"Hydrometallurgical Separation and Purification of some Rare Earth Elements from Monazite Ore"

A thesis Submitted for
Doctor of Philosophy (PhD) Degree of Chemistry

By
Ahmed Mohamed Shahr El-Din
(M.Sc. in Chemistry, 2014)
Atomic Energy Authority

To
Department of Chemistry, Faculty of Science
Ain Shams University

Thesis Advisors

Prof. Mohamed M. M. Abo Aly
Prof. of Inorganic Chemistry,
Chemistry Department, Faculty of Science - Ain shams University

Prof. Emad H. Borai
Prof. of Analytical Chemistry,
Hot Laboratories Center,
Atomic Energy Authority

Dr. El Sayed M. El Afifi
Assist.Prof. of Radiochemistry,
Hot Laboratories Center,
Atomic Energy Authority

Dr. Refaat F. Aglan
Assist.Prof. of Analytical Chemistry,

ACKNOWLEDGMENT

ACKNOWLEDGMENT

First, I am deeply thankful to ALLAH, to whom I always pray, under the light of his HOLY FACE, by the grace of whom the progress and the success of this work were possible.

I would like to offer my deepest thanks to **Prof. Dr. Mohamed M. Abo-Aly**, Prof. of Inorganic Chemistry, Chemistry Department, Faculty of Science - Ain Shams University for his valuable guiding, sincere help and his continues support and for complete revision of the final form of the thesis.

I would like to express my deep thanks and full sincere gratitude to **Prof. Dr. Emad Hassan Borai**, Prof. of Analytical Chemistry, Hot Laboratories Center, Atomic Energy Authority, who suggested the work, for his supervision, interesting discussion, for the interpretation of the data and his continuous help during all stages of the development of the work. I would also like to thank him for being a brilliant supervisor and a wonderful friend.

I wish to express my loyalty and cordial, endless thanks and gratitude to **Dr. El Sayed M. El Afifi,** Assist. Prof. of Radiochemistry, Hot Laboratories Center, Atomic Energy Authority, for his significant encouragement and supervision of this work. I will always remember his efforts, so thank you.

I would also like to thank **Dr. Refaat F. Aglan**, Assist. Prof. of Analytical Chemistry, Hot Laboratories Center, Atomic Energy Authority, for being so approachable and kind.

All thanks and respect for my family, which always support me for this goal, my father, my mother, my brothers, my wife, my children (*Shams and Seif*) and all of my friends helped me, thank for all of them.

Ahmed Shahr El-Din

1.10.4.	Cerium……..	34
1.10.5.	Iron……	34
1.10.6.	Zirconium……..	35

CHAPTER-II

EXPERMENTAL

2.1. Chemicals and Reagents……..…… 37

2.2. Monazite Samples……. 37

2.3. Instrumentation……. 37

2.3.1. UV-Visible spectrophotometer measurements……. 37

2.3.2. X-ray Fluorescence…….. 40

2.3.3. Gamma-ray spectrometry…… 40

2.4. Experimental Procedure…….. 45

2.4.1. Digestion procedure..... 45

2.4.2. Estimation of the radiological hazard indices……. 46

2.4.2.1. Gamma and alpha indices ($I_{\gamma r}$ and I_{α})……. 46

2.4.2.2. External and internal hazard indices (H_{ex} and H_{in})…….. 47

2.4.2.3. Absorbed gamma dose rate (D_R)…… 47

2.4.2.4. Indoor and outdoor annual effective dose rate (E_{in} and E_{out})… 48

2.4.2.5. Annual gonadal dose equivalent rate (AGDE)…… 49

2.4.2.6. Excess lifetime cancer risk (ELCR)……. 49

2.4.3. Solvent extraction procedures for separation of Fe(III), Zr(IV), Th(IV) and Ce(III)……..…..…….. 49

2.4.4. Preparation of samples for radiometric measurements…….. 53

2.4.4.1. Elimination of radionuclides …… 53

CHAPTER-III

RESULTS AND DISCUSSIONS

3.1. Characterization of Samples..... 55

3.1.1. X-Ray fluorescence measurements…… 55

3.1.2.	Gamma ray measurements…….	57
3.1.2.1.	Quality control of the γ-ray measurements……	57
3.1.2.2.	Activity concentration of samples……	58
3.1.2.2.1.	Monazite and hydroxide cake……..	58
3.1.2.2.2.	Liquors of trisodium phosphate and effluents…….	60
3.1.2.3.	Radiological hazardous parameters……	63
3.1.2.3.1.	Gamma and alpha indices ($I_{\gamma r}$ and I_{α})……..	64
3.1.2.3.2.	External and internal hazard indices (H_{ex} and H_{in})…….	67
3.1.2.3.3.	Absorbed dose rate in air (D_R) and annual effective doses (E_{out}, E_{in}, E)…….	68
3.1.2.3.4.	Annual gonadal dose equivalent (AGDE)……	72
3.1.2.3.5.	Excess lifetime cancer risk (ELCR)……	74
3.2.	Optimizing Separation of Th(IV), Fe(III), Zr(IV) and Ce(III) from Aqueous Sulphate Solution ….…….	76
3.2.1.	Single element solution……..	76
3.2.1.1.	Effect of media…….	76
3.2.1.2.	Metal hydrolysis process…….	77
3.2.1.3.	Effect of contact time……	78
3.2.1.4.	Effect of pH…….	83
3.2.1.5.	Effect of extractant concentration…….	86
3.2.1.6.	Effect of diluents…….	89
3.2.2.	Selective separation of Fe(III), Zr(IV), Th(IV) and Ce(III) from a synthetic mixture……..	91
3.2.3.	Comparison with previous studies…….	94
3.2.4.	Stripping of Th(IV) and Fe(III)……	94
3.3.	Attempts for Selective Elimination of some Natural	97

Radionuclides in $RECl_3$ liquor. ……..…..

3.3.1. Influence of pH……. 98

3.3.2. Influence of carrier metal ions……. 102

3.3.2.1. Without addition of metal carrier…….. 102

3.3.2.2. Addition of barium (Ba^{2+})-carrier solution…….. 105

3.3.2.3. Addition of lead (Pb^{2+})-carrier solution…… 105

3.3.2.4. Addition of carrier admixture (Ba^{2+}/Pb^{2+})…… 106

3.3.3. Influence of precipitating agent…… 108

3.3.3.1. Sulphate solution……..…….. 108

3.3.3.1.1. Precipitation using sulphuric acid solution……. 108

3.3.3.1.2. Precipitation using sodium sulphate……. 109

3.3.3.1.3. Precipitation using ammonium sulphate solution…….. 111

3.3.3.1.4. Precipitation using potassium sulphate…… 111

3.3.3.2. Precipitation using sulphide solution…….. 114

3.3.3.3. Precipitation by sulphate-sulphide synergistic admixture… 116

3.3.3.4. Precipitation by chromate solution…….. 116

3.3.3.5. Precipitation by iodate solution…….. 119
