ACKNOWLEDGMENT

First of all, I am deeply grateful to Allah. Coming from the intense gratification of my supervisors whose contribution raised the quality of this thesis. They have always lent me their scholarly, critical scientific insight and enthusiasm for science. They have patiently guided me and spent many hours producing their respective effectors. I am very grateful for their supervision and I owe them the greatest degree of appreciation.

*I would like to express my deepest gratitude and appreciation to **Prof. Dr./ Fatin A. Moneim Annos**, professor of general surgery, Faculty of Medicine, Ain Shams University, for his great supervision and encouragement endless contributions and it was great honor to finish this work under his supervision.*

*Particular appreciation to Prof. **Dr./ Alaa Abbas Sabry**, Professor of general surgery, Faculty of Medicine, Ain Shams University for his guidance during the preparation of this essay and for sponsoring this work, the extensive time and tremendous effort to offer every possible help to finish this essay.*

*I am deeply indebted to Prof. **Dr./ Samy Ahmed Abdel Rahman** Lecturer of general surgery, Faculty of Medicine, Ain Shams University, for his guidance, continuous advice and for his valuable discussion during the preparation of this essay.*

To all of the many unnamed individuals who shared in the multidisciplinary care of our patients, I owe a special gratitude. And to those whose attention to the details has been an indispensable asset throughout the preparation of this work,

DEDICATION

I dedicate this to my loving family and the spirit of my father, whose familiarity and awareness of this work was very helpful. Who understood and silently suffered during the time devoted to its production.

To all their cooperation, I am most grateful. Finally, Thank for Unending Patience and Love.

List of Contents

Title	Page
Introduction	1
Aim of the work	4
Review of Literature	5
Chapter 1: Definition of obesity:	5
Chapter 2: Etiology of Obesity:	7
Chapter 3: Pathogenesis Of Obesity:	11
Chapter 4: Associated Diseases With Obesity:	14
Chapter 5: Current Management Of Obesity:	22
Chapter 6: Non Surgical Management of Obesity:	24
Chapter 7: Surgical Management of Morbid obesity:	33
Chapter 8: Gastroplasty:	35
Chapter 9: Gastric Bypass:	41
Chapter 10: Malabsorptive Obesity Surgery:	49
Chapter 11 Laparoscopic surgery for Morbid obesity:	59
Chapter 12: Outcome Of Surgery:	78
Chapter 13: Complications of Surgery For Obesity:	81
Chapter 14: Re Operative Bariatric Surgery:	96
Chapter 15: Revisional Bariatric Surgery:	98

List of Figures

Fig. No.	Title	Page No.
1.	Vertical banded gastroplasty	37
2.	Rate of cumulative weight loss after vertical gastroplasty.	39
3.	Percentage of patients post vertical banded gastroplasty (VBG) maintaining 50% excess weight loss over time	40
4.	Percentage of patients post vertical banded gastroplasty	42
5.	Conventional Roux-en-Y gastric bypass.	43
6.	Vertical transected Roux-en-Y gastric bypass	45
7.	Gastric bypass	47
8.	Postoperative weight loss after RYGB.	50
9.	Bilio-pancreatic diversion	51
10.	Surgical techniques of bilio-pancreatic diversion.....	53
11.	A scopinaro-type biolo-pancreatic diversion	54
12.	Duoderal switch	63-64
13.	Laparoscopic gastric bypass	69
14.	The lap-Band system.....	72
15.	Elimination of stapled partition with a gastrogastrostomy	73
16.	Closure of gastrostomy sites	74
17.	Postoperative barium swallow and complications.....	76
18.	Elimination of stapled partition with a gastrogastrostomy	99

19. Closure of gastrostomy sites with polypropylene band remaining in situ.....	99
20. Examples of patients had a RYGB operation	108
21. Examples of patients had a VBG operation.....	109
22. Vertical Banded Gastroplasty	110
23. Stomal ulceration	117
24. Stomal stenosis.....	117
25. Stomal stenosis.....	118
26. Examples of successful weight loss after VBG	119
27. Examples of successful weight loss after RYGB	120
28. The mean BMI before and after surgery.....	121
29. The mean BMI before and after surgery.....	125
30. Different causes of failure of RYGB	125
31. Shows the mean \pm SD of body weight before and one year after the first operation	127
32. Failure rate (%) after the first operation	128
33. Early minor and major postoperative complications between BVG and RYGB as a 1 st operations	132
34. Early minor and major postoperative complications for BVG and RYGB as a 2 nd (Redo) operations.....	134
35. Early morbidity and mortality for the 1 st and Redo operations	136
36. Mean BMI before and 6 month after RYGB as a 2 nd operation for failed VBG among sweet eaters	137

37. Mean BMI before and after VBG 2nd with restapling of the stomach with or without division after failed VBG due to staple line disruption	138
38. Mean BMI before and after VBG 2nd with restapling and decrease pouch size after failed VBG due to pouch dilatation.....	139
39. Shows the mean BMI before and 6 months after the redo operations	141
40. Show the incidence of G.I. leakage after first surgery.....	142
41. Shows the incidence of GI leakage among our patient groups after the first surgery	143
42. No of patients with postoperative incisional hernia after first surgery	145
43. Shows the incidence incisional hernia after the first surgery inrelation to postoperative period	147
44. Repeated incisional hernia with dermolipectomy	148
45. The incidence of gall stones at one year after the first operation.....	150
46. Distribution of patients in the present study	160

List of Table

Table. No.	Title	Page No.
1.	Classification of overweight and obesity by BMI and associated disease risk.....	5
2.	Surgical management of obesity	22
3.	Drugs used to treat obesity.....	26
4.	Indications for pharmacologic treatment for obesity.....	31
5.	Shows the conventional criteria used in selecting patients for obesity operations. Body mass index is used in evaluation of potential surgical candidates.....	34
6.	Side effects after BPD.....	55
7.	Demographic characteristics of studied patients	111
8.	Operative time and hospital stay in studied patients in 1 st surgery.....	112
9.	Distribution of pre-operative co-morbidities	113
10.	Operative complications in studied patients	114
11.	Mortalities and its causes in is studied patients after 1 st surgery.....	114
12.	Early minor postoperative complications in studied patients	115
13.	Early major postoperative complications in studied patients	116
14.	Late postoperative complications in studied patients	117

15. Body mass index in studied patients before and after the 1 st operation.....	121
16. Details of (29 patients) Patients with failed weight loss after the first operation.....	123
17. Reasons for failed weight loss in studied patients	125
18. Comparison between the mean \pm SD of BMI before and one year after the 1 st operation.....	126
19. Comparison between the mean \pm SD of body weight before and one year after the 1 st surgery.....	126
20. Comparison between the failure rate after VBG and RYGB as a first operation.....	127
21. The Re-do operations (29) in relation to the causes of failure of first operation	128
22. Mean operative time and mean hospital stat in studied patients in Re-do surgery	129
23. Mortalities and its causes after Re-do surgery	129
24. Operative complications in studied patients after Re-do surgery.....	130
25. Early minor postoperative complications after re-do surgery.....	130
26. Early major postoperative complications after re-do surgery.....	131
27. Late postoperative complications in studied patients	131
28. Comparison between early minor, major postoperative complications and mortality rate between VBG and RYGB as 1 st operation	132

29. Comparison between early minor and major postoperative complication rates and mortality rate between VBG and RYGB as a 1 st operation.....	133
30. Comparison between early minor, major postoperative complication rate between VBG and RYGB at 2 nd (Redo) operation	134
31. Comparison between early morbidity and mortality between the 1 st and redo operations	135
32. Comparison between the mean \pm SD of BMI before and after RYGB as a second operation after failed VBG among sweet eaters.....	137
33. Comparison between the mean \pm SD of BMI before and after VBG 2 nd with restapling of the stomach with or without division of the stomach due to disruption of staple line after VBG	138
34. Comparison between the mean \pm SD of BMI after failed VBG due to pouch dilatation	139
35. Comparison between the mean \pm SD of BMI before and 6 months after the Re-do operations	141
36. The incidence of gastro-intestinal leakage after the first operation	142
37. The incidence of gastro-intestinal leakage among our patient groups after the first surgery	143
38. Incidence of incisional hernia in relation to age, sex and diabetes.....	146
39. Incidence of incisional hernia in relation to postoperative period.....	147
40. Incidence of incisional hernia with other associated complications	148

41. Incidence of incisional hernia within 6 months postoperatively in relation to major wound complications, post operative peritonitis and Early re-operation procedure	149
42. Comparison between the mean operative time and mean hospital stay for the present study and others	152
43. Comparison between mortalities for the present study and others	153
44. The incidence of leakage for similar studies.....	155
45. Comparison between the incidence of incisional hernia in the present study and others.....	165

List of abbreviations

%	Percent
>	more
1 st	First
2 nd	Second
3 rd	Third
4 th	Forth
5 th	Fifth
A- ANOVA.....	Analysis of variance
ASGB.....	Adjustable silicone gastric banding
B- B3.....	Beta3
BMI.....	Body mass index
BPB-DD.....	Bilio-Pancreatic bypass with duodenal diversion, B ₁ , B ₂ , B ₃ : Beta-adrenergic receptors
BPD.....	Bilio-pancreatic diversion
BPD-DS	Bilio-pancreatic diversion with duodenal switch.
BW	Body weight
C- Cal	Calorie
CC	Cubic centimeter
CHD	Coronary heart disease
Cm.....	centimeter
CNS.....	Central nervous system
CPAP	Continuous positive airway pressure
CRP	C reactive protein
CT	Computed tomography
D- DM.....	Diabetes mellitus
DVT	Deep venous thrombosis
E- EEA.....	End to end anastomosis
EKG	Electro-cardiogram

F- FDA.....Food and drug administration
 FeFerrous sulphate
 FigFigure
 G- GB.....Gastric band
 GBP.....Gastric bypass procedure
 GERDGastro-esophageal reflux disease
 GIAGastrointestinal anastomosis
 GIT.....Gastrointestinal tract
 GLP-1Glucagon-link peptide-1
 H- H₂histamine receptor
 HDLHigh density lipoprotein
 H-PyloriHelicobacter pylori
 Hrs.....hours
 Hthight
 I- IL-6.....Interleukin-6

 J- JIB.....Jejunoilial bypass
 K- Kcal.....Kilo Calorie
 KgKilogram
 Kg/m²Kilogram by squared meters
 L- LDollar
 Lap Band.....Laparoscopic gastric banding
 LapLaparoscopic
 LDL.....Low density lipoprotein
 LSAGBLaparoscopic silicone adjustable gastric
 banding
 M- mmeter
 m/f.....male/female
 M².....Squared meter
 Mg/d.....milligram/day
 minMinute

ml	Milliliter
Mm.....	Millimeter
N- n	Number
NIDDM.....	Non insulin dependent diabetes mellitus
NIH	National institute of health
NPO	Nothing per OS.
NSAID	Non-steroidal anti-inflammatory drugs
P- PE	Pulmonary embolism
R- r test.....	Pearson correlation coefficient test
RYGB	Roux-en-Y-Gastric bypass
S- SBO	Small bowel obstruction
SC	Subcutaneous
SD	Standard deviation
SD	Standard deviation
T- t.i.d.	three times/day
Tab	table
TNF.....	Tumour necrosis factor
t-test	Student t test
U- U/S	Ultrasonography
UGIE.....	Upper gastrointestinal endoscopies
UPPP.....	Uvulo-palatopharyngo-plasty
V- VBG.....	Vertical banded gastroplasty
W- WK.....	Week
Y- Yr.....	Year
