سورة النساء / الآية (١١٣)

ACKNOWLEDGMENT

First and foremost thanks to Allah

The most Beneficient and Merciful

First of all I would like to seize this opportunity to express my sincere gratitude to Professor Dr Nadia Mowafy Professor of Clinical Pathology, Faculty of medicine, Ain-Shams University, for giving me the honor to work under her supervision and for her encouragement, help and for the time she freely gave for guiding me throughout my study.

I would like to extend my sincere gratitude to Dr Hana Afifi Assistant Professor of Clinical Pathology, Faculty of medicine Ain-Shams University, for her energetic help in following every step in this study to ensure that it would reach an updated valuable level.

I am also very grateful to Dr Soha Ezz El-Arab Lecturer of Clinical Pathology, Faculty of medicine Ain-Shams University for her kind guidance and her very special help.

Table of Contents

Introduction.	1
Review of Literature:	3
Chapter I: Hematopoiesis	3
☆ Introduction.	3
☆ Sites of hematopoiesis.	4
☆ Hematopoietic cells:	6
I) Stem cells.	6
II) Progenitor cells.	8
III) Hematopoietic end cells.	15
☆ Hematopoietic Microenvironment	16
I) Stromal cells.	17
II) Extracellular matrix.	20
☆ Cell adhesion and homing.	24
Cell adhesion.	24
Cell homing.	25
☆ Stem cell phenotypes.	26
☆ Self-renewal and differentiation.	28
I) Role of hematopoietic growth factors in the regulation of hematopoiesis.	29
II) The role of stromal cells in the regulation of hematopoiesis.	37
III) The role of intracellular mechanisms in the regulation of hematopoiesis.	37
Chapter II: Functional Assays of Stem Cells.	39
☆ Hematopoietic stem cell assays.	39
I) In vitro assays.	41
A) Short-term colony forming assay.	42
B) Long-term colony forming assay.	43
C) Extended long-term cultures.	45
D) High proliferative potential quiescent stem cell assay.	46
E) Cobble stone area forming cell assay.	48
II) In vivo assays.	49
Severe combined immunodeficiency mouse assay.	49
Chapter III: Hematopoietic Stem Cell Transplantation:	51
☆ Historical perspective of stem cell transplantation.	51
☆ Indications of stem cell transplantation.	53
☆ Selection of stem cell source.	54
I) Autologous source of stem cell.	55
II) Allogeneic source of stem cell.	56
☆ Conditioning of the patient.	57
I) Radiation based regimens.	58
II) Non-radiation based regimen.	58
III) Multiple cycles of high-dose chemotherapy followed by PBPC support.	59
IV) Radiolabelled monoclonal antibodies.	60
V) Non myeloablative or reduced dose intensity conditioning regimens for HSC transplants (Minitransplants).	61

☆Collection of stem cells:	63
I)Collection of stem cells from bone marrow.	63
II)Collection of stem cells from peripheral blood.	64
Technology of peripheral blood stem cell collection	65
A)Eligibility and patient selection.	66
B)Mobilization.	67
C)Timing of collection.	74
D)Collection procedure.	75
E)Collection target.	76
III)Collection of umbilical cord.	77
☆Cryopreservation.	78
☆Transportation, thawing and reinfusion.	81
☆Engraftment.	83
☆UCB vs BM vs PB.	85
Chapter IV: Ex vivo expansion of stem cells	87
☆Introduction.	89
☆Clinical applications of ex vivo stem cell expansion	90
☆Requirements for successful ex vivo expansion.	91
☆Selection and purification of cells (techniques):	91
1)Ceprate stem cell concentrator system.	92
2)Isolex magnetic cell separation.	93
3)Cell purification by Magnetic Activated Cell Sorting.	94
4)Cell sorting and analysis by Fluorescence Activated Cell Sorter.	95
Effects of different separation techniques on ex-vivo expansion capacity.	96
☆Culture system approaches:	97
I)Static system (gas-permeable bags).	97
II)Perfusion.	99
☆Bioreactors.	100
☆Media.	101
☆Characterization of cultured cells.	103
☆Reliability of cultured cells.	107
☆Reproducibility of cultured cells.	108
☆Hematopoietic growth factors for ex vivo expansion:	109
I)Primitive stem cell expansion.	110
II)Progenitor cell expansion.	114
III)Mature cell compartment.	116
V)Immune effector cell generation.	118
☆Duration of in vitro cell expansion.	119
☆Long-term engraftment capacity of ex vivo expanded cells.	120
☆Comparison of expansion capacity of CD34 ⁺ cells from different cell sources.	122
☆Clinical studies involving ex vivo cultured stem cells.	123
