Preparation and Characterization of Ceramic Bodies based on Some Phosphate containing Wastes

Thesis Submitted by

Nihal Ahmed Mohamed Tawfik El-Mahalawy

(M. Sc. in Chemistry)

For Fulfillment of the Degree of Ph. D.

in Chemistry

Supervised by

Prof. Maged Shafik Antonious

Professor of Inorganic Chemistry, Department of Chemistry, Faculty of Science, Ain Shams University.

Prof. Mohamed Awaad

Professor of Chemistry and Technology of ceramics, Department of Refractories, ceramics and Building Materials, National Research Centre.

Prof. Salma Naga

Professor of Chemistry and Technology of ceramics, Department of Refractories, ceramics and Building Materials, National Research Centre.

2015

Approval Sheet
Ph. D. Thesis

Entitled

Preparation and Characterization of Ceramic Bodies based on Some Phosphate containing Wastes

Thesis Submitted by

Nihal Ahmed Mohamed Tawfik El-Mahalawy

Thesis Advisors **Approved**

Prof. Maged Shafik Antonious

Professor of Inorganic Chemistry,
Department of Chemistry, Faculty of Science,
Ain Shams University.

Prof. Mohamed Awaad

Professor of Chemistry and Technology of Ceramics, Department of Refractories, ceramics and Building Materials, National Research Centre.

Prof. Salma Naga

Professor of Chemistry and Technology of Ceramics, Department of Refractories, ceramics and Building Materials, National Research Centre.

Head of Chemistry Department

Prof. Dr. Hamad Ahmed Younes Derbala

Acknowledgement
Thanks to ALLAH

No words can ever express my sincere gratitude for all the people who contributed to the fulfillment of this work, my Supervisors and friendly colleagues at National Research Centre, Department of Refractories, Ceramics and Building Materials.

I would like to express my deep gratitude to ***Prof. M. Sh. Antonious,*** *Professor of inorganic Chemistry, Faculty of Science, Ain Shams University for his kind supervision, continuous encouragement, valuable advice and tremendous help throughout this work.*

With sincere respect and gratitude, I would like to thank ***Prof. S. M. Naga****, professor of Chemistry and Technology of Ceramics, National Research Centre, for suggesting and valuable planning the points and scheme of the present work, for sound supervision, kind help, valuable advices, critical reading of the manuscript, encouragement during carrying out this work, The guidance and support especially during the latest phase of the present work.*

I wish to express my deep appreciation to ***Prof. M. A. Awaad,*** *Professor of Chemistry and Technology of Ceramics, National Research Centre, for his fatherly guidance, supervision, valuable discussion, great criticism, constructive criticism, correcting the manuscript and continued help during the course of this work.*

I express my gratitude and deep appreciation to my whole family, husband and my son for their encouragement that were of great support to me.

	ABSTRACT	VIII

CHAPTER I

I.	Introduction	1

CHAPTER II

II.	Literature Survey	4
II.1.	Reuse of waste materials in ceramic production.	4
II.1.1.	Fish bone wastes.	6
II.1.2.	Extraction of hydroxyapatite from fish bone.	7
II.2.	Ceramic materials.	10
II.2.1.	Bone china.	11
II.2.1. 1.	Definition of bone china.	11

II.2.1. 2.	Properties of bone china.	11
II.2.1. 3.	Composition of bone china.	12
II.2.1. 4.	Manufacturing process of bone china.	14
II.2.1.4.1.	Firing process.	14
II.2.1.4.2.	Bone china phase composition.	15
II.2.1.4.3.	Porosity of bone china.	16
II.2.1.4.4.	Translucency and whitening of bone china.	16
II.2.2.	Stoneware tiles.	17
II.2.2.1.	Definition of stoneware tiles.	18
II.2.2.2.	Properties of stoneware tiles.	19
II.2.2.3.	Manufacturing of stoneware tiles.	20
II.2.2.4.	Substitution with calcium ions as a flux in the production of stoneware tiles.	21
II.2.2.5.	Using of waste materials in stoneware tile production.	24

CHAPTER III

III.	Materials and Methods.	28
III.1.	Materials.	28
III.1.1.	El-Tieh kaolin.	28
III.1.2.	English China Clay (E.C.C.).	28
III.1.3.	Hafafit feldspar.	28
III.1.4.	The weathered Feldspar.	28

III.1.5.	Fish bone ash.	28
III.2.	Methods of Investigation.	29
III.2.1.	Preparation of the raw materials.	29
III.2.2.	Characterization of the starting materials.	29
III.2.2.1.	Chemical composition.	29
III.2.2.2.	Mineralogical composition [X-ray diffraction analysis (XRD)].	29
III.2.2.3.	Differential scanning calorimetry (DSC).	30
III.2.3.	Processing.	30
III.2.3.1.	Development of hydroxyapatite (HA) powder.	30
III.2.3.2.	Batch design.	31
III.2.3.3.	Forming.	32
III.2.4.	Firing (Sintering).	33
III.2.5.	Characterization of the fired samples	33
III.2.5.1.	Physical properties.	33
III.2.5.2.	Phase constitution of the studied batches.	34
III.2.5.2.1.	X-ray diffraction analysis (XRD).	34
III. 2.5.2.2.	Microstructure investigation by scanning electron microscope (SEM).	34

III.2.5.2.3.	Linear thermal expansion.	35
III.2.5.2.4.	Mechanical properties.	36
III.2.5.2.5.	Whiteness Index measurements.	37
III.2.5.2.6.	Translucency measurement.	38

CHAPTER IV

IV.	Results and Discussion.	39
IV.1.	Characterization of the starting raw materials.	39
IV.1.1.	El-Tieh kaolin	39
IV.1.1.1.	Phase composition analysis (XRD) of El-Tieh kaolin.	39
IV.1.1.2.	Chemical composition of El-Tieh kaolin in mass-%.	39
IV.1.1.3.	Thermal analysis (DSC) of El- Tieh kaolin.	41
IV.1.2.	English China Clay (E.C.C.)	41
IV.1.2.1.	Phase composition (XRD) analysis ofE.C.C	41
IV.1.2.2.	Chemical composition of E.C.C. in mass-%	42
IV.1.2.3.	DSC analysis of E.C.C.	42
IV.1.3.	Hafafit feldspar.	43
IV.1.3.1.	Phase composition (XRD analysis) of Hafafit feldspar.	43

IV.1.3.2.	Chemical composition of Hafafit feldspar in mass-%.	44
IV.1.3.3.	DSC analysis of Hafafit feldspar.	44
IV.1.4.	The weathered feldspar.	45
IV.1.4.1.	Phase composition (XRD analysis) of the weathered feldspar.	45
IV.1.4.2.	Chemical composition of the weathered feldspar in mass-%.	46
IV.1.4.3.	DSC analysis of the weathered feldspar.	46
IV.1.5.	Fish bone ash.	47
IV.1.5.1.	Phase composition (XRD analysis) of fish bone ash.	47
IV.1.5.2.	Chemical composition of the bone ash in mass-%.	48
IV.1.5.3.	Thermal analysis (DSC) of the fish bone ash.	48
IV.2.	Characterization of the ceramic products.	49
IV.2.1.	Characterization of the first group ceramic tiles.	49
IV.2.1.1.	Chemical composition of the first	49

	group batches.	
IV.2.1.2.	Physical properties of the first group samples fired at different firing temperatures.	50
IV.2.1.3.	Phase composition of the first group fired bodies (XRD).	51
IV.2.1.4.	Microstructure of the first group (SEM).	53
IV.2.1.5.	The coefficient of thermal expansion (CTE) of the first group.	55
IV.2.1.6.	Mechanical behavior (Three point bending test) of the first group.	56
IV.2.2.	Characterization of the second group ceramic tiles.	57
IV.2.2.1.	Chemical composition of the second group batches.	57
IV.2.2.2.	Physical properties of the second group samples fired at different firing temperatures.	58
IV.2.2.3.	Phase composition of the second group (XRD).	60
IV.2.2.4.	Microstructure of the second group.	61

IV.2.2.5.	**The coefficient of thermal expansion measurement (CTE) of the second group.**	**66**
IV.2.2.6.	**Mechanical behavior (Three point bending test) of the second group.**	**67**
IV.2.3.	**Characterization of the third group (Bone china).**	**68**
IV.2.3.1.	**Chemical composition of the third group bone china batches.**	**68**
IV.2.3.2.	**Physical properties of the third group samples (bone china)fired at different firing temperatures.**	**69**
IV.2.3.3.	**Phase composition of the third group of fired bone china bodies (XRD).**	**71**
IV.2.3.4.	**Microstructure of the third group of bone china samples (SEM).**	**72**
IV.2.3.5.	**The coefficient of thermal expansion (CTE) of the third group (bone china).**	**76**
IV.2.3.6.	**Mechanical behavior (Three point bending test) of the third group bone china.**	**77**
IV.2.3.7.	**Whiteness index measurement of**	**78**

	the fired bone china bodies.	
IV.2.3.8.	Translucency measurement of the fired bone china bodies.	80
