**ROLE OF PLASMA EOTAXIN  
IN WHEEZING INFANTS**

**Thesis**

**Submitted in Partial Fulfillment of  
M.Sc. in Pediatrics**

**By**

***ABEER FADEL SOLIMAN***

**M.B , B.Ch.**

**Cairo University**

**Principal Supervisor**

**Prof. Dr. FATMA MOHAMED MOKHTAR EL-HENEIDY**

**Professor of Pediatrics, Cairo University**

**Supervisors**

**Prof. Dr. NADIA AHMED AMIN MOSTAFA**

**Professor of Pediatrics, Cairo University**

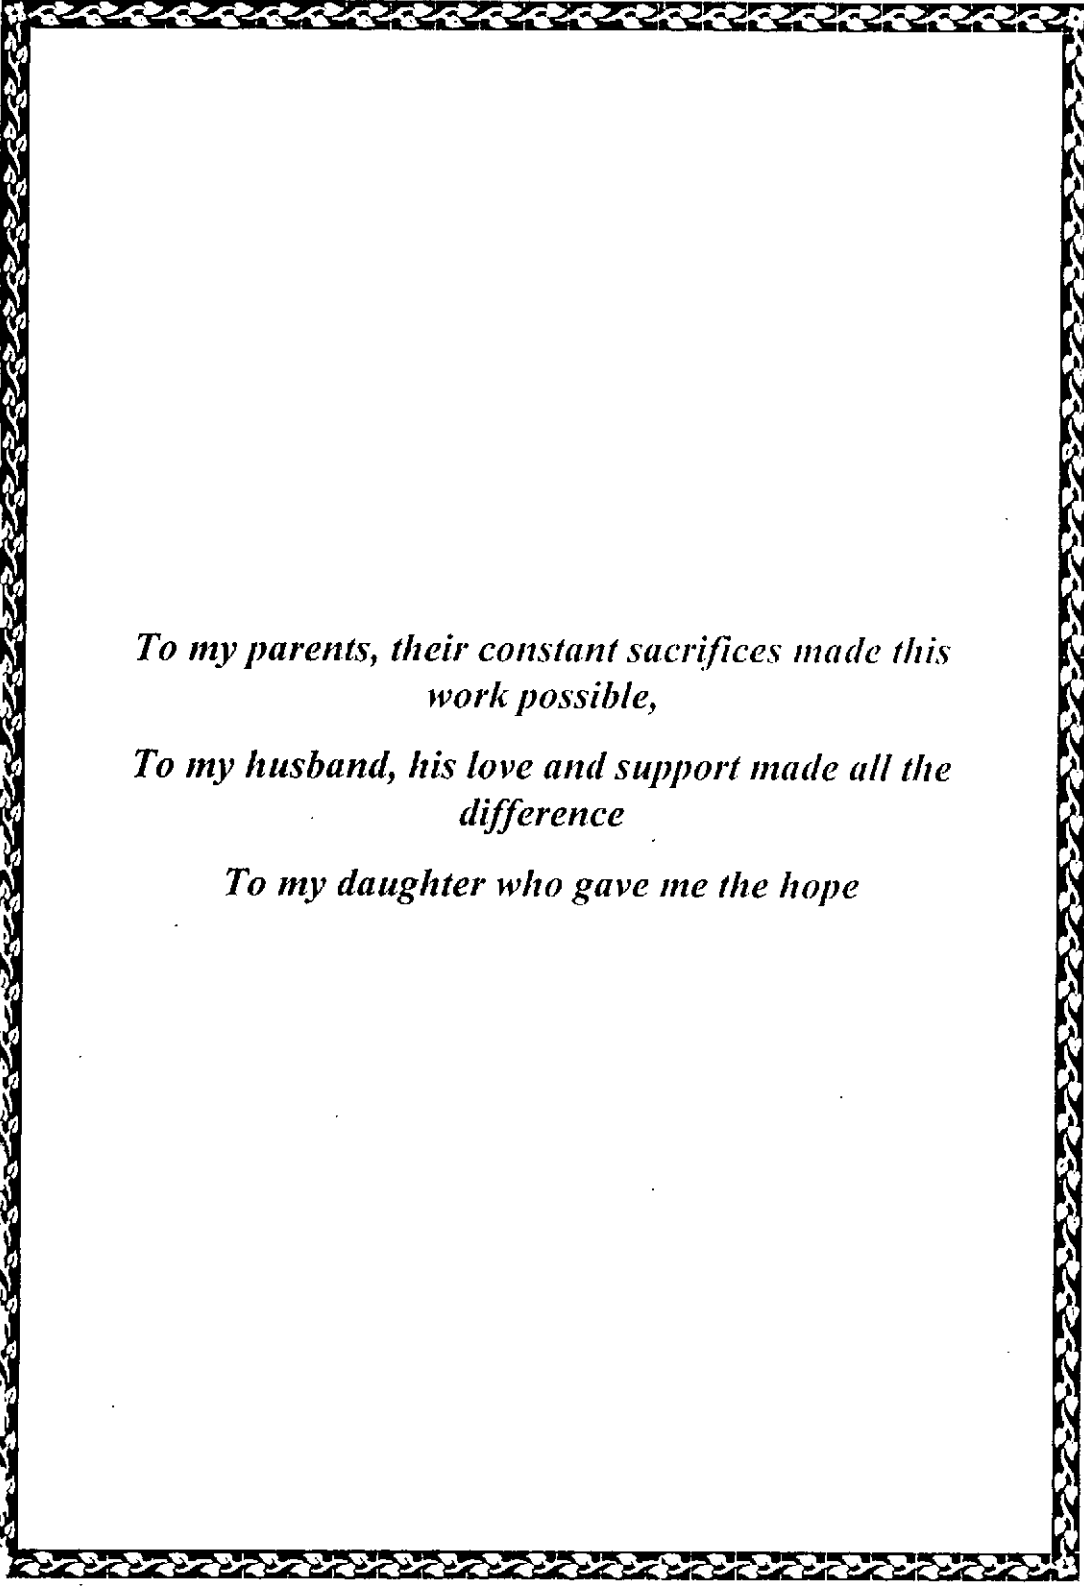

**Prof. Dr. MANAL WAGDY EL-MASERY**

**Professor of Clinical Pathothlogy, Cairo University**

**Faculty of Medicine**

**Cairo University**

**2003**

*To my parents, their constant sacrifices made this  
work possible,*

*To my husband, his love and support made all the  
difference*

*To my daughter who gave me the hope*

## ACKNOWLEDGMENT

I would like to express my endless gratitude and appreciation to *Prof. Dr. FATMA MOHAMED MOKHITAR EL-HENEIDY, Professor of Pediatrics, Cairo University*, for giving me the honour to work this meticulous supervision and for providing me with a lot of encouragement and support thorough out this whole work.

I find no wards by which I can express my extreme thankfulness and profound gratitude to *PROF. DR. NADIA AHMED AMIN MOSTAFA, Professor of Pediatrics, Cairo University*, for her generous help, guidance and great fruitful advice.

I am also deeply grateful to *PROF. DR. MANAL WAGDY EL-MASERY, Professor of Clinical Pathothlogy, Cairo University*, for her great help and continuous contributions in the practical part of this work.

Lastly, my deep thanks and best wishes to my dear patients and their parents for their kind cooperation in accomplishing my thesis, wishing them a good health.

*Abeer fadel*

# TABLE OF CONTENTS

	Subject	Page
•	INTRODUCTION and AIM OF THE WORK	1
•	REVIEW OF LITERATURE	
	- Part I : Bronchial Asthma	3
	- Part II : Chemokines.	64
	- Part III : Eotaxin.	66
•	PATIENTS AND METHODS	74
•	RESULTS	90
•	DISCUSSION	118
•	SUMMARY	134
•	REFERENCES	137
•	APPENDIX	172
•	ARABIC SUMMARY	

## LIST OF TABLES

TABLE	Page
Table (1) : Mediators implicated in Eosinophils chemotaxis.	47
Table (2) : Differences between mast cell populations.	48
Table (3) : Human mast cell characteristics.	49
Table (4) : Cytokine profiles of classic T cell subsets.	54
Table (5) : Shows the main properties of human Th1 and Th2 cells.	55
<b>(I) Demographic data of asthmatics, transient wheezers and controls :</b>	
Table (6) : Age distribution of asthmatics, transient wheezers and controls.	90
Table (7) : Sex distribution of asthmatics, transient wheezers and controls :	91
Table (8) : Residential distribution of asthmatics, transient wheezers and controls :	91
Table (9) : Mean age of onset of illness in asthmatics and transient wheezers :	92
Table (10) : Mean duration of illness in asthmatics and transient wheezers :	92
Table (11) : Distribution of asthmatics and transient wheezers in relation to atopic manifestations and family history of asthma :	93
Table (12) : Distribution of asthmatics and transient wheezers in relation to seasonal variation :	93
<b>(II) Laboratory data of asthmatics, transient wheezers and controls.</b>	
Table (13) : Mean haemoglobin level in asthmatics, transient wheezers and controls :	94
Table (14) : Mean white blood cells count (WBC) in asthmatics, transient wheezers and controls :	95

Table (15) : Mean absolute eosinophil count (AEC) in asthmatics and controls :	96
Table (16) : Mean Absolute Eosinophil Count (AEC) in transient wheezers and controls :	97
Table (17) : Mean Absolute Eosinophil Count (AEC) in asthmatics and transient wheezers :	98
Table (18) : Mean Absolute Eosinophil Count (AEC) in asthmatics, transient wheezers and controls :	99
Table (19) : Mean total serum IgE in asthmatics and controls :	100
Table (20) : Mean total serum IgE in transient wheezers and controls.	101
Table (21) : Mean total serum IgE in asthmatics and transient wheezers:	102
Table (22) : Mean total serum IgE in asthmatics, transient wheezers and controls :	103
Table (23) : Mean plasma cotaxin level (pg/ml) in asthmatics and controls :	104
Table (24) : Mean plasma eotaxin in transient wheezers and controls :	105
Table (25) : Mean plasma eotaxin in asthmatics and transient wheezers :	106
Table (26) : Mean plasma eotaxin level in asthmatics, transient wheezers and controls :	107
Table (27) : Correlation between plasma eotaxin and total serum IgE in asthmatics and transient wheezers :	108
Table (28) : Correlation between plasma eotaxin and AEC among asthmatics and transient wheezers :	109
Table (29) : Correlation between total serum IgE and AEC in asthmatics and transient wheezers :	110
Table (30) : Relationship between mean AEC and age	111

distribution in asthmatics and transient wheezers :	
Table (31) : Relationship between mean total serum IgE and age distribution in asthmatics and transient wheezers :	112
Table (32) : Relationship between plasma eotaxin and age distribution in asthmatics and transient wheezers :	113
Table (33) : Relationship between the grades of asthma and mean AEC .	114
Table (34) : Relationship between the grade of asthma and mean total serum IgE .	115
Table (35) : Relationship between the grade of asthma severity and mean plasma eotaxin	116
Table (36) : Cut-off level of plasma eotaxin level (pg/ml) for detection of asthmatics :	117

### LIST OF FIGURES

Figure	Page
Figure (1) Classification of asthma severity by clinical features before treatment.	17
Figure (2) : Viral respiratory infections and wheezing ; mechanisms of association.	28
Figure (3) : Model of ways which allergen exposure contributes to asthma.	34
Figure (4) : The various neural, humoral and cellular mechanisms that interact to produce airway narrowing.	41
Figure (5) : Mast cell mediators.	50
Figure (6) : CD4 <sup>+</sup> T cells recognize foreign antigen presented by major histocompatibility complex class II molecules (MHC II).	58
Figure (7) : Mean hemoglobin level in asthmatics, transient wheezers and controls	94
Figure (8) : Mean white blood cell count (WBC) (1000/mm <sup>3</sup> ) in asthmatics, transient wheezers and controls	95
Figure (9) : Mean Absolute Eosinophilic Count (AEC) in asthmatics and controls.	96
Figure (10) : Mean Absolute Eosinophil Count (AEC) in transient wheezers and controls	97
Figure (11) : Mean Absolute Eosinophilic Count (AEC) in asthmatics and transient wheezers	98
Figure (12) : Mean AEC level in asthmatics, transient wheezers and controls	99
Figure (13) : Mean total serum IgE in asthmatics and controls	100
Figure (14) : Mean total serum IgE in transient wheezers and controls	101
Figure (15) : Mean total serum IgE in asthmatics and transient wheezers	102
Figure (16): Mean total serum IgE in asthmatics, transient wheezers and controls	103
