

Comparative Biological Study on Two Types of Tea as a Source of Antioxidants and Their Potentiality in Curing Some Diseases

By

Zeinab Sayed Ahmed Ahmed Demonstrator at Faculty of Specific Education, Assiut University

THESIS

Submitted in Partial Fulfillment of the Requirements for M.Sc.in Home Economics Nutrition and Food Science

Supervised by

Prof. Dr. Sanaa Mohamed El-Bendary

forP .ecneicS dooF dna noitirtuN fo Faculty of Education Ain Shams University

Dr.Samah Mohamed Ismail

Assistant Prof.of Nutrition and Food Science Faculty of Education Ain Shams University

Dr. Hanan Mohamed Kamal El - Sayed Youssef

Assistant Prof. of Nutrition and Food Science Faculty of Agriculture Ain Shams University

ACKNOWLEDGMENTS

Firstly all praises are due to **ALLAH**, he showed me the way and gave me the support to produce this work. I would like to express my profound appreciation and gratitude to **Prof. Dr. Sana. M. El-Bendary**, professor of Nutrition, Faculty of Education, Ain Shams University, for her supervision, trustful help, unfailing advice and giving me the power to complete this work

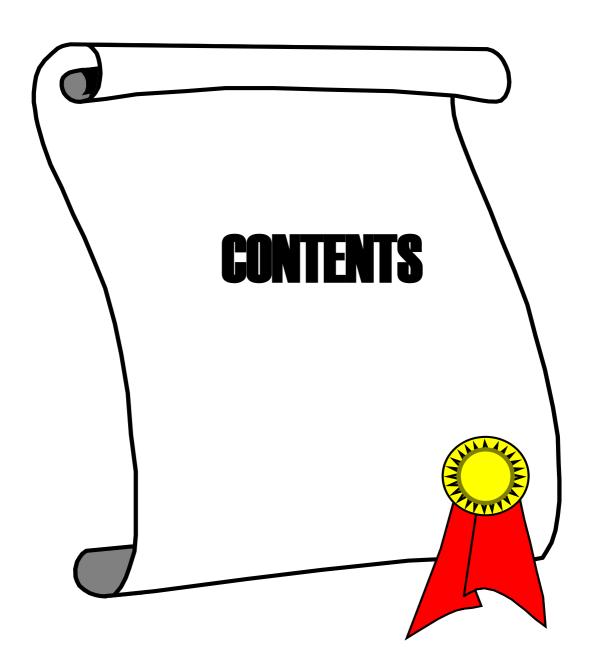

I wish to express my deep gratitude and sincere thanks to **Prof. Dr.**Mohamed K. EL-sayed Youssef professor of Food Science and Technology,
Faculty of Agriculture, Assiut University, Member of American Academy of
Science, for kindly suggesting the problem and providing so much of his time
in supervising, guiding the work and revising the manuscript. His kind
supervision valuable comments, continuous encouragement during carrying
out the investigation as well as during writing the thesis is highly appreciated.

My great thanks are offered to **Dr. Samah** .**M. Ismael** Assistant Prof. of Nutrition and Food Science, Home Economics Department, faculty of Education, Ain Shams University, for her continuous kind help during this work.

Special acknowledgement to **Dr. Hanan M. K. E. Youssef.** Assistant Prof. of Nutrition and Food Science, Faculty of Agriculture, Ain Shams University, for her supervision, continuous kind help and sincere advice during carrying out this thesis.

My great thanks are offered to **Dr. Heba. M. Saad-Eden**, Assistant Professor. of Histology, Faculty of Medicine, Assiut University, for her kind help carrying out in the histopathological experiments.

My great thanks are offered to Prof. **Dr. Amira. M. EL-nwahy**. Prof. of Biochemistry, Department of Biochemistry, Faculty of medicine, Assiut University, for her kind help in the carrying out biochemical experiments.

LIST OF TABLES

No.	Title	Page
1	Gross chemical composition of black and green teas	9
2	Mineral content of green and black tea	13
3	Vitamin content of black and green teas	15
4	Polyphenols fraction content in tea	19
5	Comparative risk of death from CVD between women and men consuming green tea	28
6	Constituents of the basal diet for 100 g diet	42
7	Experimental diets of various tea types for white albino rats	43
8	Gross chemical composition of black and green teas (on dry weight basis)	57
9	Analysis of variance of gross chemical composition of black and green teas	57
10	Mineral content of black and green teas mg/100g (on dry weight basis)	66
11	Analysis of variance of mineral composition black and green teas	66
12	Antioxidants content of black and green teas (%, mg/100g) (on dry weight basis)	77
13	Analysis of variance of antioxidants content of black and green teas	77
14	Effect of the black tea studied groups on the body weight gain (g) of the experimental rats	84
15	Effect of the green tea studied groups on the body weight gain (g) of the experimental rats	84
16	Effect of the black tea studied groups on the blood serum glucose content (mg/dl) of the experimental rats	88
17	Effect of the green tea studied groups on the blood serum	88

	glucose content (mg/dl) of the experimental rats	
18	Effect of the black tea studied groups on the serum	93
	triglycerides content (mg /dl) of the experimental rats	
19	Effect of the green tea studied groups on the serum	93
	triglycerides content (mg/dl) of the experimental rats	
20	Effect of the black tea studied groups on the serum total	98
	cholesterol content (mg/d) of the experimental rats	
21	Effect of the green tea studied groups on the serum total	98
	cholesterol content (mg/d) of the experimental rats	
22	Effect of the black tea studied groups on the serum HDL	103
	(High Density lipoprotein) content (mg/dl) of the	
	experimental rats	
23	Effect of the green tea studied groups on the serum HDL	103
	(High Density lipoprotein) content (mg/dl) of the	
	experimental rats	
24	Effect of the black tea studied groups on the serum LDL	108
	(Low Density Lipoprotein) content (mg/dl) of the	
	experimental rats	
25	Effect of the green tea studied groups on the serum LDL	108
	(Low Density Lipoprotein) content (mg/dl) of the	
•	experimental rats	
26	Effect of the black tea studied groups on the serum	112
27	hemoglobin content (g/dl) of the experimental rats	110
27	Effect of the green tea studied groups on the serum	112
20	hemoglobin content (g/dl) of the experimental rats	114
28	Analysis of variance of the 14 studied groups on the body	114
	weight gain, blood serum glucose, lipid profile and	
	hemoglobin	

120

	weight of organs (g)of the experimental rats	
30	Effect of the green tea studied groups on the relative	120
	weight of organs (g) of the experimental rats	
31	Analysis of variance of the relative weight of organs (g)	120
	of the experimental rats	
32	Questionnaire on the dietetic history sheet	160
33	Questionnaire on the effect of teas on eating vegetables	162
	and fruits	
34	Ouestionnaire on the health status sheet	163

LIST OF FIGURES
