**GENOTYPE PHENOTYPE
CORRELATION AND HORMONE
PROFILE IN EGYPTIAN CHILDREN
WITH SICKLE CELL ANAEMIA**

Thesis

Submitted for partial fulfillment
Of the M. D Degree

By

Susan Ahmed El Kholy

MB., BCh (1992)

Msc Paediatrics (1996)

Ain Shams University

Under supervision of

Prof. Dr Rabah Mohamed Shawki

Prof. Of pediatrics & Genetics

Head of Genetics Unit, Ain Shams University

Prof. Dr Ahmed Sami Khalifa

Prof. Of Pediatrics, Ain Shams University

Prof. Dr Mohamed Salah El Din El Kholy

Prof. Of pediatrics, Ain Shams University

Dr Mahmoud Mohamed Refaat

Genetic consultant

Genetic pediatric Unit

Ain Shams University

List of contents

Acknowledgement.....	I
List of figures.....	III
List of tables	IV
List of abbreviations	V
Introduction	1
Aim of the work.....	2
Chapter One Sickle Cell Anaemia	3
Section One: Introduction.....	4
Section two: Clinical Picture.....	9
Section three: Acute events.....	12
Section four: Haematological crises.....	22
Section five : Infections	26
Section six: Chronic Organ Damage.....	30
Section seven: Prognosis.....	38
Section eight: Laboratory Findings	42
Section nine: Diagnosis	44
Section ten: Treatment.....	49
Section eleven: New Approaches to Therapy	53
Chapter Two: Introduction to clinical genetics.....	58
Section One : Introduction.....	59
Section Two: Background of Genetic Disorders	64
Section Three: Diagnosis of a Genetic Disorder.....	66
Section Four: Molecular Diagnostics	69
Section Five: Clinical Genetics and Haematological Management	78
Section Six: Genetic Basis of Phenotypic Diversity of Sickle Cell Anaemia	86
Chapter Three: Growth, Puberty and Sickle Cell Disease	96
Section One: Hypothalamopituitary Axis	97
Section Two: Physiology of Growth Hormone.....	98
Section Three: Physiology of Puberty	108
Section Four: Effects Of Sickle Cell Anaemia on Growth and Puberty.....	119
Chapter Four: Subjects and Methods.....	125
Chapter Five: Results.....	136
Chapter Six: Discussion	160
Chapter Seven: Summary and Conclusions	173
Chapter Eight: Recommendations.....	177
Chapter Nine: References.....	179
المختص العربي.....	217

ACKNOWLEDGMENT

FIRST AND FOREMOST THANKS TO GOD

I WISH TO EXPRESS MY SINCEREST GRATITUDE TO PROF. DR. RABAH SHAWKI, PROFESSOR OF PAEDIATRICS AND GENETICS, AIN SHAMS UNIVERSITY FOR ALLOWING ME TO CONDUCT THIS WORK UNDER HER KIND SUPERVISION. HER CONSTANT SUPPORT AND GUIDANCE WERE A CORNER STONE WITHOUT WHICH THIS WORK WOULD HAVE NEVER COME TO LIGHT.

MY WARMEST GRATITUDE GOES TO PROF. DR. AHMED SAMI KHALIFA, PROFESSOR OF PAEDIATRICS, AIN SHAMS UNIVERSITY. HE HAS BEEN AND ALWAYS WILL BE THE FATHER FIGURE TO OUR GENERATION AND GENERATIONS TO COME. NEEDLESS TO SAY THAT ALTHOUGH I AM ESPECIALLY INDEBTED TO HIM FOR THIS WORK, HIS INFLUENCE ON MY WHOLE CAREER AND LIFE IS IMPECCABLE. I HOPE TO ALWAYS HONOUR HIM AND LIVE TO HIS EXPECTATIONS.

MY DEEP RESPECT AND APPRECIATION TO PROF. DR. MOHAMMED SALAH ELKHOLY, PROFESSOR OF PAEDIATRICS, AIN SHAMS UNIVERSITY, FOR HIS VALUABLE SUPPORT AND CONSTANT CONSTRUCTIVE GUIDANCE THROUGHOUT THIS WORK. HIS EXPERTISE AND KNOWLEDGE HAVE ALWAYS BEEN A SOURCE OF LIGHT AT THE END OF THE TUNNEL.

I WISH TO EXPRESS MY THANKS TO DR. MAHMOUD REFAAT FOR HIS GUIDANCE AND SUPPORT

NO WORDS CAN EXPRESS MY GRATITUDE TO DR ANNE HUGHES, READER IN GENETICS, REGIONAL CENTRE FOR GENETIC STUDIES IN NORTHERN IRELAND, QUEEN'S UNIVERSITY, BELFAST. NOT ONLY WAS THE GENETIC WORK DONE UNDER HER SUPERVISION, BUT ALSO SHE HAS SPENT AN ENORMOUS AMOUNT OF HER VALUABLE TIME PHYSICALLY TEACHING AND HELPING ME. THERE WERE TIMES WHEN THINGS APPEARED IMMENSELY DIFFICULT AND IMPOSSIBLE TO DO BUT SHE ALWAYS HAD THE PATIENCE, DETERMINATION AND EXPERTISE TO OVERCOME THE TOUGHEST DIFFICULTIES. THE VALUES THAT SHE HAS TAUGHT ME EXTEND FAR BEYOND THE BOUNDARIES OF MOLECULAR GENETICS ALTHOUGH IT HAS TO BE SAID THAT BEFORE KNOWING HER MY KNOWLEDGE OF THE LATEST WAS VERY LIMITED.

I ALSO ACKNOWLEDGE MY DEPT TO MR. DAVID MCGIBBON, SENIOR GENETICS LAB TECHNICIAN, RESEARCH LAB, BELFAST CITY HOSPITAL. HIS CONSTANT GUIDANCE, SUPERVISION, AND TEACHING ARE MOST HEART FULLY APPRECIATED. HE HAS GIVEN A LOT IF HIS TIME AND EFFORT TO ALLOW THIS WORK TO COME TO LIGHT WITHOUT ANY REAL OBLIGATIONS ON HIS BEHALF.

LAST BUT NOT LEAST I WOULD LIKE TO THANK THE CHILDREN AND THEIR FAMILIES WHO HAVE BEEN THE MAJOR DRIVING FORCE TO CONDUCT THIS WORK. I HOPE THIS WILL BE OF ANY BENEFIT TO THEM, AND I THANK THEM FOR THEIR PATIENCE, KINDNESS, AND UNDERSTANDING.

List of figures

	Page
Fig 2-1 The arrangement of genes within the β - globin clusters.....	63
Fig 2-2 Symbols of a pedigree.....	67
Fig 2-3 Pedigree of an Autosomal recessive disorder.....	68
Fig 2-4 Southern Blot technique.....	71
Fig 2-5 Polymerase Chain Reaction.....	75
Fig 2-6 Automated sequence analysis.....	77
Fig 2-7 Kinetics of Haemoglobin switching from embryo to adult.....	89
Fig 2-8 Haemoglobin gene family.....	91
Fig 2-9 Haplotypes of the β S globin gene.....	93
Fig 3-1 Growth curves for children with Sickle Cell Anaemia.....	123
Fig 5-1 Results of the digestion of fragments by DdeI on Agarose gel.....	138
Fig 5-2 Results of the digestion of fragments by Hind III.....	140
Fig 5-3 Age of presentation and duration of blood transfusion.....	146
Fig 5-4 Frequency of blood transfusion.....	147
Fig 5-5 Frequency of different types of Vasocclusive crises.....	148
Fig 5-6 Patients with positive family history and consanguinity.....	149
Fig 5-7 Number of patients with splenomegaly and jaundice.....	150
