Abstract

Name: Taha Naji Mohammed alawbali

The Effectiveness of an Existential Counseling Program to deal
with institutionalized Adolescents identity crises

The objectives of the study are as follows: Shading more light on the concept and principles of ontological school; the philosophical and practical sides. Recognizing the (IC) of the (THI). Designing an ontological guiding program (OGP) based on the concepts and principles of the ontological school and examining its effectiveness on developing the ability of (THI) in dealing with (IC). Examining the effectiveness of suggested (OGP) after the ending of the application and during the following-up period. The sample selected is 20 teenagers from the housing institutions; they are between (13-19) years old, divided into two groups; the empirical group, which consists of 10 students, is exposed to the aforementioned guiding program; the control group, which consists of 10 students, considering the homogeneity among the sample members like age, learning level, reasons of joining the institution. The sample under study has been selected from the whole population _ 67 teenagers who
