ACKNOWLEDGMENT

All praise and glory to Allah the Most Merciful the Most Kind.

My sincere and earnest thanks to my beloved mother for her continuous support, guidance and encouragement.

My deepest gratitude and appreciation to my thesis advisors Prof. Dr. Abdelhalim Zekry, Prof. Dr. Imbaby Mahmoud and Assistance Prof. Dr. Hussein Elsayed for their continuous guidance, encouragement and support throughout my work and in the writing of the dissertation. I am truly indebted and thankful for their great efforts that helped bring this thesis to fruition.

Especial gratitude to my friends Eng. Amin Elsaed, Eng. Zohdy Sayed and Eng. Allam Shihata for their technical support and encouragement. Many thanks to all friends and colleagues in Thebes Academy, Telecom Egypt and Atomic Energy Authority.

Finally, I would like to express my gratitude to Atomic Energy Authority for its financial, technical and time support.

Statement

This dissertation is submitted to Ain Shams University in partial fulfillment of the degree of Master of Science in Electrical Engineering (Electronics and Communications Engineering).

The work included in thesis was carried out by the author at the laboratories of the department of Engineering and Scientific Instrument, Nuclear Research Center, Atomic Energy Authority.

No part of this thesis has been submitted for a degree or qualification at any other university or institute.
