APPROVAL SHEET

Title of Thesis: TETRAPLOID WATERMELON INDUCTION
AND PRODUCE OF SEEDLESS WATERMELON
F1 HYBRIDS SEEDS.

Name: Soliman Ahmed Ali Omran

Degree: Ph.D., Vegetable Crops

This Thesis Has Been Approved by:

Prof. Dr. F. El-Aidy

Prof. Dr. Ibrahim A. Ibrahim

Prof. Dr. A. I. El Zawi

Prof. Dr. B. I. El-Sawy

Committee in Charge

Date: / /2003

07/12/03

TETRAPLOID WATERMELON INDUCTION AND PRODUCE OF SEEDLESS WATERMELON F'1 HYBRIDS SEEDS

By

Soliman Ahmed Ali Omran

B.Sc. (Agric.) (Vegetable Crops), Tanta University, 1991

M.Sc. (Agric.) (Vegetable Crops), Tanta University, 1998

Thesis

Submitted in Partial fulfillment of the Requirements

for the degree of

DOCTOR OF PHILOSOPHY

in

Vegetable Crops

Horticulture Department

Faculty of Agriculture

Kafr El-Sheikh

Tanta University

2004

ACKNOWLEDGEMENT

Deep gratitudes are due to **Prof. Dr. Farouk Abd El-Salam El-Aidy**, Professor of Vegetable Crops, Department of Horticulture, Faculty of Agriculture, Kafr El-Sheikh, Tanta University for suggesting the problem, kind supervision, continuous interest, valuable advices and constructive criticism throughout the course of this study and for every thing he did for the completion of this work.

Special thanks and deep appreciation are due to **Prof. Dr. Bassiouny Ismail El-Sawy**, Professor of Vegetable Crops, Department of Horticulture, Faculty of Agriculture, Kafr El-Sheikh, Tanta University for suggesting the problem, his kind supervision, continuous interest, encouragement, valuable guidance and advices throughout the course of this study and for his great help in preparing, writing and reviewing the manuscript.

Sincere thanks are due to **Prof. Dr. Hamdy El-Dowany**, Professor of Vegetable Crops, Horticulture Research Institute, Dokky, Giza for his continuous interest, valuable guidance, encouragement, and for providing materials and facilities and his great help in the scientific work.

Many thanks are due to **Prof. Dr. Ibrahim Abd El-Maksoud Ibrahim** Professor of Genetics, Genetic Engineering and Biotechnology Research Institute, Sadat City, Minufiya University for providing materials.

Thanks are also due to **Prof. Dr. Ramadan Ali El-Refaey**, Professor of Agronomy and Head of Agronomy Department, Faculty of Agriculture, Tanta University for his great help in preparing the manuscript, advices and encouragement.

Many thanks are due to all staff members of the Department of Horticulture, Faculty of Agriculture, Kafr El-Sheikh, Tanta University and Horticulture Research Institute for their help and encouragement.

CONTENTS

1. INTRODUCTION	1
2. REVIEW OF LITERATURE	3
2.1. Watermelon (<i>Citrullus lanatus</i>).....	3
2.2. Triploid (seedless) watermelon characteristics.....	3
2.2.1. Fruit yield.....	4
2.2.2. Total soluble solids (T.S.S.%).....	5
2.2.3. Sugar content	6
2.2.4. Seeds of triploid	6
2.2.5. Production difficulties of triploid watermelon.....	6
2.3. Polyploidy.....	7
2.3.1. Dinitroaniline herbicides (2,6-dinitroaniline).....	7
2.3.2. Colchicine ($C_{22}H_{25}NO_6$).....	8
2.4. Polyploid breeding.....	10
2.5. Production of tetraploid watermelon by chemicals	12
2.6. Estimation of ploidy level.....	13
2.6.1. Cytology.....	13
2.6.1.1. Chromosomes	13
2.6.1.2. Chloroplasts	14
2.6.1.3. Pollen grains	15
2.6.2. Morphology.....	17
2.6.2.1. Leaves.....	17
2.6.2.2. Flowers	17
2.6.2.3. Fruits	18
2.6.2.4. Seeds	20
2.7. Induction of triploid seeds F1	22
2.8. Production of triploid watermelon.....	23
2.8.1. Seed treatments for improvement of seeds germination.....	23
2.8.2. Planting of triploid in the field.....	24
3. MATERIALS AND METHODS.....	26
3.1. The first experiment.....	26
3.1.1. Induction of tetraploid watermelon.....	26
3.1.2. Estimation of ploidy level.....	27
3.1.2.1. Cytology	27
3.1.2.1.1. Number of chromosomes	27
3.1.2.1.2. Chloroplasts number	27
3.1.2.1.3. Pollen grains.....	28
3.1.2.2. Morphological plant characters investigation	28
3.1.2.2.1. Leaves	29
3.1.2.2.2. Flowers.....	29
3.1.2.2.3. Fruits	29
3.2. The second experiment: Hybrids induction F1 triploid (seedless) watermelon.....	29
3.3. The third experiment: evaluation F1 triploid seedless watermelon.....	30

3.3.1.	Experimental design.....	30
3.3.3.	Data recorded on diploid, triploid and tetraploid plants	31
3.3.3.1.	Vegetative growth.....	31
3.3.3.2.	Flowering.....	31
3.3.3.3.	Yield and its components	31
3.3.2.	Statistical procedures	32
4.	RESULTS AND DISCUSSION.....	39
4.1.	Induction of tetraploid watermelon.....	39
4.1.1.	Dinitroaniline treatments	39
4.1.1.1.	Dry seeds treatments.....	39
4.1.1.2.	Germinated seeds treatment.....	39
4.1.2.	Colchicine treatments.....	40
4.1.2.1.	Dry seeds treatment	40
4.1.2.2.	Germinated seeds treatment.....	40
4.2.	Identification of tetraploid plants (4n).....	46
4.2.1.	Cytology.....	46
4.2.1.1.	Chromosome counts	46
4.2.1.2.	Chloroplasts	46
4.2.1.3.	Pollen grains	46
4.2.2.	Morphology characteristics.....	47
4.2.2.1.	Leaves.....	47
4.2.2.2.	Flowers	47
4.2.2.3.	Fruits.....	47
4.3.	Test of significant and performance	51
4.4.	The performance of parents and their F ₁ hybrids.....	53
4.4.1.	Vegetative growth.....	53
4.4.2.	Flowering	53
4.4.3.	Yield and its components.....	53
4.5.	Heterosis	62
4.5.1.	Vegetative growth.....	62
4.5.2.	Flowering	63
4.5.3.	Yield and its components.....	67
4.6.	Combining ability	73
4.7.	General and specific combining ability effects	73
4.7.1.	Vegetative growth.....	74
4.7.2.	Flowering	74
4.7.3.	Yields and its components	78
4.8.	Heritability	84
5.	SUMMARY.....	86
