

Influence of Tooth Surface Roughness and Cement Formulation on Retention of Cast Crowns

Thesis

Submitted in partial fulfillment of requirement for master
degree in crown and bridge fixed prosthodontics

By

Abdel-Moteleb Amara El-Darwish

(B.D.S.)

Faculty of Dentistry, Garunise University, Benghazi
The Libyan Arab Republic Of Great El Jamahiriya
1982

Faculty of Dentistry
Ain-Shams University

2006 - 2007

Supervisors

Dr. Amina Mohammed Hamdy

Assistant Professor of Fixed Prosthodontics

Faculty of Dentistry - Ain Shams University

Dr. Jehan Farouk

Lecturer of Fixed Prosthodontics

Faculty of Dentistry – Ain Shams University

To the Spirit of My Father

My Great Mother

My Dear Wife

And My Lovely Son and Daughters

ACKNOWLEDGEMENT

I am deeply offer my cordial thanks to Dr. Amina Hamdy, Assistant Professor and Head of fixed prosthodontics, Faculty of Dentistry, Ain-Shams University, for her endless efforts, valuable assistance and moral support during the entire course of this work.

My sincere thanks are also extended to Dr. Jehan Farouk, Lecturer of fixed prosthodontics, Faculty of Dentistry, Ain-Shams University, for her spiritual encouragement, sincere co-operation and valuable advices during this work.

I am also indebted to Dr. Adel Mohammed Abdel-Azim Professor of Oral Pathology Ain Shams University for his useful guidance and effort he devoted for statistical analysis.

I am also indebted to Dr. Iman Mohammed Helmy Lecturer of Oral Pathology Ain Shams University for her guidance and effort he devoted during the preparation of this work.

I would also thank all the members of Conservative Dentistry Department, Faculty of Dentistry, Ain-Shams University for their help and guidance during the preparation of this study.

Finally, I would like to express my deep appreciation to all those who gave me a hand during the entire course of this work.

Table of Contents

List of Tables.....	iii
List of Figures and graphs.....	iv
Introduction	1
Review of Literature.....	5
Surface roughness of dentine:.....	5
Effect of Luting cements type, manipulation, strength, and setting behavior on dentin bonding:	12
Preparation of dentin surface for bonding:	28
Aim of study.....	35
Materials and methods	36
Materials:	36
Methods:	37
Preparation of samples.	37
I- Collection of teeth:.....	37
II- Mounting the teeth in epoxy resin blocks:	37
III Samples groupings:	40
Tooth preparation prior to surface treatments:	41
Impression making:	41
Die preparations.....	42
Wax patterns construction:.....	42
Spruing, investing, casting, divesting, and cast try in:	45
Tooth Surface treatment prior to cementation:.....	45
Roughness calculation:.....	48
Cementation:.....	48
Subgroup (a):	49

Table of Contents

Subgroup (b):.....	49
Subgroup(c):.....	50
Resistance to dislodgement of metal copings Measurements:	50
Statistical Methods:	53
Results	54
Surface roughness.....	54
Dislodgement resistance under tension results.....	57
Mode of failure.....	67
Discussion.....	86
Summary and conclusions.....	95
Summary.....	95
Conclusions;	97
Recommendations;	98
