ACKNOWLEDGEMENT

The author wishes to express his sincerest gratitude and appreciation to **Prof. Dr. F. M. Habib.**, professor of Soil Science, Faculty of Agriculture, at Moshtohor and **Dr. H.H Hassona** Professor of Soil Science, Soil Survey Department , Soil, Water and Environment, Agricultural Research Center, for suggesting the problems, supervision, continuous encouragement valuable guidance and constructive criticism during the course of this investigation.

Thanks are extended to **Dr. S.A. Soltan** Assistant Professor of Soil Science, Faculty of Agriculture at Moshtohor for supervision, sincere help and guidance throughout the course of the study .

The author is also indebted to **Dr. W.H. Abdel Aziz** , Soil Survey Department, Soil, Water and Environment for his sincere help in studying and identifying the mineralogy of the clay fraction .

Thanks are also due to the members of Soil Survey Department., Soil , Water and Environment, Agric. Res . Center and for whose Co-operation has contributed much to the completion of this work .
