MR Enterography in Small Intestinal Lesions in Children

Essay

Submitted for Partial Fulfillment of Master Degree in Radiodiagnosis

By Omar Mohamed Hassan Iman

M.B.B.Ch., Red Sea University – Sudan

Under Supervision of Prof. Dr. Sameh Mohamed Abd El-Wahab

Professor of Radio Diagnosis Faculty of Medicine- Ain-Shams University

Dr. Shaimaa Abdelsattar Mohammad

Assistant Professor of Radio Diagnosis Faculty of Medicine- Ain Shams University

Faculty of Medicine
Ain Shams University
2017

سورة البقرة الآية: ٣٢

Acknowledgement

First of all, I would like to express my deep gratitude to ALLAH for his care and generosity throughout my life...

I would like to express my sincere appreciation and my deep gratitude to Prof. Sameh Mohamed Abd El-Wahab, Professor of Radio Diagnosis, Faculty of Medicine — Ain Shams University for his valuable advises and support through the whole work and for dedicating much of his precious time to accomplish this work. I would like to express my sincere appreciation and my deep gratitude to Dr. Shaimaa Abdelsattar Mohammad, Assistant Professor of Radio Diagnosis, Faculty of Medicine - Ain Shams University sincere efforts, fruitful encouragement and guidance. No words could adequately express my deep appreciation to My Family, especially My Parents for their continuous support and guidance. I shall remain indebted to them all my life.

(2) Omar Mohamed

Subject	Page No.
List of Abbreviations	I
List of Tables	III
List of Figures	IV
Introduction	1
Aim of the Work	5
Chapter (1): Technique of MRI enterograp	ohy in children. 6
Chapter (2): Normal MRI enterographic f	inding 39
Chapter (3): Pathologic and MRI features	of small bowel
diseases in children	59
Illustrative Cases	112
Summary	117
References	121
Arabic Summary	······

Tist of Abbreviations

Abb.	Full Term
AIDS	Acquired immune deficient syndrome
CD	Crohns disease
CDEIS	Crohns disease endoscopic index of severity
СТ	Computed tomography
FISP	Fast imaging steady state precession
FLASH	Fast low angle shot
FSE	Fast spin echo
GBCAs	Gadolinium based contrast agents
GFR	Glomerular filtration rate
GIT	Gastro intestinal tract
GRE	Gradient echo
HASTE	Half fourier acquisition single shot turbo spin echo
IBD	Inflammatory bowel disease
LAO	Left anterior oblique
MDCT	Multi detector computed tomography
MRA	Magnetic resonance angiography
MRE	Magnetic resonance enterography
MRI	Magnetic resonance imaging
NG	Nasogastric tube
NSF	Nephrogenic systemic fibrosis
PEG	Polyethylene glycol
PSC	Primary scelerosing cholangitis
RAO	Right anterior oblique

List of Abbreviations

Abb.	Full Term
RF	Radio frequency
SBCE	Small bowel capsule endoscopy
SMA	Superior mesenteric artery
SNR	Signal to noise ratio
SPGR	Spoiled gradient recalled
SSFP	Steady state free precession
T1	T1 weighted MRI
T2	T2 weighted MRI
ТВ	Tuberculosis
TR	Repetition time
TSE	Turbo spin echo
VIBE	Volumetric interpolated breath hold examination

	Coronal contrast-enhanced fat-suppressed	
37	T1-weighted 3D gradient-echo image showing	78
	Comb sign	
	Coronal HASTE and true FISP MR images	
38	showing mesenteric lymphadenopathy in a	79
	patient with Cohn's disease	
39	Coronal high-resolution true FISP MR image	81
37	showing entero-enteric fistula	01
40	Coronal high-resolution true FISP MR image	82
40	showing ileo-cecal fistula	02
41	Enterovesical fistula in MRE images in a 49-	83
71	year-old woman with Crohn's disease	03
	Contrast-enhanced MR image obtained with	
42	fat suppression showing an abscess in the	84
	terminal ileum	
	Axial 2D steady-state free precession image	
43	showing multiple hypointense filling defects	86
	in gallbladder	
	Axial T2-weighted fat-saturated fast spin-	
44	echo image shows dilated, irregular	87
	intrahepatic bile ducts.	
	Coronal SSFSE and contrast-enhanced coronal	
45	3D T1-weighted fat-saturated spoiled	88
	gradient-recalled echo showing complex	
	fistula	
	Coronal 2D steady-state free precession	
46	images of 18-year-old girl show dilated, fluid-	89
	filled fallopian tubes	
	Axial T1-weighted 3D contrast-enhanced	
47	spoiled gradient-recalled (SPGR) echo image	90
	showing labial swelling. shows extensive	
	bilateral enhancement of vulvar structures	

Table	Title	Page
48	Axial T2-weighted fat-saturated fast spin- echo image shows hyperintense linear abnormality in anal sphincter consistent with perianal fistula.	91
49	Axial T2-weighted single-shot fast spin-echo image shows large perianal skin tag	92
50	Coronal contrast T1-weighted fat-suppressed image and Transverse true FISP sequence shows a soft tissue flat polyp	95
51	Coronal true FISP and Axial T1-weighted sequences showing jejunal haemangioma	96
52	Coronal and axial half-Fourier acquired single-shot turbo spin-echo (HASTE) sequence showing infiltrative adenocarcinoma	98
53	Coronal and axial true FISP image and Coronal contrast-enhanced T1-weighted GRE image	99
54	Coronal HASTE sequence, Coronal contrast- enhanced T1-weighted GRE and Diffusion coronal showing MR images of an ileal lymphoma	101
55	Coronal FISP and Coronal gadolinium- enhanced T1-weighted fat-suppressed 3D VIBE images showing Polyps with Peutz- Jeghers syndrome	103
56	Coronal FISP MRE image demonstrating ileal loop dilatation, a transition point, and normal distal caliber	105

Table	Title	Page
	Axial FISP and Coronal FISP images showing	
57	jejunal intussusception and narrowing with	106
	resultant obstruction	
	Coronal FISP and Coronal gadolinium-	
58	enhanced T1-weighted fat-suppressed 3D	107
	VIBE images	
	Coronal FISP image from MR enterography	
59	shows an increased number of folds in ileal	110
	loops.	
	Coronal FISP image from MR enterography	
60	shows a round, fluid-filled lesion in	111
	communication with the duo- denum.	

Introduction

Aim of the Work
