

**Faculty of Women for Arts,
Science and Education.
Ain Shams University**

**Ecofriendly antimicrobial pigments produced by
Actinomycetes and their application in textiles
dyeing**

A Thesis

Submitted in Partial Fulfillment of the Requirements for the
Degree of Master of Science (Microbiology)

By

Howida Reda Mohammed Mohammed
B. Sc Microbiology and Chemistry (2008)

Under Supervision

Dr. Zeinab M. Hassan kheiralla.
Prof. of Microbiology, Botany
Department, Faculty of Women,
Ain Shams University.

Dr. Maha Amin Hewedy.
Prof. of Microbiology, Botany
Department, Faculty of Women,
Ain Shams University.

Dr. Osama Mohamad Mostafa Darwesh.
Researcher of environmental microbiology,
Agricultural microbiology department,
National Research Centre.

To

Botany Department, Faculty of Women for Arts,
Science and Education, Ain Shams University

2017

M.Sc. Thesis

Name: Howida Reda Mohammed Mohammed

Title: Ecofriendly antimicrobial pigments produced by Actinomycetes and their application in textiles dyeing

Scientific Degree: M.Sc. in science (Microbiology)

Deparement: Botany

Faculty Name: Faculty of Women for Arts, Science and Education

University: Ain Shams University

***This thesis has not been previously submitted for
any degree at this or any other university***

Faculty of Women for Arts, Science and
Education, Ain Shams University.

Dr. Osama Mohamad mostafa Darwesh

Researcher of environmental microbiology,
Agricultural microbiology department,
National Research Centre.

Acknowledgments

First, I can't be thankful enough for Allah to whom I am indebted for his blessings on me.

I want to express my deepest appreciation and sincere gratitude to my supervisors for initially accepting me as a Master's Candidate and later on for their endless encouragement, constructive criticism, helpful and enlightening discussions, guidance, valuable ideas and basic editing during the preparation of this work.

*My special thanks go to **Dr. Zeinab Kheiralla** and **Dr. Maha Hewedy**, Professor of microbiology, Botany Department, Faculty of Women for Arts, Science and Education, Ain Shams University who suggested the point of this work and also for their endless encouragement. I am very proud to perform research under their supervision.*

*My special thanks also go to **Dr. Osama Darwesh** at National Research Centre, Egypt, for his great support and help in all practical work and constructive reviewing of this thesis.*

*I would like to express my sincere gratitude to **Dr. Yehya A. Youssef** Prof., Dye chemistry and textile dyeing technology, Textile Research Division, National Research Centre, for his help in measurements of the dyed fabrics.*

*I would like also to express my sincere gratitude to **Dr. Mohammed El shakr** professor of chemistry, Chemistry Department, faculty of science, Cairo University, for his help in understanding and writing the Elemental Analysis and Spectroscopic Analysis part.*

Finally, I would like to extend my sincere appreciation and acknowledge to all doctors and colleagues in Botany Department, Ain Shams University and also to all doctors in Agricultural microbiology Department, National Research Centre, whose names and contributions I cannot enumerate due to space limitation. To you all, I say Thanks very much

Last but not least, my deepest feelings to my family for their continuous help and support through this work.

Howida R. Mohammed

Dedication

I would like to dedicate this work to the spirit of my grandmother Zeinab, my aunt Nadia and my uncle Samir dear.

Also, I would like to dedicate this work to my wonderful mother Afaf, my husband Ali , my daughters (Salma and Retag), my dear sister, my brothers, my father and all my family and also to express my sincere and deepest thanks to them for their great help and support.

Howida R. Mohammed
