2011

PhD Thesis

Student name: Ali Mohammed Ali Hassanien

Thesis title: Study of some physical and photovoltaic properties of organic semiconductor thin films

Degree: PhD of Teacher Preparation in Science (Physics)

Supervisory committee

Acknowledgment	i
List of Figures	ii
List of Tables	x
Abstract	xi
Introduction	1

Chapter 1:

Molecular organic semiconductors.....	11
1.1 Essential properties of organic semiconductors	12
1.2 Organic electronics: Using organic molecules as semiconductors	15
1.2.1 Electronic structure of organic semiconductors and the definition of conjugated materials	17
1.3 Band Structure of organic materials	21
1.4 Electronic traps in organic transport layers	28
1.4.1 Origin of trap states	31
1.5 Charge Transport and Electrical properties in Organic Disordered Systems	33
1.5.1 DC electrical conductivity.....	35
1.5.2 Dielectric properties and AC conductivity	42
1.5.2.1 (a) Macroscopic and microscopic view	42
1.5.2.1 (b) Mechanisms of polarization	45
1.5.2.2 AC conductivity	49
1.6 I-V characteristics of metal/semiconductor contacts.....	66
1.6.1 Electronic structure of organic / metal interfaces	66
1.7 Optical properties of organic semiconductors	76
1.7.1 Mechanisms of optical absorption	78
1.7.2 The absorption coefficient and the optical band gap...	80

1.7.3 Dispersion in semiconductor materials	83
1.8 Photovoltaic of organic materials	88
1.8.1 The Ideal Solar Cell	92
1.8.2 The components of ideal solar cell	93
1.8.3 Short Circuit Current, Open Circuit Voltage and Fill Factor.....	95
1.8.4 Photoresponsivity, External Quantum Efficiency and Power Conversion Efficiency	97
1.8.5 Device Architectures.....	99
1.9 Literature review	111
1.9.1 Structural and molecular properties	111
1.9.2 Optical properties	117
1.9.3 Some electrical transport properties	121

Chapter 2:

Experimental techniques.....	128
2.1 Material under investigation	129
2.2 Sample preparation	130
2.2.1 Substrate cleaning.....	130
2.2.2 Thin films preparation	131
2.3 Film thickness measurements	133
2.3.1 Quartz crystal thickness monitor	133
2.3.2 Interferometric method	134
2.4 Structural investigation of FeTPPCI	137
2.4.1 Differential thermal analysis (DTA) technique	137
2.4.2 Thermal Stability	138
2.4.3 X-ray diffractometry (XRD) technique	138
2.4.4 Scanning electron microscope	140
2.4.5 Infrared spectroscopy technique	140
2.5 Optical measurements	141
2.5.1 Film transmittance and reflectance	141

2.5.2	Determination of the optical constants	145
2.6	Cyclic voltammetry	145
2.7	Electrical measurements.....	149
2.7.1	Bulk samples preparation	149
2.7.2	Planar thin film samples preparation	150
2.7.3	Devices preparation and measurements	151
2.7.3.1	Single-layer organic device	151
2.7.3.2	Hybrid organic-inorganic device preparation and measurements	152
2.7.3.3	Current density-voltage (J-V-T) measurements ...	153
2.7.3.4	Capacitance-voltage (C-V) measurements	154

Chapter 3:

Structural characterization of FeTPPCL in powder and thin film forms.....

3.1	Differential thermal analysis (DTA)	156
3.2	Infrared spectra investigation.....	157
3.3	X-ray diffraction studies of FeTPPCL in powder form	160
3.4	Scanning electron microscope studies	162
3.5	Electrochemical investigations	164

Chapter 4:

Optical properties of FeTPPCL thin films.....

4.1	The electronic absorption spectra	167
4.2	Transmittance and reflectance spectra	168
4.3	Optical constants (n and k) of FeTPPCL films	169
4.4	Influence of X-ray irradiation on the optical properties of FeTPPCL thin films	171
4.5	Influence of annealing on the optical properties of FeTPPCL thin films	186

Chapter 5:

Electrical properties of FeTPPCL in bulk and thin films forms.....	195
5.1 Type of conduction and ohmic contact.....	195
5.1 Dark electrical conductivity investigation	195
5.3 The electrical properties of thin film sandwich device (Au/FeTPPCL/ITO).....	201
5.4 Electrical conductivity and dielectric relaxation of bulk iron (III) chloride tetraphenylporphyrin.....	208

Chapter 6:

FeTPPCL/p-Si hybrid O/I solar cells.....	219
6.1 Dark current-voltage characteristics	220
6.2 Capacitance-voltage characteristics	231
6.3 Current-voltage characteristics under illumination	232
Conclusion	235
References	239
Arabic summary
