

Analytical Study on Certain Polyionic Drugs

Thesis

Presented for the partial fulfillment of

**Master Degree in Pharmaceutical Sciences
(Pharmaceutical Analytical Chemistry)**

By

Noha Morsy Ibrahim El Zahar
B.SC. Pharmaceutical Sciences 2010

**Department of Pharmaceutical Analytical Chemistry
Faculty of Pharmacy
Ain Shams University**

Under the Supervision of

Prof. Dr.
Amira Mabrouk El-Kosasy

**Professor and Head of Pharmaceutical Analytical Chemistry Department
Faculty of Pharmacy
Ain Shams University**

Dr. Omar Abdel-Aziz Ali Ghonim

**Associate Professor of Pharmaceutical Analytical Chemistry
Faculty of Pharmacy
Ain Shams University**

Dr. Nancy Magdy Hana

**Lecturer of Pharmaceutical Analytical Chemistry
Faculty of Pharmacy
Ain Shams University**

**Pharmaceutical Analytical Chemistry Department
Faculty of Pharmacy – Ain Shams University**

2014

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

((قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا إِلَّا مَا
عَلَّمْتَنَا إِنَّكَ أَنْتَ الْعَلِيمُ الْحَكِيمُ))

صدق الله العظيم

سورة البقرة آية (٣٢)

ACKNOWLEDGEMENT

All thanks and gratitude is to my lord Allah, who has given me the strength and will to finish this work. Words and thanks will never suffice to praise Allah for his mercy, blessings and guidance that lead me through the tough times.

I would like to express my deepest gratitude and sincere appreciation to **Prof. Dr. Amira Mabrouk El-Kosasy**, Professor and head of Pharmaceutical Analytical Chemistry department, Faculty of Pharmacy, Ain Shams University, for her kind and expert supervision, patience, unlimited support, generous assistance, and for the extensive effort, time and energy. I will always be indebted to her kindness and continuous encouragement. No words can describe my gratitude to her. It's really an honor to be one of her students.

My profound thanks are to **Associate Prof. Dr. Omar Abdel-Aziz**, Associate Professor of Pharmaceutical Analytical Chemistry department, Faculty of Pharmacy, Ain Shams University, who was always supporting me with great patience, constructive advice, continuous encouragement and valuable assistance throughout the whole work. It's really an honor to be one of his students.

My sincere appreciation to **Dr. Nancy Magdy Hana**, Lecturer of Analytical Chemistry department, Faculty of Pharmacy, Ain Shams University, for her supervision, untiring help, valuable assistance, priceless guidance and fruitful opinions throughout the whole practical work. It's really an honor to be one of her students.

I am very grateful to my father, sisters and especially my dear mother for standing by me in every step, for their praying, their continuous support and encouragement all the way through and giving me all the strength and faith more than I needed.

Finally my sincere appreciation and thanks go to all my colleagues and staff members in Analytical Chemistry Department, for their friendly cooperation and constant support.

Noha Morsy El Zahar

Contents

Part I: General Introduction and Literature Review

Section A: Introduction

I.A.1. Polyionic Compounds.....	1
1.A.2. Properties of polyionic compounds.....	1
1.A.3. Classifications of polyionic compounds	4

Section B: Literature review

I.B.1. Cromolyn sodium (CS)	7
I.B.1.1. Structure	7
I.B.1.2. Properties	7
I.B.1.3. Pharmacology	8
I.B.1.4. Pharmacokinetics	8
I.B.1.5. Methods of analysis	9
I.B.1.5.1. Electrochemical methods	9
I.B.1.5.2. Spectroscopic methods.....	10
I.B.1.5.2.1. Spectrophotometric methods	10
I.B.1.5.2.2. Spectrofluorimetric method	11
I.B.1.5.3. Chromatographic methods	11
I.B.1.5.3.1. Capillary electrophoresis (CE).....	11
I.B.1.5.3.2. Thin layer chromatographic (TLC) methods	12
I.B.1.5.3.3. High performance liquid chromatographic (HPLC) methods	12
I.B.2. Polymyxin B (Poly B).....	16
I.B.2.1. Structure	16
I.B.2.2. Properties	17
I.B.2.3. Pharmacology	17
I.B.2.4. Pharmacokinetics	18

Contents

I.B.2.5. Methods of analysis	18
I.B.2.5.1. Spectroscopic methods.....	18
I.B.2.5.1.1. Spectrophotometric methods	18
I.B.2.5.1.2. Spectrofluorimetric method	19
I.B.2.5.2. Chromatographic methods	19
I.B.2.5.2.1. Capillary electrophoresis (CE).....	19
I.B.2.5.2.2. Paper chromatography method	21
I.B.2.5.2.3. Thin layer chromatography (TLC) methods	21
I.B.2.5.2.4. Gas chromatographic (GC) methods	23
I.B.2.5.2.5. High performance liquid chromatographic (HPLC) methods	23
I.B.2.5.2.6. Ultra-performance liquid chromatographic (UPLC) method	29

Part II: Potentiometric determinations of certain polyionic drugs

Section A: Introduction to ion-selective electrodes (ISEs)

Introduction.....	30
-------------------	----

Section B: Potentiometric determinations of Cromolyn sodium using electrochemical sensors in presence and in absence of iron oxide nanoparticles

II.B.1.Introduction	38
II.B.2. Experimental.....	38
II.B.2.1. Instrumentation	38
II.B.2.2. Samples.....	38
II.B.2.2.1. Pure sample.....	38
II.B.2.2.2. Market sample	39
II.B.2.3. Reagents.....	39

Contents

II.B.2.4. Standard solutions.....	40
II.B.2.5. Procedures	40
II.B.2.5.1. Preparation of the PVC-membranes	40
II.B.2.5.2. Characterization of iron oxide NPs	41
II.B.2.5.3. Functionalization of iron oxide NPs.....	41
II.B.2.5.4. Sensors assembly	41
II.B.2.5.5. Direct potentiometric determination of CS in its pure sample	42
II.B.2.5.6. Direct potentiometric determination of CS in pharmaceutical formulations ..	42
II.B.2.5.7. Direct potentiometric determination of CS in spiked plasma.....	43
II.B.2.5.8. Direct potentiometric determination of CS in spiked urine.....	43
II.B.2.5.9. Study of experimental conditions	43
IV.B.2.5.9.1. Identification of slope, response time and operative life of the studied sensors.....	43
II.B.2.5.9.2. Effect of pH and temperature	44
II.B.2.5.9.3. Effect of foreign compounds	44
II.B.3. Results and discussion	45
II.B.3.1. Sensor fabrication	45
II.B.3.2. Sensors calibration and response time.....	47
II.B.3.3. Effect of pH and temperature	48
II.B.3.4. Sensor selectivity.....	49
II.B.3.4. Potentiometric determination of CS pharmaceutical formulations	49
II.B.3.4. Potentiometric determination of CS in plasma and urine.....	50
II.B.3.5. Figures of Merit	50

Section C: Potentiometric determinations of Polymyxin B sulphate using precipitation and ionophore based techniques.

II.C.1. Introduction	61
II.C.2. Experimental.....	61
II.C.2.1. Instrumentation	61

Contents

II.C.2.2. Samples.....	62
II.C.2.2.1. Pure sample.....	62
II.C.2.2.2. Market sample	62
II.C.2.3. Reagents.....	62
II.C.2.4. Standard solutions.....	63
II.C.2.5. Procedures	63
II.C.2.5.1. Preparation of the Poly B ion exchangers	63
II.C.2.5.2. Preparation of the PVC-membranes	64
II.C.2.5.3. Sensors assembly	64
II.C.2.5.4. Direct potentiometric determination of Poly B in its pure sample	65
II.C.2.5.5. Direct potentiometric determination of Poly B in pharmaceutical formulations	65
II.C.2.5.6. Direct potentiometric determination of Poly B in spiked plasma	66
II.C.2.5.6. Direct potentiometric determination of Poly B in spiked urine.....	66
II.C.2.5.7. Study of experimental conditions	67
II.C.2.5.7.1. Identification of slope, response time and operative life of the studied sensors.....	67
II.C.2.5.7.2. Effect of pH and temperature	67
II.C.2.5.7.3. Effect of foreign compounds	68
II.C.3. Results and discussion	69
II.C.3.1. Sensor fabrication	69
IV.B.3.2. Sensors calibration and response time	71
II.C.3.3. Effect of pH and temperature	72
II.C.3.4. Sensor selectivity.....	73
IV.B.3.4. Potentiometric determination of Poly B in pharmaceutical formulations.....	74
II.B.3.4. Potentiometric determination of Poly B in plasma and urine.....	74
II.C.3.5. Figures of Merit	75

**Part III: Spectrophotometric procedures for determination of
certain polyionic drugs**

***Section A: Introduction to different spectrophotometric
procedures for determination of pharmaceutical
substances***

Introduction.....	86
-------------------	----

***Section B: Zero order, H-point standard addition method and
area under the curve determinations of Cromolyn sodium
in presence of Oxymetazoline HCl***

III.B.1. Introduction	92
III.B.2. Experimental	92
III.B.2.1. Instrumentation.....	92
III.B.2.2. Samples	93
III.B.2.2.1. Pure sample	93
III.B.2.2.2. Market sample	93
III.B.2.3.Reagents	93
III.B.2.4. Standard solutions	93
III.B.2.5. Procedure.....	94
III.B.2.5.1. Spectral characteristics of CS and OXY	94
III.B.2.5.2. Method validation	94
III.B.2.5.2.1. Linearity	94
III.B.2.5.2.1.1. Zero order.....	94
III.B.2.5.2.1.2. H-point standard addition method.....	95
III.B.2.5.2.1.3. Area under the curve	95
III.B.2.5.2.2. Accuracy.....	96
III.B.2.5.2.3. Precision	96

Contents
