ACKNOWLEDGEMENTS

First and foremost thanks to Allah the Almighty

I owe a heavy dept of gratitude to professor **Dr. Mohamed M. El-Merzabani**, Professor of Drug reseach and Experimental oncology ,Cancer Biology Departement , Cancer Institute, Cairo University, for his enthasiastic help and valuable remarks which helped me much to complete this thesis making it presentable and sound. I do appreciate his wealth of knowledge, and valuable time he gave me.

My deepest gratitude and sincere thanks to **Prof. Dr. Abd El Baset A.El-Aaser**, Professor of Cell Biology, Cancer Biology Departement, National Cancer Institute, Cairo University ,for suggesting the topic, supervising this work and rendering available all the facilities to carryout the work in the department.

My sincere gratitude to **Prof. Dr. Hussin S. El Kashif** Professor of Biochemistry, National Centre of Radiation Research and Technology for his valuable suggestion, planning , supervising , valuable gudiance, faithful help to overcome many difficulties that arose during this investigation and critical reading of the manuscript.

I would like to thank **Prof. Dr. Abd El Fatah Badawy**, Professor of Chemistry, Petroleum Research Institute, for his interest in the work and encouragement.

I extend my thanks to all staff members and technicians of the Cancer Biology Department, National Cancer Institute, Cairo University, for facilitating this work.

Finally, I want to thank all staff and members of Radiation Biology Department, National Center for Radiation Research and Technology for their help and facilitating this work.
