ACKNOWLEDGMENT

Above all and first of all thanks to **ALLAH**

I would like to express my sincere thanks and deepest gratitude to **DR. FATEN MOHAMED KAMEL**, Assist. Prof. of Radiodiagnosis, Faculty of Medicine, Ain Shams University, who suggested the topic and offered me the useful criticism and suggestion throughout this study. Her precious guidance and continued supervision that were kindly given are beyond acknowledgment.

I'm deeply grateful to **DR. ABEER MAGHAWRY A. HAMEED**, Lecturer of Radiodiagnosis, Faculty of Medicine, Ain Shams University, who has been deeply concerned about my work. Her continuous help and kind collaboration in the supervision of this work are greatly value.

My sincere gratitude to my family, friends, colleagues for their favourable assistance which led to the work.

SAFWAT EZZAT

2001

CONTENTS

INTRODUCTION	1
AIM OF THE WORK	3
EMBRYOLOGY OF THE PROSTATE	4
ANATOMY OF THE PROSTATE	7
PATHOLOGY OF PROSTATE CANCER	24
IMAGING OF THE NORMAL PROSTATE	38
- TRUS (technique, normal appearance).	38
- MRI (technique, normal appearance).	51
DIAGNOSIS OF PROSTATE CANCER	65
- DRE	65
- TRUS of prostate cancer	67
- MRI of prostate cancer	83
- Early detection and screening of prostate cancer	101
- Comparison of DRE, TRUS, MRI in diagnosis of prostate cancer	106
SUMMARY AND CONCLUSION	115
REFERENCES	117
ARABIC SUMMARY	

LIST OF ABBREVIATIONS

AAH	Atypical Adenomatous Hyperplasia
BPH	Benign Prostatic Hyperplasia
CM	Contrast Medium
CT	Computerized Tomography
CZ	Central Zone
DRE	Digital Rectal Examination
FSE	Fast Spin – Echo.
GD-DTPA	Gadolinium-Diethylene Triamine – Pentaacetic-Acid
LN	Lymph Node
MRI	Magnetic Resonance Imaging
MHz	Mega Hertz
PIN	Prostatic Intraepithelial Neoplasia
PSA	Prostatic Specific Antigen
PZ	Peripheral Zone
TR	Time of Repetition
TRUS	Transrectal Ultrasound
Turbo Flash	Turbo Fast low angled shot
TURP	Transurethral Resection of Prostate
TZ	Transition Zone

LIST OF TABLES

<i>Table (1) :</i>	Zonal concept of the prostate anatomy	10
<i>Table (2) :</i>	Gleason's microscopic grading system of prostatic carcinoma.	31
<i>Table (3):</i>	Jewett – Whitmore staging system for prostate cancer.	32
<i>Table (4):</i>	TNM staging system.	34
<i>Table (5):</i>	Comparison of TNM and Jewett- Whitmore staging system.	35
<i>Table (6):</i>	MRI prostate cancer staging.	100

LIST OF FIGURES

Fig. (53) :	Osteoblastic bony metastasis from prostatic carcinoma stage D2. Transaxial T1-weighted image (MRI).	99

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that proper record-keeping is essential for ensuring transparency and accountability in the organization's operations. This section also highlights the need for regular audits and reviews to identify any discrepancies or areas for improvement.

2. The second part of the document outlines the various methods and tools used for data collection and analysis. It describes how different types of data are gathered, processed, and analyzed to provide meaningful insights into the organization's performance. This section also discusses the importance of using reliable and valid data sources to ensure the accuracy of the findings.

3. The third part of the document focuses on the interpretation and application of the data. It explains how the collected data is used to identify trends, patterns, and potential risks. This section also discusses the importance of communicating the findings effectively to the relevant stakeholders and using the information to make informed decisions and implement necessary changes.

4. The fourth part of the document discusses the challenges and limitations of the data analysis process. It identifies common issues that may arise during data collection, processing, and analysis, and provides strategies to overcome these challenges. This section also discusses the importance of being aware of the limitations of the data and the analysis to avoid drawing incorrect conclusions.

5. The fifth part of the document provides a summary of the key findings and conclusions. It highlights the main results of the data analysis and discusses their implications for the organization's future operations. This section also provides recommendations for further research and action to improve the organization's performance and achieve its goals.
