Acknowledgements

It gives me pleasure to acknowledge those people who have contributed with their kind effort in making this study possible.

First and foremost, the researcher expresses his great thanks, deep gratitude and respect to his supervisor Prof. Ahmed Hassan Seifeddin. His constant encouragement, support and guidance will never be forgotten. Without his patient supervision and valuable remarks, such a study would never have come into being.

The researcher is also very grateful to his supervisor Dr. Aly Shokry Aly Abdel Kader, who offered generously time and support toward the successful completion of this study. His kind guidance and valuable suggestions are deeply appreciated.

A special and sincere word of thanks is extended to Prof. Mohamed Kandeel, Head of Kindergarten Department at Tanta Faculty of Education, for his constant encouragement and his great assistance in conducting the experiment.

Deep appreciation is also extended to the jury members of the instruments used in the study for their valuable remarks and fruitful suggestions.

Special thanks go to Dr. Youssef Shalaby for his kind help in the statistical treatment of this study. The researcher is also grateful to the fourth year Kindergarten Department students at Tanta Faculty of Education, who volunteered to take part in the experiment, for their commitment and punctuality.

My deep gratitude extends to my parents and my brothers for their love and kind encouragement.

Last but not least, I wish to express deep thanks and appreciation to my wife and my daughters, Dina and Rawan, to whom I dedicate this work. Without their patience and constant encouragement, my dream of being a Ph.D holder would not have become true.

The researcher
