# ACKNOWLEDGEMENT

*I am deeply indebted to the soul of Prof. Dr. Hassan A. Mansi, Prof. of Endodontics, Faculty of Dentistry, Alexandria University for his meticulous supervision, constructive comments, wise guidance, endless understanding and support. Really, I owe him a great deal.*

*I would like to extend my deep thanks, gratitude and appreciation to Dr. Amr Abd-Allah, Ass. Prof. of Endodontics, Faculty of Dentistry, Alexandria University for his great, sincere help, supervision and encouragement throughout the period of conducting my thesis.*

*I owe also to Dr. Raef A. Sherif, Lecturer of Endodontics, Faculty of Dentistry, Alexandria University for his unfailing help, supervision, encouragement and guidance during the pilot study and protocol-planning period.*

*I wish to express my sincerest gratitude to Prof. Dr. Hanaa Mohamed A. Aly, Prof. of Oral Biology, Faculty of Dentistry, Alexandria University for her continued encouragement and supervision, her guidance and effort were indeed helpful for producing this work.*

*My very special thanks are due to Prof. Dr. Mohammed El-Kateb, Head of the Conservative Dentistry Department, Faculty of Dentistry, Alexandria University for his encouragement and assistance.*

*Deep thanks and appreciation to Prof. Dr. Mohammed Ibrahim, Prof. of Endodontics, Faculty of Dentistry, Alexandria University for his sincere help and encouragement.*

*I would like to thank all my professors, colleagues and staff members at the Conservative Dentistry Department for their assistance and support.*

**CONTENTS**

<i>CHAPTER</i>	<i>PAGE</i>
=====	=====
I. INTRODUCTION.....	1
II. REVIEW OF LITERATURE.....	3
III. AIM OF THE WORK.....	35
IV. MATERIALS AND METHODS.....	36
V. RESULTS.....	48
VI. DISCUSSION.....	81
VII. SUMMARY AND CONCLUSION.....	90
VIII. REFERENCES.....	93

PROTOCOL

ARABIC SUMMARY

# LIST OF FIGURES

<i><b>FIGURE</b></i>	<i><b>PAGE</b></i>
=====	=====
1. Disodium salt of ethylenediamine-tetraacetic acid (EDTA).....	37
2. Triethylene-tetramine dihydrochloride (Trientine-HCL) at the left side of the picture and Mesio2,3-dimercaptos- uccinic acid (Succimer) at the right side of the picture.....	37
3. The chemical formula of EDTA.....	38
4. The chemical formula of Trientine.....	38
5. The chemical formula of Succimer.....	38
6. The tooth after removing of the anatomical crown.....	42
7. The split buccal and palatal roots.....	42
8. The split root into two halves.....	42
9. X-ray analyzer energy dispersive spectrometer.....	43
10. Ion sputtering machine.....	45
11. Scanning electron microscope JEOL.....	45
12. Measuring the mean diameter of dentinal tubule orifice.....	46

13. Photomicrographs of a representative control group (11mm, 7mm and 3mm from the apex). ....	71
14. Photomicrographs of an instrumented root canal irrigated with EDTA (11mm, 7mm and 3mm from the apex).....	72
15. Photomicrographs of an instrumented root canal irrigated with Trientine-HCL (11mm, 7mm and 3mm from the apex).....	73
16. Photomicrographs of an instrumented root canal irrigated with Succimer (11mm, 7mm and 3mm from the apex)...	74
17. Comparison among chelating agents in the mean diameter of dentinal tubules at all sites .....	77
18. Comparison among chelating agents in the mean diameter of dentinal tubules at the cervical area.....	78
19. Comparison among chelating agents in the mean diameter of dentinal tubules at the middle area.....	79
20. Comparison among chelating agents in the mean diameter of dentinal tubules at the apical area .....	80

## LIST OF TABLES

<i><b>TABLE</b></i>	<i><b>PAGE</b></i>
=====	=====
1. Mean and SD of different element concentration between the EDTA and control group at the cervical area.....	57
2. Mean and SD of different element concentration between the EDTA and control group at the middle area.....	57
3. Mean and SD of different element concentration between the EDTA and control group at the apical area.....	58
4. Mean and SD of different element concentration between the EDTA and control group at all sites.....	58
5. Mean and SD of different element concentration between the Trientine-HCL and control group at the cervical area.....	59
6. Mean and SD of different element concentration between the Trientine-HCL and control group at the middle area.....	59
7. Mean and SD of different element concentration between the Trientine-HCL and control group at the apical area.....	60
8. Mean and SD of different element concentration between the Trientine-HCL and control group at all sites.....	60
9. Mean and SD of different element concentration between the Succimer and control group at the cervical area .....	61

10. Mean and SD of different element concentration between the Succimer and control group at the middle area .....	61
11. Mean and SD of different element concentration between the Succimer and control group at the apical area .....	62
12. Mean and SD of different element concentration between the Succimer and control group at all sites.....	62
13. Mean and SD of sodium concentration in percentage among different materials at different sites.....	63
14. Mean and SD of magnesium concentration in percentage among different materials at different sites.....	64
15. Mean and SD of phosphorus concentration in percentage among different materials at different sites.....	65
16. Mean and SD of calcium concentration in percentage among different materials at different sites.....	66
17. Changes in the diameter of dentinal tubules between chelating agents at all sites.....	75
18. Changes in the diameter of dentinal tubules between chelating agents at the cervical area.....	75
19. Changes in the diameter of dentinal tubules between chelating agents at the middle area.....	76
20. Changes in the diameter of dentinal tubules between chelating agent at the apical area.....	76
