HYDROGEOLOGICAL STUDIES ON SOME AREAS IN THE NEW VALLEY GOVERNORATE, WESTERN DESERT, EGYPT

A Thesis

Submitted in Partial Fulfillment of the Requirements for the Degree of Master of
Science

In

GEOLOGY

"HYDROGEOLOGY"

By

AHMED MOSTAJA SEIF EL-NASR

(B.Sc. in Geology, 1996)

Supervised by

PROF. Dr. SAMIR RIAD

PROF. OF GEOPHYSICS

GEOLOGY DEPARTMENT

ASSIUT UNIVERSITY

Dr. ABDEL-AZIM M. EBRAHEEM

ASSOC. PROF. OF HYDROGEOLOGY

GEOLOGY DEPARTMENT

ASSIUT UNIVERSITY

PROF. Dr. PETER WYCISK

PROF. OF ENVIRONMENTAL GEOLOGY

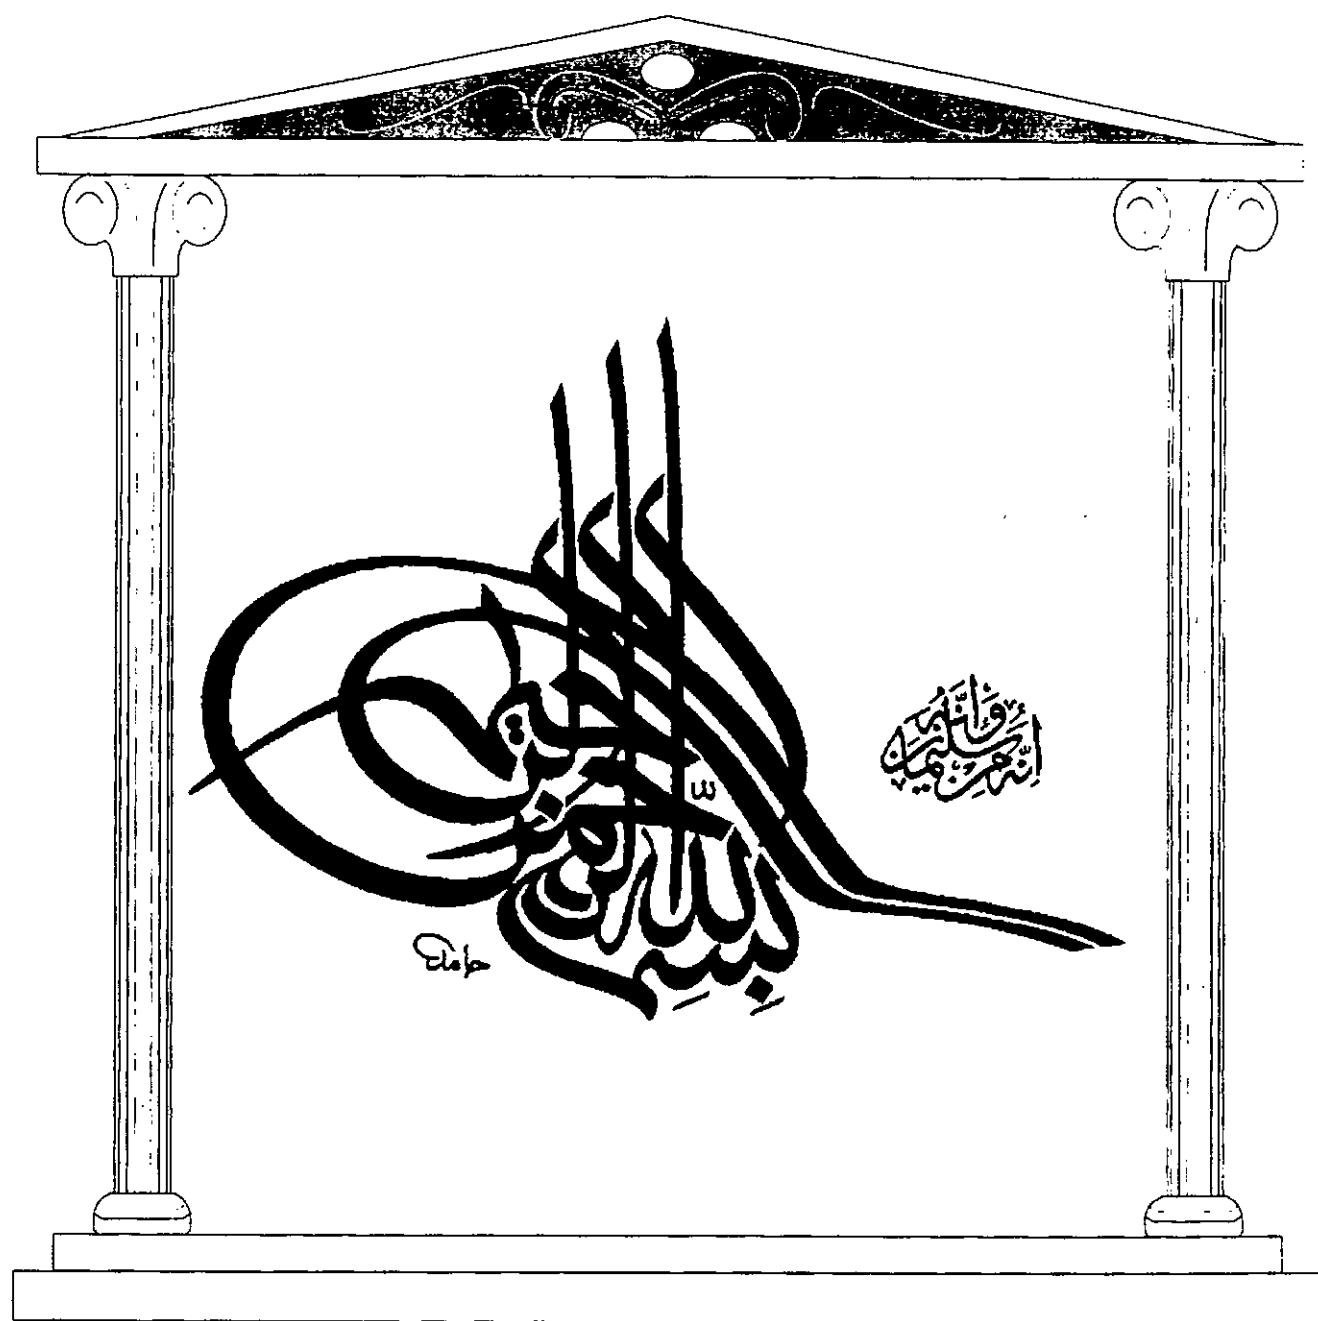

GEOLOGY DEPARTMENT

MARTIN LUTHER UNIVERSITY

HALLE, GERMANY

(2002)

73.

APPROVAL SHEET

Name: **Ahmed Mostafa Seif El-Nasr**

Thesis Title: **Hydrogeological studies on some areas in the New Valley Governorate, Western Desert, Egypt.**

Degree: **Master of Science in Geology "Hydrogeology"**

Courses
Attended:

- | | |
|---|-----------------------|
| ▪ Applied Hydrogeology. | ▪ Structure Geology. |
| ▪ Mathematical Geology. | ▪ Sedimentation. |
| ▪ Special Course (The Nubian Sandstone Aquifer System). | ▪ Applied Geophysics. |

Supervisors:

- 1- Prof. Dr. Samir Riad (Professor of Geophysics, Geology Department, Assiut University, Egypt). *Samir Riad*
- 2- Dr. Abdel-Azim M. Ebraheem (Associate Professor of Hydrogeology, Geology Department, Assiut University, Egypt). *Ebraheem*
- 3- Prof. Dr. Peter Wycisk (Professor of Environmental Geology, Geology Department, Martin-Luther University, Germany).

Examination
Committee:

External:

- 1- Prof. Dr. Salah Abdel-Mogheeth (Professor of Hydrogeology, Desert Research Institute, Matariya).
- 2- Prof. Dr. Ibrahim El-Shamy (Professor of Hydrogeology, and Head of Geology Department, Helwan University).

Internal:

- 1- Prof. Dr. Samir Riad (Geology Department, Assiut University).
- 2- Dr. Abdel-Azim M. Ebraheem (Geology Department, Assiut University).

Prof. Dr. M. T. Ismail

M. T. Ismail
Vice-Dean for Graduate Studies and Research.

18/5/2002

ACKNOWLEDGEMENT

ACKNOWLEDGEMENT

All gratefulness is due to Almighty ALLAH, who guided and aided me to bring force to light this work. I bow to him thanking his magnificence, and to the light of human beings, our prophet Mohammed prayer; peace is upon him, who urged to exert efforts for seeking knowledge.

I wish to articulate my truthful acknowledge to Prof. Dr. H. A. Soliman the former head of Geology Department, Faculty of Science, Assiut University, and to Prof. Dr. A. H. El- Houssini, the present head, for their perennial precious aids and services they always provide to me.

I wish to express my genuine thanks and honest gratitude to Prof. Dr. Samir Riad, Professor Of Geophysics, Geology Department, Faculty of Science, Assiut University, for suggesting the critical point of research, helping in collecting the data used in this work This data base sewed the main nerve of the work; I am also indebted to him his critical discussions, passionate encouragement during the achievement stages of his work, providing me with his priceless eternal experiences in different multiple fields, and reviewing this thesis.

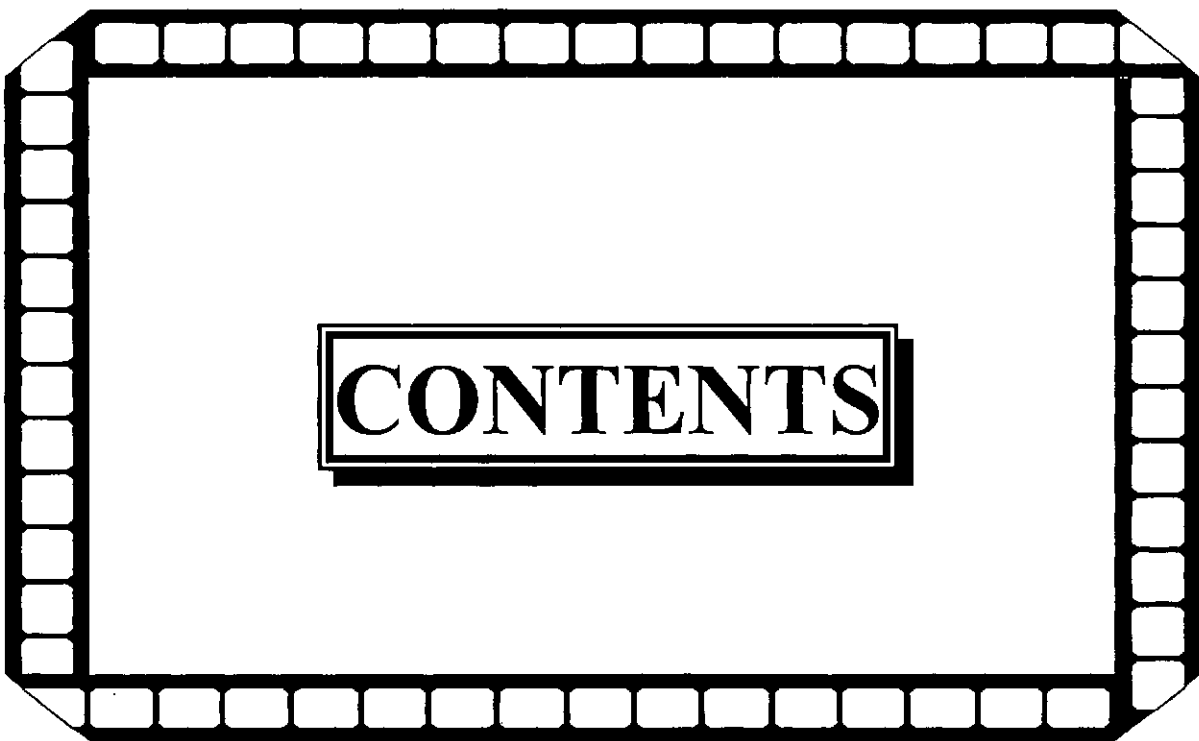

I would like to articulate my solemn appreciation and wholehearted acknowledgement to Dr. A. M. Ebraheem, Assoc. Prof. of hydrogeology, Geology Department, Faculty of Science, Assiut University, for his real humanity, his friendly supervision offering, his polite civil behavior, his helping by hand during the initial stages of the planned work, teaching me the up-to date hydrogeological software and techniques, revising the manuscript, enthusiastic passionate encouragement, fertile discussions that were significantly precious in developing this thesis, and critical reviewing added marvelous touches to the materialism of this thesis.

I wish to express my appreciation and sincere gratitude to Prof. Dr. Peter Wycisk, Professor of Environmental Geology, Geology Department, Martin Luther University, Halle, Germany, for his help and supervision in the field work, providing the software used in this thesis, and critical review of the thesis manuscript.

At last, but not the least, I owe a lot of thanks and heartfelt appreciations to my parents, my wife, my colleagues, and all the members of Geology Department, Faculty of Science, Assiut University, for their continuous helps, enthusiastic and moral support.

Ahmed Mostafa Seif El-Nasr

January 2002

CONTENTS

CONTENTS

SUBJECT	PAGE
LIST OF FIGURES.....	vii
LIST OF TABLES.....	xiv
ABSTRACT.....	xv
INTRODUCTION.....	1
 CHAPTER ONE GEOLOGICAL AND HYDROGEOLOGICAL BACKGROUND 	
I.1 GEOLOGICAL BACKGROUND.....	4
I.1.1 GENERAL GEOMORPHOLOGIC FEATURES	4
PLATEAUS.....	5
SCARPS.....	5
PLAINS.....	6
RAVINES.....	6
HILLS.....	6
VALLEYS.....	6
I.1.2 GEOLOGICAL SETTINGS.....	6
ORIGIN OF THE DEPRESSION.....	7
STRATIGRAPHY.....	8
(a)- Jurassic-Cambanian Sequence.....	10
(b)- The Cambanian Transgression.....	10
I.1.3 STRUCTURE.....	11
FOLDS.....	11
FAULTS.....	15
JOINTS.....	15

I.2	HYDROGEOLOGICAL BACKGROUND.....	16
I.2.1	REVIEW OF HYDROGEOLOGICAL STUDIES.....	16
I.2.2	THE NUBIAN SANDSTONE AQUIFER SYSTEM.....	22
I.2.3	EXPONENTIAL DECAY OF THE HYDRAULIC HEAD.....	33
I.2.4	SCOPE OF THE PRESENT WORK.....	34
 CHAPTER TWO ESTIMATION OF THE AQUIFER HYDRAULIC PARAMETERS		
II.1	INTRODUCTION.....	36
II.2	RADIAL FLOW TO A WELL.....	37
II.3	THE HYDRAULIC PARAMETERS OF THE GROUNDWATER AQUIFER.....	39
	(a)- AQUIFER LOSS AND WELL LOSS.....	39
	(b)- TRANSMISSIVITY.....	41
II.4	WATER QUALITY.....	54
II.4.1	TOTAL DISSOLVED SOLIDS (TDS).....	54
II.4.2	SPECIFIC CONDUCTANCE.....	58
II.4.3	SODIUM ADSORPTION RATIO (SAR).....	58
II.4.4	HARDNESS OF WATER.....	59
II.4.5	ION DOMINANCE.....	59
II.5	GROUNDWATER EVALUATION.....	60
II.5.1	SUITABILITY OF GROUNDWATER FOR DRINKING PURPOSES.....	67
II.5.2	EVALUATION FOR LIVESTOCK AND POULTRY PURPOSES.....	68
II.5.3	EVALUATION FOR IRRIGATION PURPOSES.....	68
II.5.6	EVALUATION FOR INDUSTRIAL AND BUILDING PURPOSES.....	69

CHAPTER THREE **REGIONAL-SCALE GROUNDWATER FLOW** **MODELING OF THE NUBIAN SANDSTONE** **AQUIFER SYSTEM IN EGYPT**

III.1 THEORETICAL BASIS AND MODELING	
PROCEDURE.....	70
III.1.1 WHAT IS A MODEL.....	71
III.1.2 WHY MODEL.....	71
III.1.3 MODELING PROTOCOL.....	71
III.2 FLOW EQUATIONS AND NUMERICAL SOLVING	
TECHNIQUES.....	73
(a)- GOVERNING EQUATIONS.....	73
i- GROUNDWATER FLOW EQUATION.....	75
1- Steady-State Saturated Flow.....	75
2- Transient Saturated Flow.....	77
3- Transient Unsaturated Flow.....	78
(b)- BOUNDARY CONDITIONS.....	79
(c)- INITIAL CONDITIONS.....	80
(d)-TIME DISCRETIZING	81
III.3 ASSIGNING MODEL DATA.....	81
III.4 SOFTWARE USED FOR MODELING.....	83
III.5 REGIONAL GROUNDWATER FLOW MODEL.....	84
III.5.1 METHODOLOGY.....	84
(a)- Discretization.....	84
(b)- Initial Conditions And Historical Groundwater	
Levels.....	85
III.5.2 MODEL INPUTS.....	85
(a)- Artificial Extraction.....	86
(b)- Evapotranspiration.....	86

(C)- Boundary Conditions.....	86
III.5.3 STEADY STATE AND LONG PERIOD TRANSIENT SIMULATIONS.....	87
III.5.4 SHORT-TERM TRANSIENT SIMULATIONS.....	96
(a)- SIMULATION RESULTS (PERIOD 1960-2000).....	99
1- Hydraulic Head.....	99
2- Drawdown.....	99
3- Groundwater Balance.....	100
(b)- PREDICTION RESULTS (PERIOD 2000-2100).....	107
i- THE FIRST SCENARIO.....	107
1- Hydraulic Head.....	107
2- Drawdown.....	107
ii- THE SECOND SCENARIO.....	108
1- Hydraulic Head.....	108
2- Drawdown.....	108
3- Water Depth.....	108
 CHAPTER FOUR LOCAL-SCALE GROUNDWATER FLOW MODELING	
IV.1 INTRODUCTION.....	118
IV.2 HYDROGEOLOGY OF DAKHLA OASIS.....	119
IV-3. CONCEPTUAL MODEL OF THE GROUNDWATER SYSTEM.....	119
IV.3.1 BOUNDARY CONDITIONS.....	120
IV.4 NUMERICAL MODELING.....	124
IV.4.1 DISCRETIZATION.....	124
IV.4.2 INITIAL CONDITIONS.....	124
IV.4.3 MODEL INPUTS.....	125
IV.4.3.1 Hydrogeological Parameters.....	125
IV.4.3.2 Interaction with Nile River.....	125
IV.4.3.3 Evapotranspiration and Aerial Recharge.....	126
