ROLE OF ULTRASONOGRAPHY  
IN THE DIAGNOSIS OF  
SCROTAL SWELLINGS  
ESSAY

Submitted for partial fulfillment of the  
**M. Sc. Degree in**  
**RADIODIAGNOSIS**

Presented by

ALI ABDALLA AMER  
M.B.B.CH. & DIPLOMA OF  
Radiodiagnosis (Ain Shams University)

Under Supervision of

DR. OMAR HESSEIN OMAR  
Ass. Professor of Radiodiagnosis

DR. MOUNIR SOBHY GUIRGUIS  
Lecturer Of Radiodiagnosis

FACULTY OF MEDICINE  
AIN SHAMS UNIVERSTIY  
CAIRO 1998.

## ACKNOWLEDGMENT

I wish to express my sincere gratitude and thanks to *Dr. Omar Hessin Omar*, Assistant Professor of Radiodiagnosis, Ain Shams University for his generous help, support and kind advice.

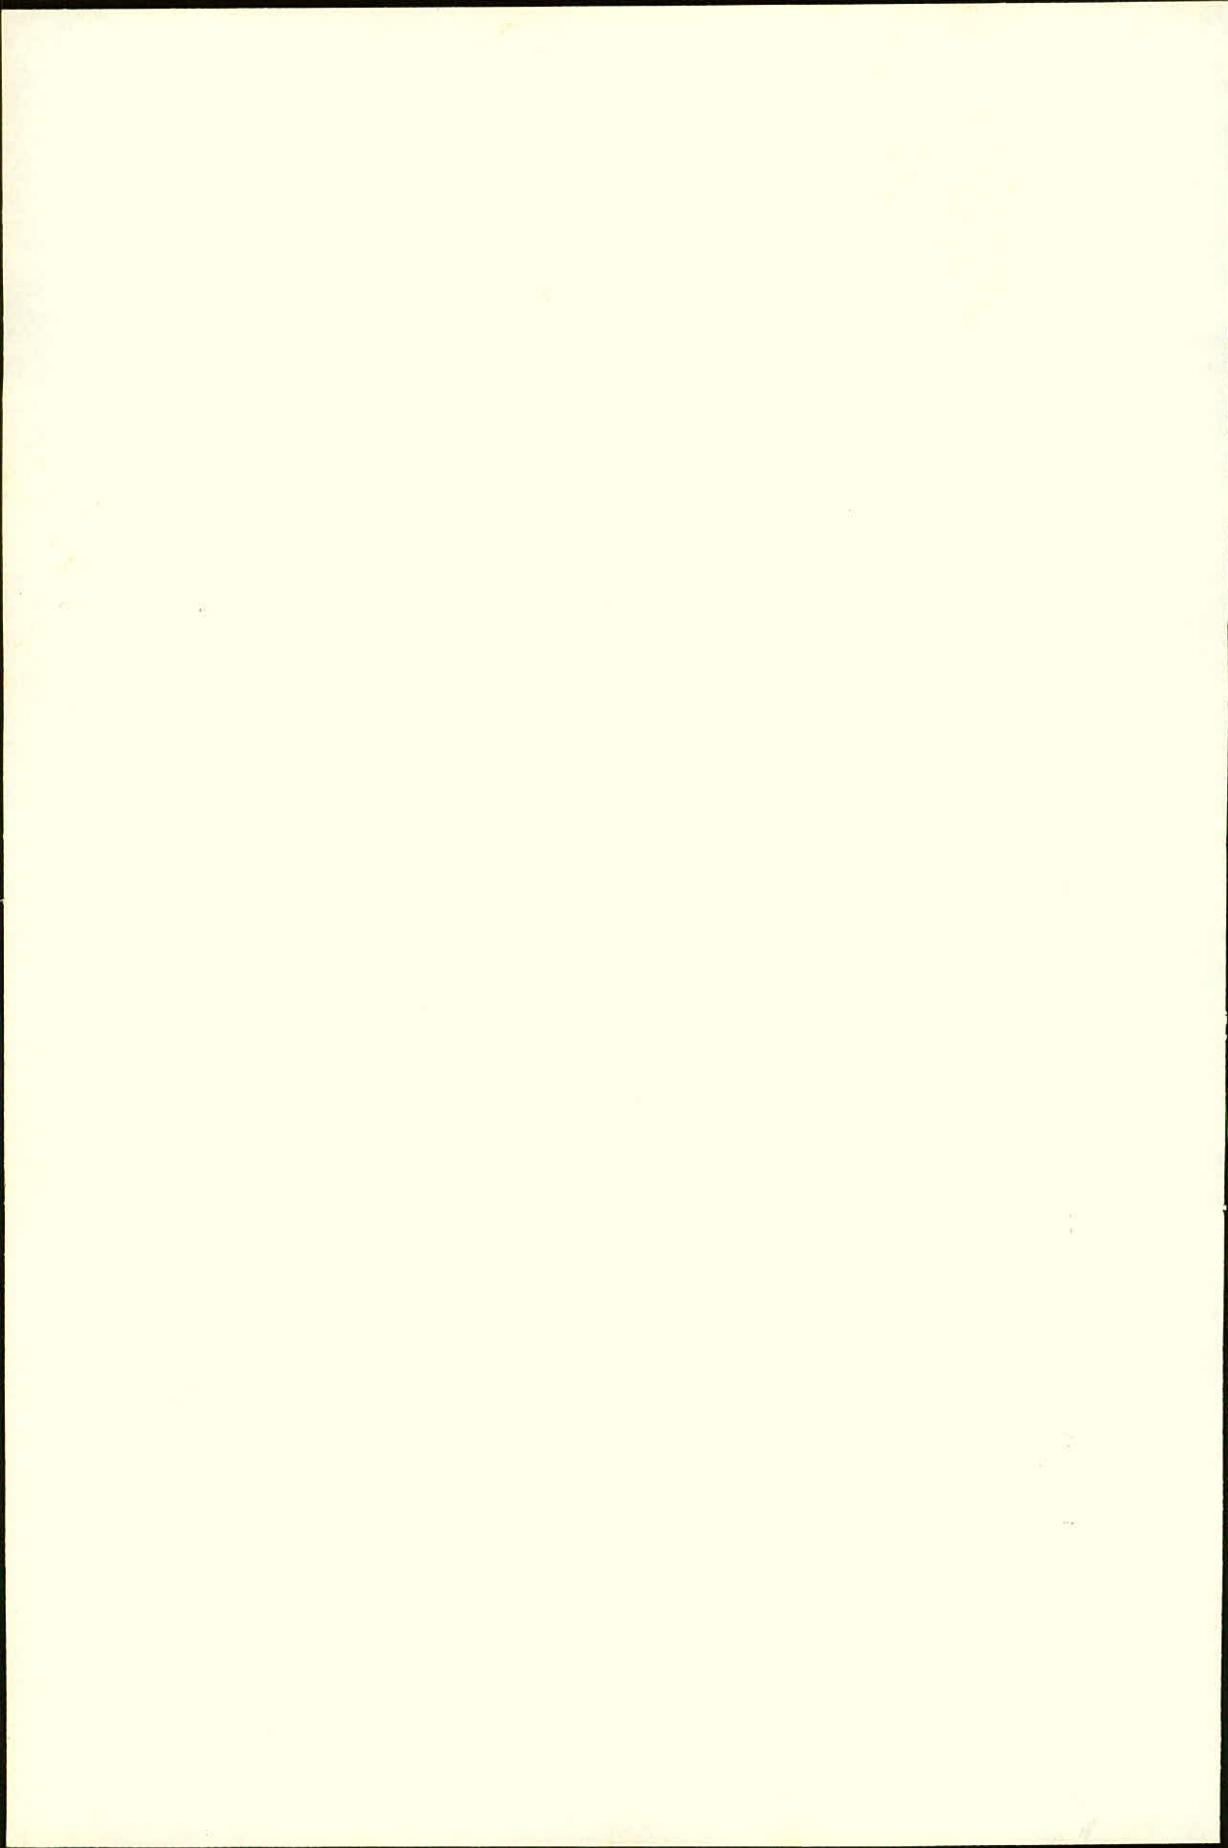

I would like also to express my faithful gratitude and thanks to *Dr. Mounir Sobhy Guirguis*, Lecturer of Radiodiagnosis, Ain Shams University for his continuous help, guidance and valuable advice throughout the preparation of this work.

# CONTENTS

|  | Page |
|--|------|
| - Introduction and aim of work.                        | 1    |
| - Anatomy of the scrotum.                              | 2    |
| - Technique of scrotal examination.                    | 9    |
| - Sonographic appearance of normal scrotal structures. | 15   |
| - Pathology of different scrotal lesions.              | 20   |
| - Sonographic findings in different scrotal lesions.   | 52   |
| - Summary and conclusion.                              | 84   |
| - References.  | 85   |
| - Arabic summary.                                      | 90   |

# LIST OF FIGURES AND TABLES

## FIGURES

|   | Page |
|---|------|
| Fig. (1): Coronal section through the scrotum and spermatic cord.                                     | 2    |
| Fig. (2): Longitudinal section of the testis and epididymis.  | 4    |
| Fig. (3): Course of testicular arteries.  | 8    |
| Fig. (4-a): Normal sonographic findings from longitudinal scan.                                       | 10   |
| Fig. (4-b): Normal sonographic findings from transverse scan.   | 10   |
| Fig. (5): Valsalva maneuver and standing position help to demonstrate flow inside the spermatic cord. | 13   |
| Fig. (6): Color Doppler helps to guide the needle into non-vascularized areas.                        | 14   |
| Fig. (7): Prominent transtesticular artery.   | 17   |
| Fig. (8): Two different aspects of the capsular arteries.   | 18   |
| Fig. (9): Capsular and centripetal arteries.  | 19   |
| Fig. (10): Torsion of the testis.   | 24   |
| Fig. (11): Gross appearance of granulomatous orchitis.  | 29   |
| Fig. (12): Microscopic appearance of granulomatous orchitis.  | 29   |
| Fig. (13): Seminoma of the testis (Grossly).  | 35   |
| Fig. (14): Seminoma of the testis (Microscopically).  | 36   |
| Fig. (15): Embryonal carcinoma of the testis (Grossly).   | 38   |
| Fig. (16): Embryonal carcinoma of the testis (Microscopically).                                       | 38   |
| Fig. (17): Choriocarcinoma (Microscopically).   | 40   |
