## ACKNOWLEDGEMENTS

My deepest gratitude would initially be to **Allah**, the most compassionate and the most merciful, whom without the strength and patience He provided me with, never would I have been able to accomplish this piece of work.

I wish to thank **Prof. Dr. Sohier William Elgendy**, Prof. of Medical Surgical Nursing Department, Faculty of Nursing, Alexandria University, for her sincere guidance, great effort, providence of possible facilities and continuous patience and enthusiasm which encouraged me to go on and on.

I wish to express my sincere thanks to **Dr. Osama Saad Abdelaziz**, Assistant Professor of Neurosurgery, Faculty of Medicine Alexandria University, for his constant encouragement and valuable assistance to come up with this study in the most professional and academic view. Thank you for the time, effort, and patience you kindly provided to me which upgraded me professionally.

I can never forget to profoundly thank all people who work in the Neurosurgery department in main Alexandria University Hospital for the facilities and support they provided me with during the data collection period which had a great hand in the success of the study.

I will always be indebted to all my colleagues and friends in Medical Surgical Nursing Department, and all other Departments, and to anybody who has sacrificed time or effort to help me accomplish this work.

Nevertheless, my deepest thanks and gratitude I send to my family and friends in **Libya** my ***father, mother, sisters and brothers***, who were miles away only with their bodies but their hearts and souls stayed by my side step by step, and missing them so much was a great motive to keenly accomplish this work.

# To.....

**My faithful husband:**

Words cannot express my deepest thanks to you for your noble aim namely the scientific achievement.

**And To:**

My lovely kids: Abd-Alhady, Abd-Alwahab, and Elaf.

(The Gift from Allah)

Only a look from your eyes and a smile from your lips gave me the power and energy to complete this work.

Thus, you all deserve all the appreciations and respect distributed in the whole world
