**Comparison of stenting with minimally invasive
bypass surgery for high-grade stenosis of the
proximal left anterior descending coronary
artery: Six months' follow-up of a randomized
study**

Thesis

Submitted for partial fulfillment of MD degree in cardiology.

By

Alallah El Saied El Behery
MBBCH, Msc in cardiology

المجادلة (آية 11)

Dedication

To soul of my father,

To soul of my mother,

To my wife and

To my sons

ACKNOWLEDGMENT

First and for all thanks to 'Allah'

I am deeply indebted to Prof. Heba Abd El-Kader Mansour, professor of cardiology Benha faculty of Medicine for her support. I can not express may deep thanks and gratitude for her advice and genuine help.

I would like to express may deepest thanks to Prof. Mohammed diaa El dardir Consultant of cardiology Nation Heart Institute for his supervision on this work and for his guidance and endless cooperation throughout the course of this-work.

I do not find words to thank Dr Hassan Mohamed Elsayy, assistant Consultant of cardiothoracic surgery Nation Heart Institute to whom I am most indebted for his guidance and endless support and continuous encouragement.

Finally I would like to thank Dr Ali Ibrahim Atia, lecturer of cardiology Benha faculty of medicine for his personal support and encouragement.

LIST OF ABBREVIATION

ACC/AHA	American College of Cardiology/ American Heart Association
AF:	Atrial fibrillation
AMI:	Acute myocardial infarction
APTT:	Activated partial thromboplastin
AV :	Atrioventricular
BARI:	Bypass Angioplasty Revascularization Investigation
BENESTENT	BELGIUM- NETHERLANDS stent trial
BMI	Body mass index
CABG	Coronary artery bypass graft
CAD	Coronary artery disease
CAPTURE	Chimeric c7E3 AntiPlatelet Therapy in Unstable angina REfractory to standard treatment trial
CASS	Coronary Artery Surgery Study
CCS	Canadian cardiovascular society
CFR	Coronary flow reserve
CPB	Cardiopulmonary bypass
CHF	Congestive heart failure
CK	Creatine kinase
CK-MP	Creatine kinase MP
COPD	Chronic obstructive pulmonary disease
CPK	Creatine phosphokinase
CSA	Cross section area
CVA	Cerebrovascular accident
CVR	Coronary Flow Velocity Reserve
DCA :	Directional Coronary Atherectomy
ECG:	Electrocardiograph
EF:	Ejection fraction
ELCA:	Excimer Laser Coronary Atherectomy
EPIC	Investigation: Evaluation of Platelet IIb/IIIa Inhibition for Prevention of Ischemic Complication
EPISTENT:	Evaluation of Platelet IIb/IIIa inhibition in STENTing
EST	Exercise stress test
FFR:	Fractional flow reserve
FRISC II trial	FRagmin and Fast Revascularisation during InStability in Coronary artery disease Investigators
GIT	Gastrointestinal tract
GP IIb/IIIa	Glycoprotein IIb/IIIa blockers
HDL	High-density lipoprotein
ICU	Intensive cares unite
IMA	Internal mammary artery
IMPACT-II trial	The Integrilin to Manage Platelet Aggregation to prevent Coronary Thrombosis-II
IVUS	Intravascular Ultrasound
IV sulcus	Interventricular sulcus
LAD	Left anterior descending artery
LDL	Low density lipoprotein

LIMA	Left internal mammary artery
LMCA	Left main coronary artery
LVEF	Left ventricle ejection fraction
LVWMA	Left ventricle wall motion abnormality
MASS:	Medicine, angioplasty or surgery
MICAB	Minimal invasive coronary artery bypass graft
MICOs	Minimal invasive cardiac operations
MIDCABG	Minimal invasive direct coronary artery bypass graft
MIDCAB	Minimal invasive coronary artery bypass
MI	Myocardial infarction
MLD	Minimal luminal diameter
NHLBI	National Heart Lung and Blood Institute
NONQMI	Non-Q- myocardial infarction
OPCAB	Off pump coronary artery bypass
PCI	Percutaneous coronary interventions
PICVA	Percutaneous in situ coronary venous arteriolation
PTCA	Percutaneous transluminal coronary angioplasty
PVD	Peripheral vascular disease
QCA	Quantitative coronary angiography
QMI	Q- myocardial infarction
RESTORE	Randomized Efficacy Study of Tirofiban for Outcomes and Restenosis.
RESCUE	Randomized Evaluation of REScue PCI with Combined Utilization Endpoints trial
RITA	Randomize interventional and treatment of angina
SOLD:	Stenting after Optimal Lesion Debulking
STARS	STenting Antithrombotic Regimen study
TACTICS Trial:	Treat Angina with Aggrastat and determine the Cost of Therapy with an Invasive or Conservative Strategy).
TEC	Transluminal Extraction Catheter
TIMI-IIb trial	Thrombolysis in myocardial infarction
TMR	Trans-myocardial revascularization
TVR	Target vessel revascularization

LIST OF TABLES

Number	Table	Page
Table.1	Primary endpoints at 5 years	20
Table.2	Incidence and localization of the revascularization procedures	21
Table.3	Functional classes at follow-up	21
Table.4	Immediate outcome of the patients randomized in the SIMA trial	22
Table.5	In-hospital complications	23
Table.6	Length of the in-hospital stays (days)	23
Table 7	Stent design	26
Table 8	Angiographic definition of restenosis	43

LIST OF FIGURES

Number	Figure	Page
Figure 1	Anterior view of the heart	4
Figure 2	Atherosclerosis	6
Figure 3	Pathology of atherosclerosis	8
Figure 4	Consequence of atherosclerosis	8
Figure 5	Coronary circulation in a critical stenosis in LAD	9
Figure 6	The relationship between vessel radius and blood flow	10
Figure 7	Types of stents	27
Figure 8	Coronary artery bypass	57
Figure 9	Coronary arteriogram & site of LAD lesion	76
