ROLE OF MAMMOGRAPHY, ULTRASONOGRAPHY AND MRI IN BREAST IMAGING IN FEMALES

Essay

Submitted for partial fulfillment of master
degree in radiodiagnosis

By

Abeer El-Sayed Soliman Soliman
(M.B., B.Ch.)

Supervised by

Prof. Dr. Fatma Seddik Mahmoud

Professor Of Radiodiagnosis
Faculty of Medicine, Ain Shams University

Dr. Randa Hussein Abdallah

Lecturer Of Radiodagnosis
Faculty of Medicine, Ain Shams University

Faculty of Medicine
Ain Shams University
2000

8 4444

ACKNOWLEDGMENT

I would like to express my profound and sincere gratitude to Professor **Dr. Fatma Seddik Mahmoud**, Professor Of Radiodiagnosis, Faculty of Medicine, Ain Shams University, for her continuous encouragement, guidance and enthusiastic help throughout this work that made it possible.

I may also greatly indebted to **Dr. Randa Hussein Abdallah**, Lecturer Of Radiodagnosis, Faculty of Medicine, Ain Shams University, for her patience, valuable instructions and co-operation in this work.

LIST OF ABBREVIATIONS

2D	Two dimensional
3D	Three dimensional
CC	Craniocaudal
CM	Contrast media
cm	Centimeter
FLASH	Fast low angle shot
Gd-DTPA	Gadolinium-diethylene triamine penta-acetic acid
GE	Gradient echo
GRASS	Gradient recalled acquisition at steady state
HRT	Hormone replacement therapy
ml	Milliliter
ML	Mediolateral
mm	Millimeter
mmol/kg	Millimole per kilogram

MRI	Magnetic resonance imaging
msec	Millisecond
ROI	Region of interest
S/N	Signal to noise ratio
SI	Signal intensity
T	Tesla
T1	Longitudinal relaxation time
T2	Transverse relaxation time
TE	Echo time
TR	Repetition time

LIST OF FIGURES

No.	Title	P.
Fig. (1)	Development of the mammary gland	4
Fig. (2)	Milk line	4
Fig. (3)	Diagram of the breast ducts, lobules and terminal acini	6
Fig. (4)	Relationship between the breast and the chest wall muscles	7
Fig. (5)	Section of nipple	8
Fig. (6)	Arterial supply of the breast	10
Fig. (7)	Lymph nodes of the breast	13
Fig. (8)	CC views of a bilateral mammogram in a 51-year-old woman	16
Fig. (9)	Oblique mammograms in 2 different patients	17
Fig. (10)	Fatty breast	22
Fig. (11)	Normal breast in a 32-year-old female	24
Fig. (12)	Subcutaneous fat crossed by Cooper's ligament	25
Fig. (13)	Normal MRI anatomy of the breast	33
Fig. (14)	Subareolar abscess in duct ectasia	47

No.	Title	P.
Fig. (15)	Solitary intraductal papilloma	54
Fig. (16)	Xeromammogram	74
Fig. (17)	X-ray spectra obtained from a molybdenum (Mo) target	77
Fig. (18)	Positioning for CC view	80
Fig. (19)	Positioning for lateral view	81
Fig. (20)	Positioning for oblique view	82
Fig. (21)	Positioning for the axillary view	84
Fig. (22)	Mammography of fat necrosis	112
Fig. (23)	Fat necrosis with fluid level	112
Fig. (24)	Fat necrosis and change in patient's position	113
Fig. (25)	Fat necrosis appears as hypoechoic mass	114
Fig. (26)	Acute mastitis of lactating breast	116
Fig. (27)	Diffuse inflammation of the breast	117
Fig. (28)	Breast abscess	118
Fig. (29)	Fibrocystic disease	120
Fig. (30)	MRI of simple dysplasia	122

No.	Title	P.
Fig. (31)	MRI of proliferative dysplasia	123
Fig. (32)	Plasma cell mastitis	125
Fig. (33)	Duct ectasia	126
Fig. (34)	Mammography of fibroadenoma	127
Fig. (35)	U/S of typical fibroadenoma	128
Fig. (36)	Fibroadenoma with large echogenic foci	129
Fig. (37)	Fibroadenoma with marked enhancement	131
Fig. (38)	Different types of fibroadenoma	132
Fig. (39)	Mammogram of cystosarcoma phyllodes	134
Fig. (40)	Sonography of phyllodes tumor	135
Fig. (41)	Intra-ductal papilloma	137
Fig. (42)	Mondor's disease	139
Fig. (43)	Bilateral breast cancer	142
Fig. (44)	Egg-shell calcification	146
Fig. (45)	Skin calcifications	149
Fig. (46)	Milk of calcium	150

No.	Title	P.
Fig. (47)	Colloid carcinoma	151
Fig. (48)	DCIS	152
Fig. (49)	Malignant nodule	156
Fig. (50)	Malignant nodule	157
Fig. (51)	Malignant nodule	158
Fig. (52)	Attenuation produced by carcinoma	159
Fig. (53)	Posterior sound enhancement in mucinous carcinoma	159
Fig. (54)	Malignant nodule with internal calcifications	160
Fig. (55)	U/S of lymph nodes	162
Fig. (56)	Dilated lymphatics in inflammatory carcinoma	164
Fig. (57)	Intra-cystic papillary carcinoma	165
Fig. (58)	Metastases to the breast	166
Fig. (59)	Types of time-signal intensity curves	173
Fig. (60)	MRI of suspected malignancy	175
Fig. (61)	MRI of post-lumpectomy and radiation changes	176
Fig. (62)	MRI of scar tissue	178

LIST OF TABLES

No.	Title	P.
Table (1)	Breast anomalies	35
Table (2)	Utilization of mammography and sonography to evaluate a palpable breast mass	88
Table (3)	Use of mammography and sonography to evaluate breast symptoms and benign breast signs	94
Table (4)	Ultrasonographic pitfalls in breast mass evaluation	95
Table (5)	Ultrasonographic characteristic signs of breast masses	153
Table (6)	Individual sonographic characteristics	155
Table (7)	Types of cystic breast masses	165
Table (8)	Ultrasonographic characteristics of masses: Differential Diagnosis	168

TABLE OF CONTENTS

Introduction and aim of work	1
Review of literature	
I. Related anatomy and histology	3
- Embryology	3
- Normal anatomy	5
- Normal mammographic appearance	14
- Normal ultrasonographic appearance	23
- Magnetic resonance imaging of normal breast	31
II. Pathology and clinical picture	34
- Congenital anomalies	35
- Injuries of the breast	40
- Inflammatory conditions	41
- Dysplasia	44
- Tumors of the mammary gland	47
III. Techniques	73
- Mammography	73
- Ultrasonography	87
- Magnetic resonance imaging.....	96
IV. Radiological & imaging manifestations of breast diseases with illustrated cases	107
- Injuries of the breast	109
- Inflammatory conditions	115
- Dysplasia	120
- Tumors of the mammary gland	126
Summary and conclusion	181
References	192
