Prof. of Agric. Zoology Agric. Zoology and Nematology  
Dept. Faculty of Agriculture, Al-Azhar University.

**PROF. DR.: MAHMOUD EL-SAYED EL-HALAWANY**

Prof. of Acarology of Plant Protection Research Institute,  
Agricultural Research Center.

## **ACKNOWLEDGEMENT**

**Firstly, Ultimate thanks to ALLAH**

The writer wish to express his deep thanks and appreciation to **Prof.Dr. A.M. Metwally**, Professor of Zoology and Head of Agricultural Zoology and Nematology Dept., Faculty of Agriculture, Al-Azhar University, for his supervision, reviewing the manuscript, advice and great help offered during this study.

Sincere thanks to **Prof.Dr. M.E. El-Halawany**, Professor of Acarology, Head of Deciduous Fruits Trees Acarology Unit, Fruit Trees Acarology Dept., Plant Protection Research Institute, for suggesting the plan of this work, supervision, keen interest and continuous guidance throughout the present study.

Deep thanks to **Prof.Dr. M.R. Abdel-Kader**, Professor of Acarology, Agricultural Zoology and Nematology Dept., Faculty of Agriculture, Al-Azhar University, for his supervising, advice, encouragement and continuous guidance throughout this study.

# CONTENTS

|   | Page |
|---|------|
| <b>I. INTRODUCTION</b>  | 1    |
| <b>II. REVIEW OF LITERATURE</b>   | 2    |
| <b>III. MATERIALS AND METHODS</b>   | 19   |
| A- Rearing technique for preparing susceptible strain of <i>Tetranychus urticae</i> Koch  | 19   |
| B- Toxicity tests for adult females of <i>T. urticae</i> and preparation of concentrate-mortality lines of tested pesticides  | 19   |
| C- Mite sources   | 20   |
| D- Selection pressure procedure   | 21   |
| E- Chemical used  | 22   |
| F- Determination of the biological aspects of <i>Tetranychus urticae</i> Koch before and after application of different pesticides                                      | 23   |
| <b>IV. RESULTS AND DISCUSSION</b>   | 25   |
| 4.1- Susceptibility of adult females of <i>Tetranychus urticae</i> Koch to different pesticides before application of pesticides in March 2000                          | 25   |
| 4.2- Susceptibility of adult females of <i>Tetranychus urticae</i> Koch to different pesticides after application of pesticides in September 2000                       | 40   |
| 4.3- Comparison study between the susceptibility of adult females of <i>Tetranychus urticae</i> Koch to different pesticides before and after application of pesticides | 55   |
| 4.4- Biological aspects of <i>Tetranychus urticae</i> Koch parent strains from Qalubia, Sharkia, Giza and Behera before and after application of pesticides             | 73   |

**CONTENTS : Continued.**

|   | <b>Page</b> |
|---|-------------|
| 4.4.1- Qalubia strain   | 73          |
| a- Before application   | 73          |
| b- After application  | 81          |
| c- Before and after application   | 86          |
| 4.4.2- Shrakia strain   | 94          |
| a- Before application   | 94          |
| b- After application  | 101         |
| c- Before and after application   | 109         |
| 4.4.3- Giza strain  | 119         |
| a- Before application   | 119         |
| b- After application  | 124         |
| c- Before and after application   | 132         |
| 4.4.4- Behera strain  | 139         |
| a- Before application   | 139         |
| b- After application  | 147         |
| c- Before and after application   | 152         |
| 4.4.5- Comparative study between<br>biological aspects of <i>Tetranychus</i><br><i>urticae</i> Koch in susceptible strain and<br>selected strains before and after<br>application | 162         |
