

طرق علاج الضيق الشديد لمجرى البول الأمامي باستخدام رقعه من الجلد التناسلي
أو الغشاء المبطن للفم:
دراسة مقارنة بين توسيع مجرى البول بوضع الرقعه على سقف او اسفل المجرى

رسالة توطئة للحصول على درجة الدكتوراه في جراحة المسالك البولية

مقدمه من

الطبيب / ايهاب عبد الله الطحاوي
ماجستير جراحة المسالك البولية
جامعة عين شمس

تحت اشراف

الأستاذ الدكتور / عبد الوهاب القصبي
استاذ و رئيس قسم جراحة المسالك البولية
كلية الطب - جامعة عين شمس

الأستاذ الدكتور / جيرالد جوردان
استاذ و رئيس قسم جراحة المسالك البولية
كلية الطب - جامعة شرق فيرجينيا الولايات المتحدة

الأستاذ الدكتور / عمرو نوير
استاذ بقسم جراحة المسالك البولية
كلية الطب - جامعة عين شمس

الدكتور / هاني حامد جاد
مدرس بقسم جراحة المسالك البولية
كلية الطب - جامعة عين شمس

ACKNOWLEDGMENT

My deepest appreciation goes to all who contributed to this work, including the patients included in the study from Egypt and the united states. I am indebted to my parents who taught me everything in life. I thank ***Dr. Elkassaby*** for mentoring and teaching me the basics of reconstructive surgery. Without the outstanding support, and the meticulous attention to details, offered by ***Dr. Gerald Jordan***, this work could not be done. I would also like to thank ***Dr. Amr Noweir*** and ***Dr. Hany Hamed*** for their invaluable help throughout my years in urology, and advice during the study.

I would like to express my appreciation for ***Robin Franklin*** for the outstanding illustrations, and to ***Dr. John Ullian***, PhD for linguistic, and statistical recommendations.

List of Tables

-I-

No.	Comment	Page
1	Shows the success rate of the different authors using the ventral buccal mucosa onlay urethroplasty technique with follow up mean of 34.6 months	62
2	Shows the success rate of the different authors using the dorsal buccal mucosa onlay urethroplasty technique with follow up mean of 38 months	64
3	Showing results of staged buccal urethroplasty	68
4	Restricture rate after different types of urethroplasty	73

List of Figures

No.	Comment	Page
1	Sagittal section of the pelvis. The urethra is subdivided into the anterior urethra and posterior urethra.	20
2	Internal pudendal artery shown as it passes through Alcock's canal.	22
3	Arterial blood supply of the penis	23
4	Blood supply of the penile skin	24
5	Venous drainage of the penis	26
6	Superficial perineal pouch	29
7	Male urethral sphincter	31
8	The fascial coverings of the penis	32
9	Colle's fascia	33
10	Membranous urethra	34
11	Effect of urethral mobilization	38
12	Radiologic landmarks of the normal retrograde urethrogram.	45
13	Radiologic landmarks of the normal voiding cystourethrogram	46
14	Technique of urethral ultrasound	48

15	Skin grafts	52
16	Use of full thickness skin grafts in repair of urethral strictures	54
17	Split thickness skin graft quilted	57
18	Comparison of the support to the ventral graft and the dorsal graft by corpora cavernosa	63
19	Dennis Brown technique	67
20	Random Flap	69
21	Axial cuticular flaps	69
22	Fasciocutaneous and musculocutaneous flap	70
23	Harvest of the penile island flap	71
24	Buccal mucosa tray	82
25	The exaggerated lithotomy	86
26	Urethra is exposed	87
27	Urethra mobilized	88
28	Floor strip anastomosis	90
29	Urethral incision and dorsal graft onlay	91
30	Dorsal stricturotomy	93
31	Graft quilted	93
32	Mucosa to mucosa coaptation	94
