

GEOELECTRIC AND MAGNETIC PROSPECTION TO DELINEATE GROUNDWATER OCCURRENCES AT WADI HAGUL- NORTHWESTERN PART OF EASTERN DESERT- EGYPT

Submitted For

The degree of Philosophy Doctor (Ph. D.) of science in Geophysics (Applied Geophysics)

PHD Thesis

By Osama Hanafy Mahmoud Hamza Salama

B. Sc., Geophysics, Cairo University
M. Sc., Applied Geophysics, Suez Canal University

To

Geophysics Department, Faculty of Science Ain Shams University

Supervised By:

Prof. Dr. Mahdy Mohamed Ahmed Abd El-Rahman

Late Prof. of geophysics, Geophysics Department, Faculty of Science, Ain Shams University, Cairo.

Prof. Dr. Salah El- Deen A. Mousa

Prof. of Applied geophysics, Geophysics Department, Faculty of Science, Ain Shams University, Cairo.

Prof. Dr. Abdel - Rady Ghreeb Hassaneen

Late Prof. of geophysics, National Research Institute of Astronomy and Geophysics, Helwan, Cairo.

Prof. Dr. Sultan Awad Sultan Araffa

Prof. of geophysics, National Research Institute of Astronomy and Geophysics, Helwan, Cairo.

Cairo 2014

ACKNOWLEDGMENT

Praise to ALLAH, who aided and guided me to bring forth this thesis to light.

ALLAH first and final should be acknowledged for helping me and my countless thanks will never be sufficient.

I am profoundly grateful and indebted to My Dear Prof. Dr. Salah El din

Abdel Wahab, Prof. of Geophysics, Geophysics department, faculty of science, Ain

Shams University for his generous supervision, professional observations, and
experienced guidance. Also, to my Dear brother Prof. Dr. Sultan Awad Sultan

Prof. of Geophysics, Geoelectric and Geothermic Lab., Geomagnetic and Geoelectric

Department, National Research Institute of Astronomy and Geophysics for all his
supporting, encouraging, guiding and helping me during all stages of this work.

Sincere thanks to the spirits of Prof. Dr. Abdel Rady Gh. Hassaneen Prof. of Geophysics, Geoelectric and Geothermic Lab., Geomagnetic and Geoelectric Department, National Research Institute of Astronomy and Geophysics and Prof. Mahdy Abdel Rahman, Prof. of Geophysics, Geophysics department, faculty of science, Ain Shams University

Also, I would to express my deep gratitude to **Dr. El Said Ragab**, Head of Geomagnetic and Geoelectric Department, National Research Institute of astronomy and Geophysics (NRIAG), Helwan, and to my dear brothers **Dr. Hany Salah Mesbah**, **Dr. Mamdouh Mohamed Soliman**, and **Dr. Usama Saad Masoud** all for their continuous encouragement, patience, guidance and all assistance they provided and supported me during all stages of this work.

Deep thanks to all my colleagues and brothers of the geoelectric and geothermic laboratory (NRIAG) for their valuable help during the field and office work.

OSAMA HANAFY MAHMOUD SALAMA

| Chapter (1) - GERENRAL GEOLOGIC SETTING | |
| 1.1. Introduction: | 1 |
| 1.2 Geomorphology: | 3 |
| 1.2.1 Wadi Ghweiba:- | 3 |
| 1.2.2 Wadi El Badaa:- | 3 |
| 1.2.3 Wadi Okheider:- | 3 |
| 1.2.4 Wadi El Ramia:- | 4 |
| 1.2.5 Wadi Tawariq:- | 4 |
| 1.2.6 Wadi El Naga:- | 4 |
| 1.2.7 Wadi Hommath:- | 4 |
| 1.2.8 Wadi Hagul:- | 5 |
| 1.2.9 The coastal plain:- | 5 |
| 1.3 Surface Geology: | 5 |
| 1.3.1 Middle Eocene (E2) | 6 |
| a. Hof Mountain Formation | 7 |
| b. Ramia Formation | 7 |
| c. Suez Formation | 7 |
| 1.3.2 Upper Eocene (E3) | 7 |
| 11 \ | |

| a. Wadi Hof Formation | 8 |
|---------------------------------------|----|
| b. Okheider mountain | |
| succession | 8 |
| 1.3.3 Oligocene (OL) | 9 |
| 1.3.4 Lower Miocene (M1) | |
| Sadat Formation: | 9 |
| 1.3.5 Middle Miocene (M2) | 9 |
| a. Hommath Formation | 9 |
| b. Wadi Okheider and wadi | |
| Ghweiba succession | 10 |
| 1.3.6 Upper Miocene (M3) | 10 |
| a. Wadi Okheider Succession | 10 |
| b. Hagul Formation | 11 |
| 1.3.7 Quaternary:- | 11 |
| a- Alluvium (AL) | 11 |
| b- Wadi deposits (QW) | 11 |
| c- Coastal sands (S.S) | 11 |
| d- Sabkha (SB) | 12 |
| 1.4 Surface Structures and Tectonics: | 12 |
| 1.4.1 Surface structures of the | |
| study area | 12 |
| 1.4.2 Tectonic elements of | |
| Northeastern Egypt | 13 |
| A- North Egypt fold-fault belt: | 13 |
| 1- North Sinai folds and | |
| associated faults: | 13 |
| 2- Folds of the northeastern | |
| and western deserts: | 14 |

| 3- Sinai hinge belt: | 14 |
|----------------------------------|----|
| 4- Central Sinai fault | |
| (Themed): | 15 |
| B- The Suez rift: | 15 |
| C- The Cairo-Suez district: | 15 |
| D- The Dead Sea fault: | 16 |
| 1.5. Subsurface stratigraphy | 16 |
| 1. 6. Climatic conditions: | 18 |
| 1.6.1 Temperature: | 18 |
| 1.6.2 Humidity: | 18 |
| 1.6.3 Rainfall: | 18 |
| 1. 7. Previous Work | 18 |
| 1.7. 1. Previous stratigraphic | |
| study: | 18 |
| 1.7.2. Previous work on the | |
| application of remote sensing in | |
| geology | 20 |
| 1.7. 3 Previous geophysical and | |
| structural study | 21 |
| | |
| Chapter (2) - MAGNETIC | |
| METHOD | |
| METHOD | |
| 2.1. Introduction: | 24 |
| 2.2. Magnetic Data | 26 |
| 2.2.1. Data acquisition | 26 |
| 2.2.2. Data corrections: | 27 |
| | |

| List of Contents | |
|---|----|
| 2.2.3. Data description: | 28 |
| 2.3. Reduction to The Magnetic Pole | 30 |
| 2.3.1. Concept of the reduction to | |
| the pole: | 30 |
| 2.3.2. Description of the reduced to | |
| the magnetic pole map | 31 |
| 2.4. Magnetic Separation | 32 |
| 2.4.1.Regional anomalies in relation | |
| to the deep-seated inferences | 32 |
| 2.4.2. Residual anomalies in relation | |
| to the shallow-seated features | 33 |
| 2.5. Magnetic Depth Determination | 34 |
| 2.5.1. Eular's deconvolution | 34 |
| 2.5.1.1. Theory of the Eular's | |
| deconvolution | 35 |
| 2.5.1.2. Results of the Euler | |
| deconvolution | 36 |
| Chapter (3) - ELECTRIC EVALUATION AND TRANSIENT ELECTROMAGNETIC | |
| 3.1 Electric Resistivity | 41 |
| 3.1.1 Introduction | 41 |
| 3.1.2 Theory and basic principles | 42 |
| 3.1.2.1 Sounding mode | 44 |
| 3.1.2.2 Profiling- mode | 45 |

45

| List of Contents | |
|--|----|
| 3.1.3 Data acquisition | 47 |
| 3.1.4 Instrument | 49 |
| 3.1.5 Data interpretation | 49 |
| 3.2 Transient Electromagnetic (TEM) | 53 |
| 3.2.1 Introduction | 53 |
| 3.2.2 Electromagnetic induction | 55 |
| 3.2.3 Basic concept of TDEM | 57 |
| 3.2.4.Depth of penetration in TEM | |
| Surveying | 58 |
| 3.2.5.TEM data acquisition | 59 |
| 3.2.6. TEM data interpretation | 61 |
| 3.2.6.1. (1-D) Quantitative | |
| interpretation of TEM data | 61 |
| Chapter (4) - JOINT INVERSION INTERPRETATION OF TIME DOMAIN ELECTROMAGNETIC (TEM) AND DC RESISTIVITY DATA | |
| 4.1. Introduction4.2. Scaling Relationships Between TEM | 64 |
| and DC Resistivity Data. 4.3. Removal of Electrical Static Shift | 65 |
| and the Implication for Effective Joint | |
| DC-TEM Inversion 4.4. Joint Inversion for DC Resistivity | 66 |

| and TEM Data | 67 |
|---|----|
| 4.5. Joint Inversions Sections: | 82 |
| 4.5.1 Joint inversion cross section | |
| along profile A-A` | 82 |
| 4.5.2 Joint inversion cross section | |
| along profile B-B` | 84 |
| 4.5.3 Geoelectric cross section along | |
| profile C-C` | 85 |
| 4.5.4 Joint inversion cross section | |
| along profile D-D` | 87 |
| 4.5.5 Joint inversion cross section | |
| along profile E-E` | 89 |
| 4.5.6 Joint inversion cross section | |
| along profile F-F` | 91 |
| 4.6. Depth Maps for Joint Inversion | 92 |
| 4.6.1. Depth map for upper surface | |
| of shallow aquifer | 92 |
| 4.6.2. Depth map for lower surface | |
| of shallow aquifer or upper | |
| surface of deep aquifer | 93 |
| 4.6.3. Depth map for lower surface | |
| of deep aquifer | 94 |
| 4.7. Isopach Maps for Joint Inversion | 95 |
| 4.7.1. Isopach map of the shallow | |
| aquifer | 95 |
| 4.7.2. Isopach map of the deep | |
| aquifer | 96 |
| 4.8. Isoresistivity Maps of Joint Inversion | 97 |

| List of Contents | |
|--|-----|
| 4.8.1. Isoresistivity map of the shallow aquifer | 97 |
| 4.8.2. Isoresistivity map of the deep aquifer | 98 |
