

Women's College for Arts, Science & Education
Home Economics Department

Submitted Thesis for Requirements of Ph D
(Home Economics-Textile and Clothing)

Entitled

**Seamless Shaped Garments and Articles with
Predetermined Dimensions Using Tubular Fabrics**

By

Heba Zakaria Mohamed Abou Hashish

Supervised By

Prof. Dr. Eng. Abdel Fattah M. Seyam

Department of Textile and Apparel, Technology and Management College of
Textiles, NC State University, Raleigh, North Carolina, USA

Dr. Eng. Sanaa S. Saleh

Assistant Professor of Textiles, Home Economics Department,
Women's College for Arts, Science & Education, Ain Shams University

Dr. Eng. Mamdouh Y. Sharkas

Assistant Professor of Weaving Technology, Home Economics Department,
Women's College for Arts, Science & Education, Ain Shams University

2013

وَلَا تَهْزُهُمَا وَقُلْ لَهُمَا قَوْلًا كَرِيمًا ﴿٢٣﴾ وَأَخْفِضْ لَهُمَا
جَنَاحَ الذِّلِّ مِنَ الرَّحْمَةِ وَقُلْ رَبِّ ارْحَمْهُمَا كَمَا رَبَّيَانِي
صَغِيرًا ﴿٢٤﴾ رَبِّكُمْ أَعْلَمُ بِهِمَا فِي نَفُوسِكُمْ أَنْ تَكُونُوا صَالِحِينَ
وَلَا تَكُنْ مِنَ الْكَافِرِينَ ﴿٢٥﴾

رَبِّكَ زِدْنِي عِلْمًا
وَقَارِئًا

Biography

Heba Z. Abou Hashish entered Women's Faculty – Ain Shams University in 1998 and accomplishes the Bachelor of Science of Textiles and Clothing in 2002. Upon graduation, she was appointed as a demonstrator in the Home Economics Department in 2003. She continued her master education and completed a M.Sc. in Textiles and Clothing in 2008. In the same year, she became an Assistant Lecturer in the Home Economics Department then she pursued her Ph.D. in Textile Technology. Finally, she completed her Ph.D. Program requirements in Autumn 2013.

ACKNOWLEDGMENTS

I would like to give special thanks to ***Prof. Dr. Eng. Abdel Fattah M. Seyam*** of College of Textile, NC State University, USA, for giving me the opportunity to be one of his students and for his guidance during this study.

I would like to express my gratitude to my advisors ***Dr. Eng. Sanaa S. Saleh and Dr. Eng. Mamdouh Y. Sharkas*** for their invaluable guidance, support, encouragement and time they spent with me throughout this study.

I extend my appreciation to ***Eng. M Moheb Salah Elden***, the Chairman of Misr Helwan Spinning and Weaving Company for allowing me to use the weaving and dyeing and finishing facilities that were used to accomplish this work.

I extend my sincere thanks and gratitude to ***Eng. Mohamed Abdel Reheim*** and ***Eng. Amal Basiouny*** for their great assistance and help they gave to me to achieve my practical work which made it a great learning experience.

Special thanks to ***My Parents*** and ***My Husband, Hani***. Without their love, support and encouragements this work would not have been possible. Last, my little ***Kady***, her arrival into this world was my biggest incentive to succeed.

PUBLICATIONS FROM THE THESIS

“Development of Seamless Woven Garments with Desired Shapes and Sizes”

Journal of Scientific Research in Science

Faculty of Women for, Arts, Science and Education

Quarterly Refereed Journal

J. Sci. Res, Vol (30), 2013

Accepted in 3 June 2013

“Shaped Seamless Woven Garments”

Research Journal of Textile and Apparel (RJTA)

By Hong Kong Institution of Textile and Apparel (HKITA)

Accepted in 11 June 2013

CONTENTS

<u>Title</u>	<u>Page</u>
Contents	I
List of Figures	V
List of Tables	VIII
Summary	XI
Introduction	1
<u>Chapter 1: Literature Review</u>	3
1.1. SEAMLESS FEATURES AND BENEFITS	5
1.1.1. Design possibilities	5
1.1.2. Moderate price	6
1.1.3. Fitting	6
1.1.4. Comfort	7
1.1.5. Quality and durability	7
1.2. DOUBLE CLOTH TUBULAR WOVEN FABRICS	7
1.3. SHUTTLE WEAVING	8
1.4. SHUTTLE WEAVING OF TUBULAR WOVEN FABRICS	10
1.5. APPLICATION FIELDS OF SEAMLESS WOVEN TECHNOLOGY	11
1.5.1. Seamless technology for garment applications	11
1.5.2. Seamless technology for medical applications	12
1.5.3. Seamless technology for protective applications	12
1.6. PRODUCTION TECHNIQUES OF SEAMLESS WOVEN GARMENTS AND ARTICLES	13
1.6.1. Trials to produce seamless woven articles	14
1.6.2. Trials to produce seamless woven garments	19

1.7.	WOVEN FABRICS SHRINKAGE	24
1.8.	THE STRUCTURAL PARAMETERS AFFECTING SEAMLESS WOVEN SHAPES	27
1.8.1.	Weave structure	28
1.8.2.	Pick density	29
1.8.3.	Yarn tension	30
1.8.4.	Yarn count	32
1.8.5.	Yarn material	33

Chapter 2: Aim of the Work 35

Chapter 3: Experimental and Discussion 37

3.1.	EXPERIMENTAL PROCEDURES	37
3.1.1.	Materials and design of experiment	37
3.1.2.	Fabric formation	39
3.1.3.	Fabric finishing	41
3.1.4.	Fabrics Width Shrinkage Percentages	41

Chapter 4: Results and Discussion 45

4.1.	THE EFFECT OF FABRIC CONSTRUCTION PARAMETERS ON THE FABRIC SHRINKAGE	45
4.1.1.	The effect of changing weave structures on the fabric width shrinkage	54
4.1.2.	The effect of changing pick densities on the fabric width and length shrinkages	54
4.1.2.1.	<i>The effect of changing the pick densities on the fabric widthwise shrinkage</i>	56
4.1.2.2.	<i>The effect of changing the pick densities on the fabric lengthwise shrinkage</i>	59
4.1.3.	The effect of changing weft tension on the fabric width shrinkage	63

4.1.4.	The effect of changing weft yarn count on the fabric width and length shrinkages	66
4.1.4.1.	<i>The effect of changing weft yarn count on the fabric widthwise shrinkage</i>	66
4.1.4.2.	<i>The effect of changing weft yarn count on the fabric lengthwise shrinkage</i>	69
4.2.	FABRICS RANKING FOR GARMENTS DESIGN	71
4.3.	DESIGN SEAMLESS WOVEN GARMENTS WITH DESIRED SHAPES AND SIZES	74
4.4.	DESIGN SEAMLESS WOVEN GARMENTS WITH PRECISE FIT TO BODYLINE FOR WOMEN’S WEAR	81
	CONCLUSION	91
	<u>Chapter 5: Application</u>	95
5.1.	STITCHES, SEAMS AND SEWING MACHINES	97
5.1.1.	Stitch types	97
5.1.2.	Seam types	99
5.1.3.	Sewing machines types	100
5.2.	FABRIC DYING	101
5.3.	SEAMLESS WOVEN DESIGNS FOR WOMEN’S OUTER WEAR	102
5.3.1.	Design (1)	103
5.3.2.	Design (2)	107
5.3.3.	Design (3)	111
5.3.4.	Design (4)	115
5.3.5.	Design (5)	118
5.3.6.	Design (6)	121
5.3.7.	Design (7)	124
5.3.8.	Design (8)	128
5.3.9.	Design (9)	131
5.3.10	Design (10)	134
5.3.11.	Design (11)	136

5.3.12	Design (12)	138
5.3.13.	Design (13)	139
5.3.14.	Design (14)	141
5.3.15	Design (15)	143
5.3.16	Design (16)	145
CONCLUSION		146
<u>Chapter (6): Overall Conclusion And Suggestion For Future Studies</u>		147

Arabic Summary		

List of Figures

Figure No.	Figure Name	Page No.
(1-1)	Double cloths without stitching threads	8
(1-2)	Classification of weaving machines	9
(1-3)	Shuttle with a quill	9
(1-4)	Tapered Cylinder, Mandrel, Oven and Finished Sleeve	14
(1-5)	A -Straight Tube, B -Cut Tube, and C -Sutured Tube to Create Taper	15
(1-6)	Process of Disengaging Warp Yarns	16
(1-7)	Examples of Tapered Shapes	16
(1-8)	Bifurcated and Trifurcated Graft	16
(1-9)	Disengaged Warp Ends	17
(1-10)	Dome Shapes (“Woven 3-D Shapes...”)	18
(1-11)	Gathers Created by Utilizing Non-Elastic and Elastic Yarns	19
(1-12)	Gathers Created by Utilizing Non-Elastic and Elastic Yarns	20
(1-13)	Sketch of shaped dress, unfinished dress, and dress after six hand washings	21
(1-14)	Samples of woven shaped textiles for seamless fashion	23
(1-15)	Samples of woven shaped textiles for seamless fashion	24
(1-16)	Fabric shrinkage mechanism due to wetting.	27
(3-1)	A schematic diagram of the tubular double cloth fabric formation	39
(3-2)	The tubular double cloth fabric	39
(3-3)	Double cloth weave designs	40
(4-1)	Widthwise Shrinkage Percentage for Different Weaves Using non elastic wefts	49

(4-2)	Widthwise Shrinkage Percentage for Different Weaves Using Elastic Wefts of 15/1 Cotton-Spandex (94.7 – 5.3 %)	52
(4-3)	Widthwise Shrinkage Percentage for Different Weaves Using Elastic Wefts of 20/1 Cotton-Spandex (93.3 – 6.7 %)	53
(4-4)	Widthwise Shrinkage Percentage for Different Weaves using 26/1 Cotton-Spandex (96.9 – 3.1 %), 20 picks/cm and high tension.	53
(4-5)	Widthwise Shrinkage Percentage for Different Weaves at Different Pick Densities	58
(4-6)	Widthwise Shrinkage Percentage for Twill 1/3 at Different Picks Densities Using 26/1 Cotton-Spandex (96.9 – 3.1 %) and Medium Tension	60
(4-7)	Widthwise Shrinkage Percentage for Different Weaves at Different Picks Densities Using 15/1 Cotton-Spandex (94.7 – 5.3 %) and Medium Tension	60
(4-8)	Lengthwise Shrinkage Percentage for Different Weave Structures at Different Pick Densities	63
(4-9)	Lengthwise Shrinkage Percentages for Twill 1/3 Weave Structure at Different Pick Densities Using 26/1 Cotton-Spandex (96.9 – 3.1 %) and Medium Tension	65
(4-10)	Lengthwise Shrinkage Percentage for Different Weave Structures at Different Pick Densities Using 15/1 Cotton-Spandex (94.7 – 5.3 %) and High Tension	65
(4-11)	Widthwise shrinkage Percentage different Weave Structures at different weft tensions using 16/1 Cotton-Polyester (50 – 50 %) and 18 picks/cm	67
(4-12)	Widthwise Shrinkage Percentage for different weave structures at different weft tensions using 15/1 Cotton-Spandex (94.7 – 5.3 %) and 20 Picks/cm	68
(4-13)	Widthwise Shrinkage Percentage for different weave structures using Cotton 100% with different yarn counts	72
(4-14)	Lengthwise Shrinkage Percentage for different weave structures using Cotton 100% with different yarn counts	75
(4-15)	Fabrics ranking versus finished width (cm)	77

(5-1)	The standard body measurements chart	102
(5-2)	Fabric design of garment (1)	110
(5-3)	Garment (1)	111
(5-4)	Fabric design of garment (2)	114
(5-5)	Garment (2)	115
(5-6)	Fabric design of garment (3)	118
(5-7)	Garment (3)	119
(5-8)	Fabric design of garment (4)	122
(5-9)	Garment (4)	123
(5-10)	Fabric design of garment (5)	125
(5-11)	Garment (5)	126
(5-12)	Fabric design of garment (6)	128
(5-13)	Garment (6)	129
(5-14)	Fabric design of garment (7)	132
(5-15)	Garment (7)	133
(5-16)	Fabric design of garment (8)	136
(5-17)	Garment (8)	136
(5-18)	Fabric design of garment (9)	138
(5-19)	Garment (9)	139
(5-20)	Garment (10)	141
(5-21)	Garment (11)	143
(5-22)	Garment (12)	144
(5-23)	Garment (13)	145
(5-24)	Garment (14)	148
(5-25)	Garment (15)	150
