Photochromism and Spectroscopic Studies of Some Spiropyran Complexes of Some Transition Metal Ions

A Thesis Submitted for the Degree of Master of Science as
a Partial Fulfillment for Requirements of the Master of
Science

Inorganic Chemistry

Sarah Nagy Ali Mobarez Fares

Thesis Advisors

Prof. Dr. Mohamed Sabry Abdel-Mottaleb

*Professor of Inorganic and photochemistry, Faculty of Science,
Ain Shams University*

Prof. Dr. Mohamed Mahmoud Abo-Aly

*Professor of Inorganic and photochemistry, Faculty of Science,
Ain Shams University*

Dr. Mohamed Said Attia

*Associate Professor of Inorganic and photochemistry , Faculty
of Science, Ain Shams University*

Photochromism and Spectroscopic Studies of Some Spiropyran Complexes of Some Transition Metal Ions

A Thesis Submitted By
Sarah Nagy Ali Mobarez Fares

(B. Sc. 2009)

For M. Sc. Degree in Inorganic Chemistry
Thesis Advisors **Thesis Approved**

Prof. Dr. Mohamed Sabry Abdel-Mottaleb
*Professor of Inorganic and photochemistry , Faculty of
Science, Ain Shams University.*

Prof. Dr. Mohamed Mahmoud Abo-Aly
*Professor of Inorganic and photochemistry , Faculty of
Science,
Ain Shams University.*

Dr. Mohamed Said Attia
*Associate Professor of Inorganic and photochemistry , Faculty
of Science, Ain Shams University.*

Head of Chemistry Department
Prof. Dr. Hamed Ahmed Derbala
*Professor of Organic Chemistry,
Faculty of Science, Ain Shams University*

2015

Acknowledgment

*I wish to express my sincere gratitude to **Prof. Dr. M. S. A. Abdel-Mottaleb**, Professor of Inorganic Chemistry, Faculty of Science, Ain Shams University; he was kind enough for suggesting the lines of research and following up the progress of the work with keen interest, guidance and valuable criticism. He also offered his lab facilities to carry out the experimental work, for that I am greatly appreciated.*

*I would like to express my sincere gratitude and indebtedness to **Prof. Dr. M. M. Abo-aly**, Professor of Inorganic Chemistry, Faculty of Science, Ain Shams University; for his kind help, encouragement, supervision and continuous advice.*

*Also, I thank **Prof. Dr. M. S. Attia**, Associate Professor of Inorganic Chemistry, Faculty of Science, Ain Shams University; he was not only active enough during the progress of the work but also was loyally cooperative.*

Last but not least, my great and deep gratitude for my wonderful mother, my father, my sister Rana, my friends, my colleagues and for all people who help me to finish this work,

Sarah Nagy Ali Mobarez

LIST OF FIGURES

LIST OF FIGURES

Figure	Page
1.1 The photochromic conversion loops of the SP dissolved in different solvents.....	4
1.2 The structure of a spirooxazine	7
1.3 Complexation species in PMC of spiro [indolinephenanthrolineoxazines]	8
1.4 Closed and open forms of spiropyrans	9
1.5 Quiniodal and zwitterionic forms of MC	9
1.6 Some intermediates of SP and MC interconversions.....	10
1.7 Photocolration and back reactions of a spiropyrans.....	11
1.8 Photocolration and back reactions of some spiropyrans...	12
1.9 Photocolration and back reactions of Porphyrin-spiropyrans metal complexes.....	13
1.10 Structure of polyenic spirobenzopyrans	14
1.11 Photomerocyanines derived from the ring-opening of the spironaphthopyran 12a	15
1.12 Photocoloration reaction of a spirooxazine	16
1.13 The ultraviolet irradiation and the back reaction of the [1,3]oxazines	17
1.14 Photochromism of diarylethene 1.....	18
1.15 Photochromism of diarylethene 2	19
1.16 Photochromism of phenanthrene-bridged diarylethenes...	19
1.17 Ring-Opening and Ring-Closing Photoisomerization of a Diarylethene	20
1.18 Photochromism of 4(1 <i>H</i>)-quinolone	21
1.19 (a) Photoinduced isomerization of 1-phenoxy-5,12 naphthacenequinone, (b) structure of an amine–quinone adduct, (c) structure of a phenoxyquinone derivative.....	23
1.20 Photoisomerisation of thiol-terminated 1,3-diazabicyclo[3.1.0]hex-3-ene on silver nanoparticles	24
1.21 Photochromism of indenofused benzopyrans	25
1.22 Chemical structures of compounds P1 and P2	26
1.23 Photochromism of dithienylethene	26
1.24 Structure of bis(spiropyrans) podands	27

1.25 Complexation of bis(spiropyran) podands with Ca^{2+} ions..	27
1.26 Colorimetric sensing of CN^- by the SP 2.....	29
1.27 Structure of a nitrospiropyran	30
1.28 Coordination of spiropyrans 1 with metal ions.....	30
1.29 Photo-,thermo-,and ionochromism of spiropyran compounds	32
1.30 Photochromism of indoline spiropyran.....	33
1.31 Structure of SP(I) and (II)	34
1.32 Photochromism of spiroindolinonaphthooxazines.....	35
1.33 Photochromism of a Rhodamine Amide	36
1.34 Photochromism of Rhodamine B Salicylaldehyde Hydrazone Metal Complex	37
1.35 Photochromism of SP	40
1.36 Chemical structure of (a)spirooxazine and (b) spiro- pyran	42
1.37 (a) Spirooxazine and (b) spiropyran before and after UV irradiation	42
1.38 Interco version between poly(perhydrosilazane) and silica.....	43
1.39 Schematic representation of PMC-form of SPOH and SPCOOH in silica matrix	43
1.40 Transformation of (a) a spiropyran molecule from spiro (SP) to merocyanine (MC) forms and vice versa, and of (b) perhydropolysilazane to silica.....	45
1.41 Photochromism of SP I.....	46
1.42 Photochromism of 1-Vinylidene-naphthofurans.....	47
1.43 Reversible Photochromic Properties of SP-SO_3^-	48
1.44 Interconversion Pathways between the Different Forms of Spiropyran Derivatives	49
1.45 The reactivity of SP-NO_2 in the presence of UV and visible lights and with the addition of DBU and CO_2 gas.....	51
1.46 Isomeric structures of spiropyran (SP2), and the metal-induced ring-opened MC-Zn^{2+} complex	53
1.47 Structure and color change of SP1 in the presence of CN^- under UV irradiation.....	54
1.48 Structure of bis spiropyran ligand (1).....	56

1.49 Structure of bis spiropyran ligand (2).....	56
1.50 Structures of Photochromic Spiropyran 1	57
1.51 Components of a reversible PR fluid.....	58
1.52 Photochromism of SP solution in cyclohexane in the presence of lecithin and SDC	59
1.53 DASAs, a new platform of visible light organic photoswitches	60
1.54 Effect of UV, Vis irradiation and pH effect on SPCOOH..	61
1.55 Photochromic reactions of two diarylethene nanocrystals..	62
1.56 Acidochromic spiropyran-merocyanine interconversion..	64
1.57 Mechanism of acidochromic spiropyran-merocyanine interconversion	64
1.58 Structure of bodipy- spirooxazine and spiropyran	66
1.59 Some conformers of the open form and the closed form of naphthoxazine	69
1.60 Photochromism of BTE-NA1 and BTE-NA2	70
1.61 Structure of 2-(Phenylazo)imidazoles	71
1.62 Photochromic reaction of a Diarylethene Having an Azulene Ring	72
1.63 Photochromism of the Oxazabicyclic 1	73
1.64 Structure of the Dronpa chromophore in its cis and trans states.....	74
1.65 Photochromic reaction of paracyclophane-bridged imidazole dimer	75
1.66 Open and closed forms of indolylfulgides	76
1.67 Structure of some photochromic dinuclear molybdenum complexes.....	77
1.68 Dinuclear molybdenum complex	78
1.69 Photochromic reaction of aryloxyanthraquinones	79
1.70 Structure of zinc(II) complexes with imidazole derivative	80

1.71 The structural interchange between the SO and MC isomers.....	82
1.72 Molecular structures of (a) spiropyran and (b) four possible isomers of merocyanine.....	83
1.73 Four structures attributed to the different steps of the photocoloration reaction's mechanism	84
1.74 General structures of SPs and their corresponding MCs.....	84
1.75 The photochemical reaction of Py-BIPS.....	86
2.1 Ocean optics diode array spectrometer.....	91
3.1 SP solution in non-polar and polar solvents.....	95
3.2 Effect of the time of UV A-irradiation on the absorption spectrum of 5×10^{-5} M of SP in 1,4-Dioxane	96
3.3 The change in the absorption spectrum of 5×10^{-5} M of SP in 1,4- Dioxane during the dark reaction	96
3.4 Effect of the time of UV A-irradiation on the absorption spectrum of 5×10^{-5} M of SP in benzene.....	97
3.5 The change in the absorption spectrum of 5×10^{-5} M of SP in benzene during the dark reaction	97
3.6 Effect of the time of UV A-irradiation on the absorption spectrum of 5×10^{-5} M of SP in toluene	98
3.7 The change in the absorption spectrum of 5×10^{-5} M of SP in toluene during the dark reaction	98
3.8 Effect of the time of UV A-irradiation on the absorption spectrum of 5×10^{-5} M of SP in cyclohexane.....	99
3.9 The change in the absorption spectrum of 5×10^{-5} M of SP in cyclohexane during the dark reaction	99
3.10 Effect of the time of UV A-irradiation on the absorption spectrum of 5×10^{-5} M of SP in n-hexane.....	100
3.11 The change in the absorption spectrum of 5×10^{-5} M of SP in n-hexane during the dark reaction	100
3.12 Effect of the time of UV A-irradiation on the absorption spectrum of 5×10^{-5} M of SP in methanol	101
3.13 The change in the absorption spectrum of 5×10^{-5} M of SP in methanol during the dark reaction	101
3.14 Effect of the time of UV A-irradiation on the absorption spectrum of 5×10^{-5} M of SP in ethanol	102

3.15 The change in the absorption spectrum of 5×10^{-5} M of SP in ethanol during the dark reaction	102
3.16 Effect of the time of UV A-irradiation on the absorption spectrum of 5×10^{-5} M of SP in DMSO	103
3.17 The change in the absorption spectrum of 5×10^{-5} M of SP in DMSO during the dark reaction	103
3.18 Effect of the time of UV A-irradiation on the absorption spectrum of 5×10^{-5} M of SP in DMF	104
3.19 The change in the absorption spectrum of 5×10^{-5} M of SP in DMF during the dark reaction	104
3.20 First order kinetics plot of the color developing reaction, the back reaction and the color switching cycle of 5×10^{-5} M SP in 1,4-Dioxane	108
3.21 First order kinetics plot of the color developing reaction, the back reaction and the color switching cycle of 5×10^{-5} M SP in benzene	109
3.22 First order kinetics plot of the color developing reaction, the back reaction and the color switching cycle of 5×10^{-5} M SP in toluene	110
3.23 First order kinetics plot of the color developing reaction, the back reaction and the color switching cycle of 5×10^{-5} M SP in cyclohexane	111
3.24 First order kinetics plot of the color developing reaction, the back reaction and the color switching cycle of 5×10^{-5} M SP in n-hexane.....	112
3.25 First order kinetics plot of the color developing reaction, the back reaction and the color switching cycle of 5×10^{-5} M SP in methanol.....	113
3.26 First order kinetics plot of the color developing reaction, the back reaction and the color switching cycle of 5×10^{-5} M SP in ethanol	114
3.27 First order kinetics plot of the color developing reaction, the back reaction and the color switching cycle of 5×10^{-5} M SP in DMSO	115
3.28 First order kinetics plot of the color developing reaction, the back reaction and the color switching cycle of 5×10^{-5} M SP in DMF	116

3.29 The switching cycle of 5×10^{-5} M SP in cyclohexane, DMF and ethanol	117
3.30 Effect of the time of UV A-irradiation on the absorption spectrum of 5×10^{-5} M of SP in 1,4-Dioxane.....	118
3.31 The change in the absorption spectrum of 5×10^{-5} M of SP in 1,4- Dioxane during the back reaction.....	118
3.32 Effect of the time of UV A-irradiation on the absorption spectrum of 5×10^{-5} M of SP in mixed solvents' system (90% Dioxan+10% water)	119
3.33 The change in the absorption spectrum of the back reaction of 5×10^{-5} M of SP in mixed solvents' system (90% Dioxan+10% water).....	119
3.34 Effect of the time of UV A-irradiation on the absorption spectrum of 5×10^{-5} M of SP in mixed solvents' system (80% Dioxan+20% water)	120
3.35 The change in the absorption spectrum of the back reaction of 5×10^{-5} M of SP in mixed solvents' system (80% Dioxan+20% water)	120
3.36 Effect of the time of UV A-irradiation on the absorption spectrum of 5×10^{-5} M of SP in mixed solvents' system (70% Dioxan+30% water)	121
3.37 The change in the absorption spectrum of the back reaction of 5×10^{-5} M of SP in mixed solvents' system (70% Dioxan+30% water)	121
3.38 Effect of the time of UV A-irradiation on the absorption spectrum of 5×10^{-5} M of SP in mixed solvents' system (60% Dioxan+40% water)	122
3.39 The change in the absorption spectrum of the back reaction of 5×10^{-5} M of SP in mixed solvents' system (60% Dioxan+40% water)	122
3.40 Effect of the time of UV A-irradiation on the absorption spectrum of 5×10^{-5} M of SP in mixed solvents' system (50% Dioxan+50% water)	123

3.41 The change in the absorption spectrum of the back reaction of 5×10^{-5} M of SP in mixed solvents' system (50% Dioxan+50% water)	123
3.42 Bar presentation showing the effect of increasing water percentage in the mixed solvents' system of 1,4-dioxane and water on the initial rate constant of the back reaction	125
3.43 First order kinetics plot of the color developing reaction and the back reaction of 5×10^{-5} M SP in 1,4-Dioxane	126
3.44 First order kinetics plot of the color developing reaction and the back reaction of 5×10^{-5} M SP in mixed solvents' system (90% 1,4-Dioxane+10% H_2O).....	126
3.45 First order kinetics plot of the color developing reaction and the back reaction and the color switching cycle of 5×10^{-5} M SP in mixed solvents' system (80% 1,4-Dioxane+20% H_2O).....	127
3.46 First order kinetics plot of the color developing reaction and the back reaction and the color switching cycle of 5×10^{-5} M SP in mixed solvents' system (70% 1,4-Dioxane+30% H_2O)	127
3.47 First order kinetics plot of the color developing reaction and the back reaction and the color switching cycle of 5×10^{-5} M SP in mixed solvents' system (60% 1,4-Dioxane+40% H_2O)	128
3.48 First order kinetics plot of the color developing reaction and the back reaction and the color switching cycle of 5×10^{-5} M SP in mixed solvents' system (50% 1,4-Dioxane+50% H_2O)	128
3.49 The switching cycle of 5×10^{-5} M SP in Mixed solvents' system in 100% 1,4-Dioxane, (90% 1,4-Dioxane+10% H_2O), (80% 1,4-Dioxane+20% H_2O), (70% 1,4-Dioxane+30% H_2O), (60% 1,4-Dioxane+40% H_2O) and (50% 1,4-Dioxane+50% H_2O).....	129
3.50 Effect of the time of UV A-irradiation on the absorption spectrum of SP-PMMA film (SP concentration = 7×10^{-4} M)	130

3.51 The SP-PMMA film before and after UV irradiation	130
3.52 The change in the absorption spectrum of SP –PMMA film during the dark reaction	131
3.53 Effect of the time of UV A-irradiation on the absorption spectrum of 7×10^{-4} M of SP in Methyl methacrylate	131
3.54 The change in the absorption spectrum of 7×10^{-4} M of SP in MMA during the dark reaction.....	132
3.55 Bar presentation shows the polymerization effect on the initial rate constant of back reaction of SP	134
3.56 First order kinetics plot of the color developing reaction, the back reaction and the color switching cycle of 7×10^{-4} M SP in SP-PMMA film	135
3.57 First order kinetics plot of the color developing reaction, the back reaction and the color switching cycle of 7×10^{-4} M SP in MMA	136
3.58 The switching cycle of SP in toluene and in PMMA.....	137
3.59 The change in the absorption spectrum of SP-PMMA film before and after immersing in ethanol for 40 min	138
3.60 The change in the absorption spectrum of SP-PMMA film before and after immersing in ethanol for 2 hours.....	138
3.61 The SP-PMMA film before and after immersing in ethanol.....	139
3.62 Effect of the time of UV A-irradiation on the absorption spectrum of 5×10^{-5} M of SP in 1,4-Dioxane (without lanthanide metal ion addition)	140
3.63 The change in the absorption spectrum of 5×10^{-5} M of SP in 1,4- Dioxane during the dark reaction (without lanthanide metal ion addition)	140
3.64 Effect of the time of UV A-irradiation on the absorption spectrum of SP in 1,4-Dioxane after the addition of Sm^{3+}	141
3.65 The change in the absorption spectrum of SP in 1,4-Dioxane during the dark reaction after the	141

addition of Sm^{3+}	
3.66 Effect of the time of UV A-irradiation on the absorption spectrum of SP in 1,4-Dioxane after the addition of Tb^{3+}	142
3.67 The change in the absorption spectrum of SP in 1,4-Dioxane during the dark reaction after the addition of Tb^{3+}	142
3.68 Effect of the time of UV A-irradiation on the absorption spectrum of SP in 1,4-Dioxane after the addition of Gd^{3+}	143
3.69 The change in the absorption spectrum of SP in 1,4-Dioxane during the dark reaction after the addition of Gd^{3+}	143
3.70 Bar presentation represents the effect of the lanthanides addition on the initial rate constant of the back reaction.....	145
3.71 First order kinetics plot of the color developing reaction and the back reaction of 5×10^{-5} M SP in 1,4-Dioxane	146
3.72 First order kinetics plot of the color developing reaction and the back reaction of SP in 1,4-Dioxane after the addition of Sm^{3+}	146
3.73 First order kinetics plot of the color developing reaction and the back reaction of SP in 1,4-Dioxane after the addition of Tb^{3+}	147
3.74 First order kinetics plot of the color developing reaction and the back reaction of SP in 1,4-Dioxane after the addition of Gd^{3+}	147
3.75 The switching cycle of SP in 1,4-Dioxane without the addition of lanthanide ions and after the addition of Gd^{3+} , Tb^{3+} , Sm^{3+} ions	148

LIST OF TABLES
