

Plasma in Glow Discharge Electronic Devices Characterization and Applications

THESIS

*Submitted to Faculty of Science-Ain Shams University in
partial fulfillment for Degree of the Master in Physics*

By

Mostafa Elsayed Ali Hassan

B.Sc. in Physics (Electronics) 2010

Supervisors

Prof. Dr. Ashraf Shamseldin Yahia

Professor of Electronics-Physics, Physics Dept., Faculty of Science,
Ain Shams University

Dr. Azza Ahmed Talab

Plasma Physics and Nuclear Fusion Dept., Nuclear Research Center,
Atomic Energy Authority

Dr. Mohamed Ali Saudi

Lecturer of Physics, Physics Dept., Faculty of Science, Ain Shams
University

2018

Physics Department
Faculty of Science
Ain Shams University

APPROVAL SHEET

Name: Mostafa Elsayed Ali Hassan

Title: Plasma in Glow Discharge Electronic Devices Characterization and Applications

Supervisors

Prof. Dr. Ashraf Shamseldin Yahia

Professor of Electronics-Physics, Physics Dept., Faculty of Science, Ain Shams University

Dr. Azza Ahmed Talab

Plasma Physics and Nuclear Fusion Dept., Nuclear Research Center, Atomic Energy Authority

Dr. Mohamed Ali Saudi

Lecturer of Physics, Physics Dept., Faculty of Science, Ain Shams University

Plasma in Glow Discharge Electronic Devices Characterization and Applications

By

Authority

Dr. Mohamed Ali Saudi

Lecturer of Physics, Physics Department,
Faculty of Science, Ain Shams University

2018

Ain Shams University

Name: Mostafa Elsayed Ali Hassan

Degree: M.Sc.

Department: Physics – Electronics Group

Faculty: Science

University: Ain Shams

Graduation Date: 2010 - Ain Shams University

Registration Date: 14/7/2014

Grant Date: 2018

List of Figures	I
List of Tables	VI
Abstract	1
Chapter (1) Description of Plasma Physics and Glow Discharge	
1.1 Introduction	3
1.2 A Brief Description of the Plasma State	3
1.2.1 Conditions for Plasma Creation	4
1.2.2 Gas Breakdown	5
1.2.3 Paschen's law	6
1.2.4 I–V Characteristic Curve of Electrical Discharge	7
1.3 Types of Plasma	8
1.3.1 Naturally Generated Plasmas	9
1.3.2 Thermonuclear Fusion in Terrestrial Plasmas	9
1.3.3 Non-Thermal Plasmas	11
1.4 DC Glow Discharge Plasma	12
1.4.1 Regions of DC Glow Discharge	12
1.5 Applications of Plasma	14
1.5.1 Medical Applications	15
1.5.2 Biology Applications	15

Contents

1.5.3 Agriculture Applications	15
1.5.4 Food Packaging Applications	16
1.5.5 Water Purification Applications	16
1.5.6 Electronics Applications	16
1.5.6.1 Plasma Processing on Surface Modification	17
1.6 Plan of Work	18
1.7 Literature Review	19
1.7.1 DC Glow Discharge Plasma Characterization	19
1.7.2 DC Glow Discharge Plasma Applications ...	24
Chapter (2) Description of DC Glow Discharge Plasma Experiment ASU	
2.1 Introduction	30
2.2 Experiment Setup	30
2.2.1 Discharge Chamber	33
2.2.2 Vacuum System	33
2.2.3 DC Electrical Circuit	34
2.2.3.1 DC Power Supply	34
2.2.3.2 Potential Divider	35
2.2.3.3 High Voltage Probe (HV Probe)	37
2.3 Diagnostic Tools	39
2.3.1 Electric Probes	40
2.3.1.1 Langmuir Single Probe	40

Contents

2.3.1.2 Double Electric Probe	44
-------------------------------------	----

Chapter (3) The Electrical Parameters of DC-GDPA

3.1 Introduction	53
3.2 Paschen Curves	53
3.3 Electrical Plasma Parameters	58

Chapter (4) The Main Parameters of DC-GDPA & Its Application

4.1 Introduction	71
4.2 The Electron Temperature and Ion Density	71
4.3 Effect of Plasma on Electronic Circuits	
Performance	105
Conclusion	110
References	113

Acknowledgments

I wish to express my deep thanks and gratitude to Prof. Dr. Ashraf Shamseldin Yahia, Professor of Electronics, Physics Department, Faculty of Science, Ain Shams University, for suggesting the point of research, supervision, encouragement, great efforts, helpful discussion, analysis, his help during the work and revision of this thesis.

I wish to express my deep thanks and gratitude to Dr. Azza Ahmed Talab, Lecturer of Plasma Physics, Plasma Physics and Nuclear Fusion Department, Nuclear Research Center, Egyptian Atomic Energy Authority, for her supervision, analysis, helpful discussion and her patience in reviewing this thesis to put it in the best shape.

I wish to express my deep thanks and gratitude to Dr. Ehab Ali Hassan, Lecturer of Plasma Physics and Remote Sensing, Physics Department, Faculty of Science, Ain Shams University, for encouragement, significant efforts, helpful discussion, analysis, his help during the work and revision of this thesis.

Acknowledgments

Also, I wish to express my deep thanks and gratitude to Dr. Mohamed Ali Saudi, Lecturer of Physics, Physics Department, Faculty of Science, Ain Shams University, for his great effort in constructing the glow discharge plasma experiment and his supervision.

Last but not least, I wish to thank and gratitude to staff in the Central Physics Laboratory at Physics Department, Faculty of Science, Ain Shams University, for their great efforts in measuring the electrical resistance of the Cu foil in the PCB.

I also extend my thanks and gratitude to my family for providing me with the possibilities and assistance and for their constant support to me until the completion of this thesis for the best.

List of Figures

Fig (1.1) An electron emitted from the cathode generates a cascade of new electron-ion pairs

Fig (1.2) Paschen curve

Fig (1.3) I–V characteristic curve of electrical discharge

Fig (1.4) Examples of nature plasmas where (a) Stars, (b) Nebula, (c) Sun, (d) Solar wind, (e) Van Allen belt, (f) Aurora

Fig (1.5) Examples of artificial fusion plasmas where (a) Tokamak reactor, (b) Plasma inside tokamak, (c) ITER reactor, (d) Wendelstein 7-X Stellarator, (e) Reverse field pinch, (f) Magnetic mirror plasma

Fig (1.6) Examples of artificial non-thermal plasmas where (a) Arc plasma, (b) Neon signs, (c) Fluorescent lamps, (d) Processing plasma, (e) Welding arcs, (f) Glow discharge
