AC) and (SAB)	106
11	US detected tendon abnormalities of the rotator cuff	106
12	US individual tendon lesions.....	106
13	US joint abnormalities, (GH) joint, (AC) joint and (SAB)	107
14	Comparison of (MRI) and (US)	107
15a	Comparison of (MRI) and (US) in supraspinatus tendon lesions	109
