

Analytical Study on Certain Polycyclic Aromatic Hydrocarbonic Pollutants

Thesis

Presented for the partial fulfillment of

**Master Degree in Pharmaceutical Sciences
(Pharmaceutical Analytical Chemistry)**

By

Sherif Mahmoud El-Sayed Okeil

B.SC. Pharmaceutical Sciences 2009

**Department of Pharmaceutical Analytical Chemistry
Faculty of Pharmacy
Ain Shams University**

Under the Supervision of

Prof. Dr.

Amira Mabrouk El-Kosasy

**Professor and Head of Pharmaceutical Analytical Chemistry Department
Faculty of Pharmacy
Ain Shams University**

Dr. Omar Abdel-Aziz Ghonim

**Associate Professor of Pharmaceutical Analytical Chemistry
Faculty of Pharmacy
Ain Shams University**

**Pharmaceutical Analytical Chemistry Department
Faculty of Pharmacy – Ain Shams University**

2013

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

((قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا إِلَّا هَا

خَلَّفْتَنَا بِكَ أَنْتَ الْعَلِيُّ

الْحَكِيمُ))

صدق الله العظيم

سورة البقرة آية (٣٣)

ACKNOWLEDGEMENT

All thanks and gratitude is to my lord Allah, who has given me the strength and will to finish this work. Words and thanks will never suffice to praise Allah for his mercy, blessings and guidance that lead me through the tough times.

I would like to express my deepest gratitude and sincere appreciation to **Prof. Dr. Amira Mabrouk El-Kosasy**, Professor of Pharmaceutical Analytical Chemistry, Faculty of Pharmacy, Ain Shams University, for her kind and expert supervision, patience, unlimited support, generous assistance, and for the extensive effort, time and energy. I will always be indebted to her kindness and continuous encouragement. It's really an honor to be one of her students.

My profound thanks are to **Associate Prof. Dr. Omar Abdel-Aziz**, Associate Professor of Pharmaceutical Analytical Chemistry, Faculty of Pharmacy, Ain Shams University, who was always supporting me with great patience, constructive advice, continuous encouragement and valuable assistance throughout the whole work. It's really an honor to be one of his students.

I am very grateful to my father, brother, sister and especially my dear mother for standing by me in every step, for their praying, their continuous support and encouragement all the way through and giving me all the strength and faith more than I needed.

Finally my sincere appreciation and thanks go to all my colleagues and staff members in Analytical Chemistry Department, for their friendly cooperation and constant support.

Sherif Okeil

List of Figures

Figure 29 Chemical structure of calix(8)arene	93
Figure 30 Comparison of the fluorescence intensity enhancement of benzo(a)pyrene produced by (a) 32 $\mu\text{g/ml}$ beta-cyclodextrin and (b) 13.8 $\mu\text{g/ml}$ calix(8)arene.....	103
Figure 31 Effect of concentration of the cavidant beta-cyclodextrin on the fluorescence intensity of benzo(a)pyrene.....	104
Figure 32 Effect of concentration of the cavidant calix(8)arene on the fluorescence intensity of benzo(a)pyrene	104
Figure 33 Effect of the temperature on the fluorescence intensity of benzo(a)pyrene using beta-cyclodextrin as fluorescence enhancer.....	105
Figure 34 Effect of the temperature on the fluorescence intensity of benzo(a)pyrene using calix(8)arene as fluorescence enhancer	105
Figure 35 Synchronous spectra of 36 ng/ml benzo(a)pyrene at different $\Delta\lambda$ obtaining the best spectrum at $\Delta\lambda=120\text{nm}$	106
Figure 36 Calibration curve correlating the peak amplitude at 280 nm of synchronous fluorescence spectrum to the corresponding concentration of benzo(a)pyrene using beta-cyclodextrin as fluorescence enhancer.....	107
Figure 37 Calibration curve correlating the peak amplitude at 280 nm of synchronous fluorescence spectrum to the corresponding concentration of benzo(a)pyrene using calix(8)arene as fluorescence enhancer	107
Figure 38 (a) and (d) Excitation and Emission spectra of anthracene, (b) and (c) Excitation and Emission spectra of naphthalene.	123
Figure 39 (a) Synchronous spectrofluorimetric spectrum of naphthalene at $\Delta\lambda=60\text{nm}$, (b) Synchronous spectrofluorimetric spectrum of anthracene at $\Delta\lambda=60\text{nm}$	124
Figure 40 (a) Synchronous spectrofluorimetric spectrum of anthracene at $\Delta\lambda=160\text{nm}$, (b) Synchronous spectrofluorimetric spectrum of naphthalene at $\Delta\lambda=160\text{nm}$	125
Figure 41 Calibration curve correlating the peak amplitude at 259 nm of synchronous fluorescence spectrum at $\Delta\lambda=60\text{nm}$ to the corresponding concentration of naphthalene.....	126
Figure 42 Calibration curve correlating the peak amplitude at 235 nm of synchronous fluorescence spectrum at $\Delta\lambda=160\text{nm}$ to the corresponding concentration of anthracene.....	126
Figure 43 (a) and (b) Excitation and Emission spectra of alpha-naphthol, (c) and (d) Excitation and Emission spectra of beta-naphthol.....	143
Figure 44 Effect of the constant wavelength difference $\Delta\lambda$ on the synchronous spectra of alpha-naphthol.....	144
Figure 45 Effect of the constant wavelength difference $\Delta\lambda$ on the synchronous spectra of beta-naphthol.....	145
Figure 46 (a) Synchronous spectrofluorimetric spectrum of alpha-naphthol at $\Delta\lambda=171\text{ nm}$, (b) Synchronous spectrofluorimetric spectrum of beta-naphthol at $\Delta\lambda=171\text{ nm}$	146
Figure 47 (a) Synchronous spectrofluorimetric spectrum of alpha-naphthol at $\Delta\lambda=80\text{nm}$, (b) Synchronous spectrofluorimetric spectrum of beta-naphthol at $\Delta\lambda=80\text{nm}$	147
Figure 48 First derivative synchronous spectra of (a) alpha-naphthol and (b) beta-naphthol at $\Delta\lambda=171\text{nm}$	148
Figure 49 Second derivative of (a) alpha-naphthol and (b) beta-naphthol at $\Delta\lambda=80\text{nm}$	149
Figure 50 First-derivative synchronous spectra of alpha-naphthol at $\Delta\lambda=171\text{ nm}$	150
Figure 51 Second-derivative synchronous spectra of beta-naphthol at $\Delta\lambda=80\text{ nm}$	151
Figure 52 Calibration curve correlating the D^1 value at 263 nm of synchronous fluorescence spectrum at $\Delta\lambda=171\text{nm}$ to the corresponding concentration of alpha-naphthol	152
