التوثيق الالكتروني والميكرو فيلم

## قسم

نقسم بالله العظيم أن المادة التي تم توثيقها وتسجيلها  
على هذه الأفلام قد أعدت دون أية تغييرات

## يجب أن

تُحفظ هذه الأفلام بعيدا عن الغبار

في درجة حرارة من 15-25 مئوية ورطوبة نسبية من 20-40%

To be Kept away from Dust in Dry Cool place of  
15-25- c and relative humidity 20-40%

**A Study on physical properties of gypsum affected soils in  
Arab Republic of Egypt**

**By**

**Hoda Abdou Elia**

B.Sc. Agric.Sci.,(Agriculture Production), Assuit University, 1983

A thesis submitted in partial fulfillment  
of  
the requirements for the degree of

**MASTER OF SCIENCE**

**in**

**Agricultural Science  
(Soil Science)**

**Department of Soil Science  
Faculty of Agriculture  
Ain Shams University**

**2002**

٢٠٠٢

## APPROVAL SHEET

### **A Study on physical properties of gypsum affected soils in Arab Republic of Egypt**

By

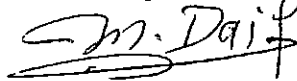

**Hoda Abdou Elia**

B.Sc. Agric.Sci.,( Agriculture Production), Assuit University, 1983

This thesis for M.Sc. degree has been approved by:

**Prof. Dr. Mohamed Abdel Aziz Taha Daif**

Prof. of Soil Sci., Fac. of Agriculture, Cairo University

**Prof. Dr. El-Tony Mohamed Ali El-Tony** *El-Toni, M.*

Prof. of Soil Sci., Fac. of Agriculture, Ain Shams University

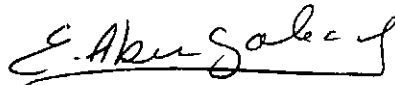

**Prof. Dr. Mahmoud Talha El- Maghraby**

Prof. of Soil Sci., Fac. of Agriculture, Ain Shams  
University.(Supervisor).

**Prof. Dr. El-Hassnaa Abu Gabal Mohamed.**

Prof. of Soil Sci., Fac. of Agriculture, Ain Shams University.

**Date of Examination:    /    /2002**

**A Study on physical properties of gypsum affected soils in  
Arab Republic of Egypt**

**By**

**Hoda Abdou Elia**

B.Sc. Agric.Sci.,( Agriculture Production), Assuit University, 1983

Under the supervision of:

**Prof. Dr. Mahmoud Talha El- Maghraby**

Prof. of Soil Sci., Fac. of Agriculture, Ain Shams University.

**Prof. Dr. El-Hassnaa Abu Gabal Mohamed.**

Prof. of Soil Sci ., Fac. of Agriculture, Ain Shams University.

**Prof. Dr. Mahmoud Yousif Afifi**

Prof. of Soil Sci., Desert Research Center.

## CONTENTS

	Page
1. INTRODUCTION	1
2. REVIEW OF LITERATURE	2
2-1 Definition	2
2-2 Forms and shapes of gypsum in soils	3
2-3 Factors affecting gypsum formation in soils	5
2-4 Gypsum affected soils in Egypt	9
2-5 Properties of the gypsiferous soils	12
2-5-1 Physical properties	13
2-5-1-1 Soil structure	13
2-5-1-2 Soil moisture retention	15
2-5-1-3 Water movement	16
2-5-1-4 Penetration resistance	17
2-5-2 Chemical properties	17
2-5-3 Fertility of the gypsiferous soil	18
2-5-4 Effect of gypsum applications on soil properties	19
2-5-4-1 Physical properties	19
2-5-4-1-1 Infiltration rate	19
2-5-4-1-2 Bulk density and total porosity	20
2-5-4-2 Chemical properties	20
2-5-4-2-1 Soluble salts, SAR, and ESP	20
2-5-4-2-2 pH	21
2-5-4-3 Fertility status	22
3. MATERIALS AND METHODS	24
3-1 Sampling	24
3-2 Methods of soil analysis	26
3-2-1 Physical properties	26
3-2-1-1 Particle size distribution	26
3-2-1-2 soil moisture characteristic curves	26
3-2-1-3 Rate of drying	27

## II

3-2-1-4 Bulk density and total porosity	27
3-2-2 Chemical properties	27
3-2-2-1 Gypsum content	27
3-2-2-2 soluble salts	27
3-2-3 X-ray diffraction	27
4. RESULTS AND DISCUSSION	28
4-1 characteristic of soils under study	28
4-1-1 Morphological description of soil properties	28
4-2 Physical properties	31
4-3 Chemical properties	34
4-4 Evaluation of some methods for analyzing gypsum affected soils	36
4-4-1 Particles size distribution	36
4-4-1-1 Gypsum removals by hot water	36
4-4-1-2 Gypsum removals by HCl	39
4-4-1-3 Barium chloride techniques	41
4-5 Effect of gypsum content on soil hydro properties	47
4-5-1 Characteristics of gypsum	47
4-5-2 Soil moisture characteristics	54
4-5-3 Soil bulk density and porosity	62
4-5-4 Pores size distribution	66
4-6 Effect of gypsum content on chemical properties	70
4-7 Effect of heating on gypsum forms	72
5. SUMMARY AND CONCLUSION	85
6. REFERENCES	88
7. ARABIC SUMMARY

## LIST OF TABLES

Tables	Pages
1. Chemical and Physical properties of studied soil samples.	25
2. Physical properties of the studied gypsiferous soil from El-Tina plain, Gelbana and Abu Khalifa profiles.	32
3. Chemical properties of the studied gypsiferous soil from El-Tina plain, Gelbana and Abu Khalifa profiles.	35
4. Particle size distribution for different soils and efficiency of gypsum removing by hot water (EGR)	37
5. Particle size distribution for different soils and efficiency of gypsum removal by HCl (EGR <sub>HCl</sub> )	40
6. Particle size distribution for different soil by using (BaCl <sub>2</sub> )	42
7. Particle size distribution for soil profiles taken from El-Tina plain, Gelbana and Abu Khalifa by using (hot water) to remove gypsum	44
8. Particle size distribution for soil profiles taken from El-Tina plain, Gelbana and Abu Khalifa by using (H Cl) to remove gypsum	45
9. Particle size distribution for soil profiles taken from El-Tina plain, Gelbana and Abu Khalifa by using (Ba Cl <sub>2</sub> )	46
10. The time needed for equilibrium between temperatures of infrared and soil moisture content for the soil treated with gypsum	48
11. The time needed for equilibrium between temperatures of infrared and soil moisture content for the soil taken from El-Tina, Gelbana and Abu Khalifa.	49
12. Soil moisture characteristics and available soil moisture, SMC, for different samples treated by gypsum	56
13. Regression analysis between volumetric soil moisture content and application gypsum	57
14. Soil moisture characteristics and available soil moisture, SMC, of soil profiles taken from El-Tina plain, Gelbana, and Abu Khalifa.	58

#### IV

15. Hygroscopic water, bulk density, real density and total soil porosity  
of different soils treated by gypsum 63
16. Hygroscopic water, bulk density, real density and total soil porosity  
of soil profiles taken from El-Tina plain, Gelbana and Abu Khalifa 65
17. Pore size distribution of different soils treated by gypsum. 67
18. Pore size distribution of soil profiles taken from El-Tina plain,  
Gelbana and Abu Khalifa. 69
19. Soluble salts in soil paste extract in the samples treated by gypsum 71
20. Soluble salts in soil paste extract in the sample profiles. 73

## LIST OF FIGURES

Figures	Pages
1.Effect of infrared drying process on moisture of gypsum affected soil content in Salhia sandy soil.	51
2.Effect of infrared drying process on moisture of gypsum affected soil content in soil in Maryout calcareous soil.	52
3.Effect of infrared drying process on moisture of gypsum affected soil content in Qalubiya clay soil	53
4.Effect of gypsum content on the moisture characteristic curve of Salhia sandy soil.	59
5. Effect of gypsum content on the moisture characteristic curve of Maryout calcareous soil.	60
6. Effect of gypsum content on the moisture characteristic curve of Qalubiya clay soil.	61
7. Identification of air dry gypsum for El-Tina plain soil by X-ray diffraction .	75
8.Identification of air dry gypsum for Gelbana soil by X-ray diffraction.	76
9.Identification of air dry gypsum for Abu Khalifa soil by X-ray diffraction.	77
10.Identification of air dry gypsum for Abu Khalifa soil by X-ray diffraction.	78
11.Identification of air dry gypsum for Abu Khalifa soil by X-ray diffraction.	79
12.Identification of gypsum heated at 50°C for Abu Khalifa soil by X-ray diffraction.	80
13.Identification of gypsum heated at 80°C for Abu Khalifa soil by X-ray diffraction.	81
14.Identification of gypsum heated at 110°C for Abu Khalifa soil by X-ray diffraction.	82
15. Identification of gypsum heated at 140°C for Abu Khalifa soil
