

**Faculty of Women  
For Arts, Science and Education  
Home Economics Department**

**Thesis  
Submitted in requirement of Ph.D. in Science  
(Home Economics- Textile and Clothing Department)**

**Entitled  
“Using Multi-functional finishing to add value for  
textile and their application”**

**By  
Dina Mahmoud Nabih Tawila  
Assistant lecturer in Home Economics Dep.  
Faculty of Women – Ain Shams University  
Supervised by**

**Prof. Dr. Wafaa. A. El-Sayed**  
Prof. of Textile Chemistry and Dyeing  
Faculty of Women  
Ain shams University

**Prof.Dr. Samiha M. Abo El-Ola**  
Prof. of Chemistry and Textile  
Technology  
Protein and Man Made Fibers Division  
National Research Center

**Dr. Naglaa Abdel Azeem Ameen**  
Lecturer of Textile and Clothing  
Faculty of Women  
Ain Shams University

**Dr.Neveen Hussein Ibrahim Darwish**  
Ph.D. in Science  
(Home Economics-Clothing and Textiles)  
Faculty of Women  
Ain Shams University

**2017**

## *Acknowledgments*

*First and foremost I would like to express my special appreciation and thanks to my advisor Prof. Dr. Wafaa A. El-Sayed Prof. of Textile Chemistry and Dyeing, Faculty of women, Ain Shams University for her guidance and all the useful discussions and brainstorming sessions that inspired me to become an independent researcher. Her deep insights helped me at various stages of my research. Also her advice on my research has been priceless. I would like to thank her for encouraging my research and for allowing me to grow as a research scientist.*

*I'd also like to give a heartfelt, special thanks to Prof. Dr. Samiha M. Abo El-Ola, Prof. of Chemistry and Textile Technology. Protein and Man Made Fibers Division, Textile Research Division, National Research Center. I appreciate all her contributions of time and ideas to make and complete my research. I also want to thank her for her brilliant comments and suggestions. And during the most difficult times when writing this thesis, she gave me the moral support and the freedom I needed to move on.*

*I am also grateful to Dr. Herveen Hussein Elgindy, Ph.D in Science (Home Economics - Clothing and Textiles), Faculty of women, Ain Shams University for continuous guidance to complete this work.*

*Also I would like to express my gratitude to my advisor Dr. Naglaa Abdel Azeem Ameen Lecture of textile and clothing, Faculty of Women, Ain Shams University, for her valuable supervision, efforts, support, continuous help and advice and for giving me a time that she spent with me through my study which made it a great learning experience.*

*I would like to thank Dr. Omnia Khairy, Dr. Shimaa Hassan and Alaa Ashraf for their assistance in finalizing my thesis.*

*A special thanks to my family. Words cannot express how grateful I am to my mother, father and my brothers Mohamed, Abd-Alrahman and my sister Eman and for all of the sacrifices that they have made on my behalf. Their prayer for me was what sustained me thus far.*

*I also wish to give my heartfelt thanks to my love husband, MR. Ali Helmy, whose unconditional love,*

*patience, and continual support of my academic endeavors over the past several years enabled me to complete this thesis, also I would like to thank my new baby Mohamed Ali (Bodo) for not being so noisy these days.*

*Finally, very thanks to my forever interested, encouraging and always enthusiastic late grandmother Taita karthar (May her soul rest in peace). she was always keen to know what I was doing and how I was proceeding.*

<b>1. Introduction and literature review</b>	<b>1</b>
<b>1.1. Natural protein fibers</b>	<b>1</b>
<b>1.1.1. Wool fiber</b>	<b>1</b>
<b>1.1.1.1. Physical structure of wool fiber</b>	<b>2</b>
<b>1.1.1.2. Chemical structure of wool fiber</b>	<b>3</b>
<b>1.1.1.3. Fiber properties</b>	<b>4</b>
<b>1.1.1.3.1. Physical properties</b>	<b>4</b>
<b>1.1.1.3.2. Mechanical properties</b>	<b>5</b>
<b>1.1.1.3.3. Chemical properties</b>	<b>5</b>
<b>1.1.1.3.4. Thermal properties</b>	<b>6</b>
<b>1.1.1.3.5. Environmental properties</b>	<b>6</b>
<b>1.1.2. Silk fiber</b>	<b>6</b>
<b>1.1.2.1. Physical structure of silk fiber</b>	<b>7</b>
<b>1.1.2.2. Chemical structure of silk fiber</b>	<b>7</b>
<b>1.1.2.3. Fiber properties</b>	<b>8</b>
<b>1.1.2.3.1. Physical properties</b>	<b>8</b>
<b>1.1.2.3.2. Mechanical properties</b>	<b>8</b>
<b>1.1.2.3.3. Chemical properties</b>	<b>9</b>
<b>1.1.2.3.4. Thermal properties</b>	<b>9</b>
<b>1.1.2.3.5. Environmental properties</b>	<b>9</b>
<b>1.2. Dyeing</b>	<b>9</b>
<b>1.2.1. Acid dyes</b>	<b>10</b>

1.2.1.1. Chemical structure of acid dyes	10
1.2.1.2. Mechanism of dyeing wool with acid dyes	11
1.2.1.3. Classification of acid dyes according to dyeing characteristics	12
1.3. Fabric coating	13
1.3.1. Polyurethane adhesive (resin)	14
1.3.1.1. Chemistry of polyurethane	15
1.3.1.1.1. Polyurethane structure	15
1.3.1.1.2. Basic Chemical Reactions	16
1.3.1.1.3. Raw Materials	17
1.3.1.2. Advantages and disadvantages of using polyurethane coatings on textiles	20
1.3.1.3. Polyurethane products	21
1.4. Antimicrobial textile	21
1.4.1. Requirements for antimicrobial finishing	22
1.4.2. Modes of antimicrobial action	23
1.4.3. Antimicrobial effects	24
1.4.4. Mechanism of antimicrobial action	24
1.4.5. Antimicrobial agents	25
1.4.5.1. Organic compounds	25
1.4.5.1.1. Halogenated phenols	25
1.4.5.1.2. Quaternary ammonium compounds	26
1.4.5.1.3. Polybiguanides	27
1.4.5.1.4. N-halamine compounds	28
1.4.5.1.5. Chitosan	29
1.4.5.1.6. Bioactive Plant-based antimicrobial agents	30
1.4.5.2. Inorganic compounds	31
1.4.5.2.1. Metals and metal oxides	31
1.4.5.2.1.1. Zinc Oxide (ZnO)	33
1.4.6. Evaluation of antimicrobial efficiency	34

<b>1.5. Durable press finishing</b>	<b>34</b>
<b>1.5.1. Factors affecting wrinkling</b>	<b>36</b>
<b>1.5.2. The measurement of wrinkle and crease recovery</b>	<b>37</b>
<b>1.6. Ultraviolet (UV) protection and textiles</b>	<b>37</b>
<b>1.6.1. Ultraviolet radiation (UVR)</b>	<b>38</b>
<b>1.6.2. Mechanism of UV protection</b>	<b>39</b>
<b>1.6.3. Effects of structural parameters on UV protection properties of textiles</b>	<b>40</b>
<b>1.6.3.1. Effects of fiber types</b>	<b>40</b>
<b>1.6.3.2. Effects of fabric construction</b>	<b>40</b>
<b>1.6.3.3. Effects of dyes and colors</b>	<b>42</b>
<b>1.6.3.4. Effects of stretching, wetting and laundering</b>	<b>42</b>
<b>1.6.3.5. Effects of UV absorbers</b>	<b>43</b>
<b>1.6.4. Evaluation of UV protection finishes</b>	<b>43</b>
<b>1.7. Fashion design</b>	<b>44</b>
<b>1.7.1. Interrelationship between fashion and textiles</b>	<b>44</b>
<b>1.7.2. Aspects of fashion design</b>	<b>46</b>
<b>1.7.2.1. Functional design</b>	<b>46</b>
<b>1.7.2.1.1. Classification of functional clothing</b>	<b>47</b>
<b>1.7.2.2. Structural design</b>	<b>48</b>
<b>1.7.2.3. Aesthetic design</b>	<b>48</b>
<b>1.7.3. Pattern Making</b>	<b>48</b>
<b>1.7.3.1. Methods of Pattern Making</b>	<b>49</b>
<b>1.7.3.1.1. Paper Pattern Making (flat pattern making)</b>	<b>49</b>
<b>1.7.3.1.2. Draping</b>	<b>49</b>
<b>2. Aim of the work</b>	<b>51</b>
<b>3. Experimental work</b>	<b>53</b>
<b>3.1. Materials</b>	<b>53</b>
<b>3.1.1. Fabrics</b>	<b>53</b>
<b>3.1.2. Chemicals</b>	<b>53</b>

3.1.3. Microorganisms	53
3.1.4. Media	53
3.1.5. Dyes	53
3.2. Methods	54
3.2.1. Fabric scouring	54
3.2.2. Finishing technique	54
3.2.3. Dyeing	55
3.2.4. Tie and dye	55
3.3. Test methods	55
3.3.1. Wet crease recovery angle	55
3.3.2. Antibacterial properties	56
3.3.3. Durability test	56
3.3.4. Ultraviolet Protection Factor (UPF) evaluation	56
3.3.5. Scanning Electron Microscope (SEM) and Electron Dispersion Emission X-ray (EDX)	57
3.3.6. Physico-mechanical properties evaluation	57
3.3.6.1. The fabric stiffness	57
3.3.6.2. Tearing resistance	57
3.3.6.3. Tensile strength and elongation	57
3.3.6.4. Fabric air permeability	57
3.3.6.5. Fabric wettability properties	58
3.3.7. Color strength	58
3.3.8. Fastness properties measurements	58
3.3.8.1. Light fastness	58
3.3.8.2. Wash fastness	58
3.4. Designs and their draping/patterns	58
4. Results and Discussion	66
4.1. The effect of the treatment with PU and ZnO on wool and silk fabrics	66

4.1.1. The effect of the treatment of wool and silk fabrics with polyurethane (PU) and zinc oxide (ZnO) on antibacterial activity and wet crease recovery angle and their durability	66
4.1.2. Effect of polyurethane (PU) concentration on antibacterial activity and wet crease recovery angle of finished wool and silk fabrics	70
4.1.3. Effect of zinc oxide (ZnO) concentration on antibacterial activity and wet crease recovery angle of finished wool and silk fabrics	71
4.1.4. Effect of curing temperature on antibacterial activity and wet crease recovery angle of finished wool and silk fabrics	73
4.1.5. Effect of curing time on antibacterial activity and wet crease recovery angle of finished wool and silk fabrics	74
4.2. Durability to laundering	76
4.3. Scanning Electron Microscope (SEM) and Electron Dispersion Emission X-ray (EDX) of finished wool and silk fabrics	79
4.3.1. SEM and EDX of finished woolen fabrics	79
4.3.2. SEM and EDX of finished silk fabrics	82
4.4. Ultraviolet Protection Factor (UPF) evaluation	85
4.4.1. Evaluation of Ultraviolet Protection Factor (UPF) of finished wool fabrics	86
4.4.2. Evaluation of Ultraviolet Protection Factor (UPF) of finished silk fabrics	87
4.5. Physico-mechanical properties	88
4.6. Effect of acid dyeing of wool and silk fabrics	91
4.7. Fastness properties of acid dyeing wool and silk fabrics	94
5. Designs and products	98

<b>5.1. The value addition</b>	<b>98</b>
<b>5.1.1. Multifunctional finishing</b>	<b>98</b>
<b>5.1.1.1. Wrinkle free garments</b>	<b>98</b>
<b>5.1.1.2. Antibacterial protection garments</b>	<b>99</b>
<b>5.1.1.3. Ultraviolet protection garments</b>	<b>99</b>
<b>5.1.1.4. Hydrophilic garments</b>	<b>100</b>
<b>5.1.2. Tie-dyeing Techniques</b>	<b>100</b>
<b>5.1.3. Embroidery</b>	<b>102</b>
<b>5.2. The analysis of designs and products</b>	<b>103</b>
