**A STUDY OF SERUM LEVELS OF NITRIC OXIDE  
AND VASOACTIVE INTESTINAL POLYPEPTIDE IN  
PATIENTS WITH GASTROESOPHAGEAL REFLUX  
DISEASE**

*Thesis*  
Submitted for Partial Fulfillment of the  
M.D. Degree  
*In*  
Internal Medicine

*By*  
**Mohamed Abdel Moghni Mostafa**  
M.B., B.Ch.-M.Sc, Ain Shams University

*Under the Supervision of*  
**Prof. Dr. Anwar Mohamed Abdel Mohsen**  
Professor of Internal Medicine  
Faculty of Medicine - Ain Shams University

**Prof. Dr. Malak Hassan Bahgat**  
Professor of Internal Medicine  
Faculty of Medicine - Ain Shams University

**Prof. Dr. Magdy Abdel Aziz El-Guinaidy**  
Professor of Internal Medicine  
Faculty of Medicine - Ain Shams University

**Assistant Prof. Dr. Maha Abdel Aziz El-Touny**  
Assistant Professor of Internal Medicine  
Faculty of Medicine - Ain Shams University

**Dr. Sammar Kammal Kassim**  
Lecturer of Biochemistry  
Faculty of Medicine - Ain Shams University

# ACKNOWLEDGEMENT

]First of all I pray thanking ALLAH, For helping me to go through and to accomplish this work

*I would like to express my deep thanks and extreme gratitude to Prof. Dr. Anwar Mohamed Abd-El-Mohsen, Professor of Internal Medicine, Ain-Shams University, for his constant encouragement and help; starting from selection of the subject and continuous valuable advice and guidance. My deep indebtedness to him is far shorter than his right.*

*Words can not express my deepest gratitude and my sincere appreciation for the help of Prof. Dr. Malak Hasan Bahgat, Professor of Internal Medicine, Ain-Shams University, that she gave a great deal of her valuable time for this work, her constructive criticism and her continuous support.*

*I am grateful expressing my sincere appreciation to Prof. Dr. Magdy Abd-El-Aziz El-Guenidy, professor of Internal Medicine, Ain-Shams University, for his inestimable guidance, support and constructive suggestions throughout the preparation of this work.*

*I wish to express my sincere appreciation and deep thanks to Assist. Prof. Dr. Maha Abd-El-Aziz El-Tony, Assist. Professor of Internal Medicine, Ain-Shams University, for her kindness, great help, understanding and cooperation. Her help was extremely valuable especially in the practical part of the work. Without her, this work would have never been done.*

*I would like to express my deepest appreciation to Dr. Samar Kamal Kasem, Lecturer of Biochemistry, Faculty of Medicine, Ain-Shams University, for her unlimited guidance and generous supervision. My deep indebtedness to her is far shorter than her right.*

*Finally, I wish to thank all Professors and Members of Internal Medicine Department, Ain-Shams University, for their sincere cooperation and help.*

*Mohamed Abd-El-Moghny*

# LIST OF TABLES

Tables No.		Page
1	Summary of hormonal, neuronal agents, food and miscellaneous that influence LES pressure...	14
2	Summary of the esophageal and extra-esophageal complications of GERD.....	33
3	Summary of various characteristic differences between (CNOS) and (INOS) .....	80
4	Summary of 24 hours pH monitoring score system.....	107
5	Reagents and their concentrations used in NO bioassay.....	109
6	Individual data of the control group as regard sex, age, body mass index, cigarette smoking index, the results of laboratory investigations and pelvi-abd U/S.....	123
7	Individual data of the patients group as regard sex, age, body mass index, cigarette smoking index, duration of GERD and the results of laboratory investigations and pelvi abd-U/S.....	124

**Tables  
No.**

98

8	Statistical comparison between the control group and GERD patients as one group as regard the results of laboratory investigations...	125
9	The results of 24 hours pH monitoring score of grade 0 gastroesophageal reflux.....	126
10	Descriptive statistics of the control group as regard age, BMI, CSI.....	127
11	Descriptive statistics of the patients group as regard age, BMI, CSI, duration of GERD.....	128
12	Statistical comparison between the control group and GERD patients as one group as regard age, BMI, CSI.....	128
13	Statistical comparison between the control group and various grades of lower and esophagitis and in between the five grades of lower end esophagitis as regard the mean values of age, BMI, CSI and duration of GERD.....	129
14	Individual data of S. nitrate and VIP levels in the control group.....	130

Tables No.		Page
15	Individual data of S. nitrate and VIP levels in the patients groups.....	131
16	Statistical comparison between the control group and GERD patients as one group as regard S. nitrate and VIP level.....	133
17	Statistical comparison between the control group and various grades of lower and esophagitis and in between the five grades of lower end esophagitis as regard the mean values of S. nitrate and VIP levels.....	134
18	Results of Pearson's correlation test between S. nitrate level and each of VIP level, age, BMI, CSI, duration of GERD and grade of lower and esophagitis in GERD patients as a whole.....	135
