**RELATIONSHIP BETWEEN POSITIONING OF RESPIRATORY  
DISTRESSED NEWBORNS AND OXYGEN SATURATION**

Thesis

610,7362

Submitted to The Faculty of Nursing

University of Alexandria

In partial fulfillment of the requirements

of

**Master degree**

In

**Pediatric Nursing**

By

**Shimaa Mohammed Moursy Mosaad**

Faculty of Nursing

University of Alexandria

2007

## **SUPERVISORS**

**Prof Dr. Azza Mostafa Darwish**

Professor of Pediatric Nursing

Faculty of Nursing

University of Alexandria

**Dr. Yousre Abd El-Salam Gaafar**

Assistant professor of Pediatric Nursing

Faculty of Nursing

University of Alexandria

**Dr. Mohamed Farouk Mohamed**

Assistant professor of Pediatrics

Faculty of Medicine

University of El-Minia

**RELATIONSHIP BETWEEN POSITIONING OF RESPIRATORY  
DISTRESSED NEWBORNS AND OXYGEN SATURATION**

A Thesis

Presented to the Faculty of Nursing  
Alexandria University  
In Partial fulfillment of the  
Requirements

Of

**Master Degree**

In

**PEDIATRIC NURSING**

By

**Shimaa Mohammed Moursy Mosaad**

**Examiners' Committee:**

Prof. Dr. Azza Mostafa Darwish.

# *Dedicated To*

*The Soul of my Father*

*My Beloved Mother*

*and Mother in law*

*My sincere husband*

*My beautiful son*

*All my family*

*And*

*Beloved friends*

# *Acknowledgement*

*Thank to Allah  
for  
accomplishment of this work*

I wish to express my deepest gratitude to all those who assisted me to complete this work.

First and foremost, my thanks are directed to **Professor Dr. Azza Mostafa Darwish**, Professor of Pediatric Nursing, Faculty of Nursing, University of Alexandria, for her unlimited help and continuous insistence on perfection, without her constant supervision, this thesis could not have achieved its present form.

Many thanks and appreciation to **Assistant. Prof. Youssr Abd El Salam Gaafar**, Assistant Professor of Pediatric Nursing, Faculty of Nursing, University of Alexandria, for her supervision and encouragement and for her kindness throughout the work.

I am greatly indebted to **Assistant Prof. Mohamed Farouk Mohamed Ahmed Afify**, Assistant Professor of Pediatrics, Faculty of Medicine, University of El Minia, for his fruitful suggestions and wise guidance created this thesis.

Thanks to all staff members of El Minia General Hospital.

## LIST OF CONTENTS

chapter		Page
I	Introduction .....	1
II	Review of Literature .....	3
III	Material and Methods.....	25
IV	Results.....	27
V	Discussion .....	73

## LIST OF FIGURES

Figure		Page
1	Respiratory system of the newborn	8
2	Oxygen diffusion across the alveolus into the capillary	11
3	Prone position [Turrill, 1992].	22
4	Supine position.	23
5	Fowler's position.	24
6	Characteristics of the studied subject	30
7	Comparison between mean of neonates' temperature with different durations in each position for three days	61
8	Comparison between mean of neonates' heart rate with different durations in each position for three days	64
9	Comparison between mean of neonates' respiratory rate with different durations in each position for three days	67
10	Comparison between the mean of neonates' oxygen saturation (SpO <sub>2</sub> ) with different durations in each position for three days	70

## LIST OF TABLES

Table		Page
(I)	Characteristics of the studied subject	29
(II)	Neonatal physiological characteristics	32
(III)	Presence of neonatal respiratory distress signs	34
(IV)	Comparison of neonates' temperature during the three days in the supine position	36
(V)	Comparison of neonates' heart rate during the three days in the supine position	38
(VI)	Comparison of neonates' respiratory rate during the three days in the supine position	40
(VII)	Comparison of neonates' oxygen saturation (SpO <sub>2</sub> ) during the three days in the supine position	42
(VIII)	Comparison of neonates' temperature during the three days in the prone position	44
(IX)	Comparison of neonates' heart rate during the three days in the prone position	46
(X)	Comparison of neonates' respiratory rate during the three days in the prone position	48
(XI)	Comparison of neonates' oxygen saturation (SpO <sub>2</sub> ) during the three days in the prone position	50
(XII)	Comparison of neonates' temperature during the three days in the Fowler's position	52
(XIII)	Comparison of neonates' heart rate during the three days in the Fowler's position	54
(XIV)	Comparison of neonates' respiratory rate during the three days in the Fowler's position	56
(XV)	Comparison of neonates' oxygen saturation (SpO <sub>2</sub> ) during the three days in the Fowler's position	58
