ACKNOWLEDGEMENT

Firstly, I wish to express my sincere gratitude to **"ALLAH"** Who gave me the ability and patience to finish this work.

I would like to express my cordial gratitude and my deepest thanks to **Prof. Dr. M. A. El-Fiki**, Prof. of Plant Taxonomy, Faculty of Agriculture, Al-Azhar University, for his useful suggestion, supplying facilities and continues help for completing this work.

I would like to express my deepest appreciation and sincere gratitude to **Dr. S. I. Omara**, Assistant Prof. of General Botany, Faculty of Agriculture, Al-Azhar University, for his guidance, good supervision and encouragement.

I wish to record my cardinal thanks and deepest gratitude to **Dr. A. E. Abdel Ghany**, Head of fish Nutrition, Central Lab. For Aquaculture, Abbassa, Abo-Hammad, Sharkia, for their constant, advice, supplying facilities and fruitful discussion, which enabled this work to be done.

Special tribute is due to **Dr. M. K. Hamza**, Assistant Prof. of Plant Taxonomy, Faculty of Agriculture, Al-Azhar University, for his help and guidance.

My grateful thanks are also due to the members of Agric. Botany Dep., Fac. of Agric., Al-Azhar University, for their extensive help in extending facilities through this work.

My sincere thanks also are due to **Dr. I. M. A. Shaker** and **Dr. S.M. Ezaat** for their help in preparing thesis.

My grateful thanks are also due to the members of ICLARM specially **Dr. G.O. El Naggat** for his help and advice, and also due to the members of CLAR specially **Dr. A. Zakaar**.

CONTENTS

	<i>Page</i>
1. INTRODUCTION	1
2. REVIEW OF LITERATURE	5
Effect of replacement by plants on fish performance	5
Effect of replacement by aquatic plants on chemical composition of fish	14
Water hyacinth <i>Eichhornia crassipes</i>	16
Water hyacinth as a floating weeds	16
Water hyacinth distribution in Egypt	17
Morphology:	18
Water primrose (<i>Jussiaea repens</i>)	19
Water primrose as emergent weeds	19
Morphology	20
Structural changes for water plants leaves (hydrophytes)	21
The epidermis	23
The root cortex	24
Regions of activity in the apical meristem	25
The root apex	25
Adaptation to aquatic habitat	25
3- MATERIALS AND METHODS	29
The main objectives of the present work are	29
Diets preparation	30
Preparation of aquatic plant meal	30
Aquaria Experimental (1)	33
Second experiment: (earthen ponds experiment)	35
Procedures and methods of analysis	36
Fish and diets analysis	36
Average weight gain	37
Specific growth rate (SGR)	37

Condition factor (K)	38
Feed conversion ratio (FCR)	38
Protein efficiency ratio (PER)	38
Protein retention (PR)	39
Methods of water analysis	39
Chemical and biological water analysis	39
Chemical analysis	39
Chlorophyll "a"	40
Plant Biomass	40
Growth performance of plants	41
Plants fixing	41
Statistical analysis of data	42
4-RESULTS AND DISCUSSIONS:	43
Aquaria experiments:	43
Growth parameters:	43
Live body weight:	43
Body weight gain:	50
Specific growth rate:	56
Feed parameters:	61
Feed intake:	61
Feed conversion ratio:	62
Protein efficiency ratio:	63
Chemical composition of whole fish:	68
Results of pond Experiment:	71
Growth parameters of Nile tilapia:	71
Live body weight:	71
Body weight gain:	73
Specific growth rate:	73
Chemical composition of whole fish:	76
Fish production:	78
Effect of tilapia feeding levels on water quality under cultivation of water hyacinth and water
